Headquarters for Norman Horses

THE GREAT HORSE CENTER OF AMERICA

We have imported more stallions than any other government approved and prize winners in France, and have taken over two thousand prizes at various fairs in the United States.

All stallions warranted breeders.

D. DILLON & CO.,

Importers and Breeders of

NORMAN FRENCH HORSES

BLOOMINGTON, ILLINOIS.

A Head of Normans arrived in August, 1881, of different colors, never imported in America. Come and see them. 17-1f

The Rural Post.

LINDSAY, MARCH 2, 1882.

FARM AND FIRESIDE.

CONDUCTED BY A PRACTICAL AGRICULTURIST.]

[illegible] alone by the bright wood fire, [illegible] dame and the aged sire, [illegible] dreaming of days gone by, [illegible] drops fell on each wrinkled cheek, [illegible] had thoughts they could not speak, [illegible] each heart uttered a sigh [illegible] and tearful eyes descried [illegible] hats, placed side by side, [illegible] the sitting room wall, [illegible] grandsires, there they stood, [illegible] of flag and their frames of wood, [illegible] their backs as straight and tall [illegible]

[illegible] shook his silvery head, [illegible] trembling voice he gently said: [illegible] these emptied chairs! [illegible] sigh and thoughts to night [illegible] them forever out of sight [illegible] small, dark room upstairs.

[illegible] Father, no not yet; [illegible] I forget [illegible] children are away, [illegible] back, and one Mary, too, [illegible] of the sacred blue, [illegible] there every day

[illegible] whitling a ship, tall masts, [illegible] sails [illegible] Mary her patchwork saw [illegible] rubbish pieces [illegible] all from the little tables [illegible] that mamie knows.

[illegible] back from the hollow deep [illegible] from the battle field sleep [illegible] home [illegible] [illegible] children above [illegible] home [illegible] have, [illegible] child gone away.

Permanent Pastures.

At the recent meeting of the Eastern Ontario Association at Belleville Mr. Brown of the Ontario Agricultural College gave an address on permanent pastures, impressing remarks upon the convention the theory in connection with mixed farming in Eastern Ontario, that root cultivation and permanent pasture were the making of our best agriculture. They constituted the surest foundation of future success; the one meant liberalism, the other meant conservation. The two were inseparable in their natural upbuild. Wherever they might be politically, in relation to pasture it had to be remembered that Ontario was not a grazing country. It had no natural or artificial [illegible] the province was too rich all [illegible] afford space for the cattle and the sheep walk. Our farms were grain growers, and therefore [illegible] growers in that connection. It could not be said, however, that Ontario could not graze her own cattle. Farmers could do it were they willing to do it, but they did not as yet quite feel the want of it, or rather the value of being able to make all their own [illegible] mutton and milk from pasture alone for one half the year. It was a pity that Farmers were not fully alive to the importance of this subject. Most of them were content to turn out their young cattle to the bush, meadow, stubble or timothy pasture, where no doubt their progress might be very good; but after all there was in this system no annual and monthly reliability, no uniform round of plants to meet all the wants of animals that should be reached for the market.

THE KIND OF PASTURE NEEDED.

It was obvious that Ontario farmers stood in need of pasture that, first, gives several crops per annum; second, offers an early and late bite; third, cannot be destroyed by drought or frost; fourth, gives the largest quantity and best quality of dairy produce at the least possible cost; fifth, gives the largest quantity and best quality of beef and mutton at the least cost; sixth, can be made a soiling crop; seventh, keeps animals in the best health; eighth, is inexpensive to produce and maintain; ninth, is reliable at all times and permanent. In establishing a permanent pasture it was desirable that the kinds of grass selected should not at all or even many of them ripen during one month of leave off altogether at the beginning of the year. Beginning in 1877 they had had very great satisfaction in growing nine grasses and five clovers in connection with this subject at the experimental farm. The lecturer here exhibited a diagram showing all the plants mentioned in the order of precedence. He called particular attention to the

LUCERNE CLOVER,

which gives the pasture a start at the end of April, and continued right into the snow. Its monthly reproduction of a branchy succulent giving sixteen tons per acre per annum made it the king of soiling crops and the most reliable in permanent pasture because of its repeated annual growths and durability. It was the only safe starter in April. The common red clover was not much behind, but only good for two cuts or "bites" per season. It did not give a monthly crop like the Lucerne. The famous British soiling grasses, Italian and perennial, followed these, and under very favorable circumstances helped from May to part of September. The people of Ontario would be surprised indeed were they able to grow these grasses as at Edinburgh, Scotland, where the annual rent by cuttings for dairy cows fetches £180 per acre.

FAN CAT GRASS

was a four months crop, and a thoroughly reliable one in any weather. Indeed, along with timothy, orchard meadow fescue and fan cat made of themselves all the bottom and variety the most of graziers need desire. Meadow fescue was a strong plant not afraid of heat and difficulties. The common yellow or yellow clover, while not much relished by animals, was yet of account in regard of variety, and stood well between the early red clover and the latter white Dutch clover. The bunchy, strong, self-willed orchard was one of our standards, safe to stand, though equalled by meadow fescue and fan cat. In regard to the cultivation of timothy it was not necessary to say much about it, the American hay plant, which was certainly of immense value in the list. It was latter than some other grasses, but is always present from the end of May on to winter. The

KENTUCKY BLUE GRASS

was but one of the many members of the same family common in nature all over this continent. Late grasses were not generally very valuable feeding ones, and in his list were fine, red top and bent, which were not high in any part of the world for rich produce. As would be seen by the diagram the combination of grasses which have just been described would furnish one growth in April, nine in May, thirteen in June, fourteen in July and August, with ten in September, and four fresh in October. This, he thought, should meet the desires of the most fastidious of cattle and sheep. In spite of the severe drought of last summer the experimental farm permanent pasture was never bare nor wanting a fresh bite, though heavily stocked, but so close and strong was the growth that it had to be separated with the hand in order to afford an opportunity to examine the surface of the soil. The lecturer then proceeded to give the results of experiments or observations as to the conduct of some of the

PRINCIPAL GRASSES

as they stood in separate plots on August 20th, 1881. Rye grasses and perennial chiefly looks fresher, and are better as pasture than red top and timothy. Fan cat is about equal to meadow fescue, which is saying a good deal. Meadow fescue stands the drought better than orchard and timothy. Close, rich, green and vigorous orchard is somewhat behind meadow fescue and fan cat, but not much. Timothy is very good, but presents no bite for cattle. It is dry and somewhat withered and takes a fourth place. Kentucky blue grass is very and dry with a good sward. Red top, a good, tough sod, is about equal to timothy, but presenting no bite. The lecturer next adverted to the fact that during the last half century the best managed old pastures of England had stood at more value per acre than the richest arable land, partly because of their permanency and the reliability of crops, and largely because of their being able to graze three cows per acre. He thought there was no reason why Ontario could not do at least one third as well as England had done in this respect.

EXPERIMENTAL TESTS.

For three years in succession on the experimental farm, on a small scale, on comparatively old permanent pasture, as well as on that of two years' standing, they had clearly proved that seven sheep per acre could be well grazed on permanent pasture. There was therefore no other form of fodder that could do the same thing. The average timothy and clover pastures of the province in connection with mixed farming just grazed one animal to every three acres, taking from the first of May to the middle of October. On an average of years it had been shown that three and three-quarter cows could be kept on three acres of permanent pasture of the kind required, and as two-year-old steers and heifers preparing for the butcher eat more than ordinary milch cows, he would say one beeling animal per acre. There were at present twenty millions of arable acres in Ontario, possessing practically no permanent pasture, but 3,500,000 acres of rotation pastures that do or should maintain 1,100,000 head of beeling cattle. If there was only one-tenth of this rotation pasture under permanent form the annual gain to the province would exceed $11,000,000. The magnitude and material value of a few acres per farm in first-class permanent pasture was thus apparent. When everything was propitious and where no regular soiling crops were upheld, could always be had from well managed permanent pasture early and late, at ten tons per acre green weight. While it could not be maintained that there was no trouble, time and expense incurred in establishing successfully all that was desired in this connection, nor that its permanency and value could be upheld without fertilizing materials, it was not difficult to see that once fairly afoot permanent pasture cost a great deal less per acre each year proportionately to the produce received than any other crops could possibly do. The successful establishment and maintenance of such a pasture implied: first, a favorable position; second, a deep, retentive, dry soil; third, a rich, fine, friable surface; fourth, early, thick, shallow feeding; fifth, no accompanying crop; sixth, no grazing during the first year, very little the second year, but heavy in after years; seventh, fertilizing every third year.

HOW CONVENTION.

Hon. Francis Lewis spoke in the most complimentary terms of the lecture. The lecture and the diagrams accompanying it would, if acted upon, be of vastly more value to the province than all that the maintenance of the agricultural college and experimental farm would cost in forty years. He thought that the Kentucky blue grass was indigenous to the soil of North America from the 49th parallel to the North Pole. At the same time there were some soils not at all well adapted for it, while others were found to produce it in great luxuriance. He did not think timothy a good pasture grass. It had a large bulbous root at the very surface of the ground, which was subject to be ousted by the hoofs of the animals or scorched by the sun in dry, hot weather. The suggestion of Prof. Brown thoroughly met his approval, and in view of the system of seeding pursued by Canadian farmers, they were particularly well fitted. Prof. Brown had not only given them thoroughly sound theory, but had very ably demonstrated how this theory could be put in practice.

The Prodigal and His Brother.

A Michigan contributor to the Country Gentleman sends the following which we commend to the attention of ministers, and especially the text it decided: The ministers have preached so often and so faithfully regarding the Prodigal Son that young people who never reflect seriously on the subject are apt to think that prodigality is one of the stations on the road to Heaven. It is all right to preach of the wisdom of the Prodigal Son in returning to the old home, and the kindness of his father in forgiving him; but it is very unkind and unjust to speak evil of a boy who did his whole duty on the farm. His father knew him better than all the great men of modern times, and he never said his elder son was a mean sneak, too stingy to get drunk; nor did not say he was going to heaven like a mummy. But he said: "*Son, thou art ever with me and all that I have is thine.*"

"Let thistles grow instead of wheat and cockle instead of barley," but save us from all kinds of runaway prodigals. What are the farms, when there are no due young farmers to cultivate and improve them? No doubt but sad hearted parents and a disgraced family, after long years of sorrow, could welcome back a returning prodigal. But give us *the boy you can always trust* who make a mothers heart sing for joy every day of their lives. This young farmer that never at any time transgressed his father's commandment was a model boy; no wonder he was angry with his younger brother for running away from honest work and disgracing a good family. I should like to hear some grand sermons about the young man who was not a prodigal; who never wasted his substance with riotous living; who never sowed any wild oats, but honored his father. We need just such faithful young men now to make happy homes, and a prosperous community, life worth living, and this new world flowing with milk and honey.

Farm Notes.

RAISING HIGH. Mr. Jas. P. Ross, of Wabash, Ind., advertises: "for sale a Jersey bull calf dropped Feb. 4th last, a double grandson of 'Farmers Glory.' The price asked is $200 and only a month old!

FELONS BOILS.—SIMPLE REMEDY.—"Felons" which are usually termed "Whitlow" by physicians we believe, remarks the American Agriculturist, are a very painful and often a very serious affection of the fingers, generally of the last joints, and often near and involving the nails. As the fingers are much exposed to bruises, felons are quite common among those who constantly use there hands at hard work. If allowed to continue until matter (pus) forms, and the periosteum or bone sheathing is affected, lancing is necessary; but if taken in time, a simple application of copal varnish, covering it with a bandage, is highly recommended. If the varnish becomes dry and unpleasantly hard, a little fresh varnish may be applied from time to time. When a cure is effected, the varnish is easily removed by rubbing into it a little lard and washing it with soap and water. Dr. A. B. Isham details in "Medical News," a number of cases of its application with uniform success, where formation of pus had not previously occurred. In few cases there was apparently a combination of the "run-around" with the felon, and in all of them there was a swelling, redness, tenderness and pain. In comparing the use of eight various remedies for "run-arounds," boils, and any local acute inflammation of external parts.

TARE GOOD CARE OF THE HORSES.—If as work, says the American Agriculturist, they need a regular allowance of grain. If worked hard, ten quarts of ground corn and oats mixed will not be too much. The hay may be cut and moistened, and the feed mixed with it. Such a ration is not over bulky, and contains sufficient nourishment to keep a working horse in good trim. At this season the coat begins to loosen, and the skin is irritable. When much so, it may be corrected by giving daily, for a week, one ounce of equal parts of sulphur and cream of tartar. Good grooming with soft brush and blunt curry-comb is decidedly useful. Everything about the stable should be kept neat and clean, as the warm weather approaches. Turn brood mares loose into a box stall as foaling time approaches. They should receive gentle treatment, as this is likely to influence the disposition of the colt.

Art and Oil.

The Norfolk (Va.) Virginian of Jan. 16, 1881, refers to the remarkable cure effected by St. Jacobs Oil in the case of Prof. Cromwell, known the country over for his magnificent art illustrations who had suffered excruciating torments from rheumatism, until he tried the oil, whose effects were magical. 76-1.

A General Stampede

Never was such a rush made for any drug store as is now at S. Perrin's for a trial bottle of Dr. King's New Discovery for Consumption, Coughs and Colds. All persons afflicted with Asthma, Bronchitis, Hoarseness, Severe Coughs, or any affliction of the Throat and Lungs, can get a trial bottle of this great remedy *free*, by calling at the above drug store. 13-d.

Workingmen

Before you begin your heavy spring work after a winter of relaxation, your system needs cleansing and strengthening to prevent an attack of ague, bilious or spring fever, or some other spring sickness that will unfit you for a season's work. You will save time, much sickness and great expense if you will use one bottle of Hop Bitters in your family this month. Don't wait. [Burlington Hawkeye. 75-3.

HUMORS OF THE DAY.

A Reliable Fact

It is an established fact that Hagyard's Pectoral Balsam is the best cure for coughs, colds, sore throat, asthma, croup, bronchitis and all troubles arising from neglected colds. Price 25 cents. 75-2.

From Hamilton.

A gentleman writes: "I have suffered for over four years with night losses and general weakness, caused by abuse. I had tried all the advertised medicines and a number of eminent doctors, and found no relief until I commenced using Mack's Magnetic Medicine, and am entirely restored." See advt. in another column. 76-1.

A fifteen year old Detroit boy killed a man because he made life a bore to him. If editors acted on that principal the coroners wouldn't get time to sleep.

Hagyard's Yellow Oil

Will be found invaluable for all purposes of a family medicine. Immediate relief will follow its use. It relieves pain, cures chilblains, frost bites, scalds, burns, corns, rheumatism, neuralgia, &c. For internal use it is none the less wonderful. One or two doses frequently cure sore throat. It will cure croup in a few minutes. A few bottles has often cured asthma. Colic has been cured by a teaspoonful dose. It cures with the utmost rapidity, it is really a wonderful medicine. 75-2.

Amature printer. There is no regular pastry cook connected with a printing office, although sometimes when one of the hands makes a little pi he makes the foreman a little tart, and then, perhaps, the latter complains of being "out of sorts."

Hagyard's Yellow Oil

is at the head of the list for all purposes of a family medicine. It is used with unprecedented success, both internally and externally. It cures sore throat, burns, scalds, insect bites; relieves, and often cures asthma. 75-2.

Mr. Cobb recently married Miss Webb; he knew they were intended for each other as soon as he spider.

The Electric Light,

unpreceding as it does all modes of illumination, and rivalled only by the glorious sunshine, will not be hailed with greater joy by mankind, than is Burdock Blood Bitters, which is as far superior to all other blood purifiers and tonics as the electric light is superior to the old fashioned tallow dip. Burdock Blood Bitters cures Scrofula, and all foul humors and impurities of the blood. 75-2.

Conundrum. Why is a kiss like a rumour? Because it flies from mouth to mouth. Why is it like a sermon? Because it requires two heads and an application.

Sure cure for a Cough.

The most reliable remedy for a cough or cold, asthma, shortness of breath, sore throat weak lungs and all bronchial troubles, is Hagyard's Pectoral Balsam. Price 25 cents. 75-2

"I don't mind the pi runner much," said a fond but perplexed mother, recently, "but when Marier gets to sallyin' around in front of the lookin' glass and disputin' in French with her own shadder it makes me right nervous."

What to Study.

Pope, the poetical philosopher said: "The proper study of mankind is man," and yet, how little is the real science of man studied! If people understood and heeded the laws of health, and if when out of sorts would resort to a common sense like Burdock Blood Bitters, many of the "ills that flesh is heir to" might be effectually remedied. It invigorates and regulates all the secretions to a healthy action. 75-2

The custom of beating marriage notices with the names of the high contracting parties separated by a dash gives sometimes a curious combination. Among the notices in a Philadelphia paper on Saturday were three headed "Birch Twigs," "Fort-Reed," and "Price Given."

Nervous Exhaustion.

And all diseases arising from youthful indiscretions are speedily and radically removed by that wonderful remedy known as Mack's Magnetic Medicine, an advertisement of which appears in another column. 75-1.

J. Fulton, M. D.,

Prof. Trinity Medical College, Toronto, says Wheeler's Phosphates and Calisaya is a combination of great reliability and efficacy. It has been very highly recommended by the medical profession, both at home and abroad who have it has been tried. We have used it in many cases of indigestion, nervous prostration, chlorosis and anemia, and we have no hesitation in giving it our unqualified recommendation. We have, therefore, great pleasure in calling the attention of the profession to a preparation so worthy of confidence, and so reliable in the treatment of convalescing patients, and all diseases attended with debility of the nervous and muscular system. 76-1.

Holloway's Pills.

The stomach and its troubles cause more discomfort and bring more unhappiness than is generally supposed. The thousand ills that attite there may be prevented or dissipated by the judicious use of these purifying Pills, which act as a sure, gentle and mild aperient, without annoying the nerves of the most susceptible or irritating the most delicate organization. Holloway's Pills will bestow comfort and confer relief on every headachy, dyspeptic, and sickly sufferer, whose tortures make him a burden to himself and a bugbear to his friends. These Pills have long been the popular remedy for a weak stomach, for a disordered liver, or a perverted digestion, which yield without difficulty to their regulating, purifying, and tonic qualities. 76-1.

'A Drowning Man will Catch at a Straw

If he catch it, it will do him no good. Thousands of people, who having neglected colds and coughs until they have become dangerous, will rush to almost every nostrum for relief. This is why so many experiments are tried by the sufferers. Go to your druggist, buy a bottle of Wistar's Balsam of Wild Cherry, and use it with confidence. It will benefit at once and ultimately cure. It is no straw, it is a cable well tried; hold on to it and be saved. 50c. and $1 a bottle. Sold by all druggists. 76-1.

It is a remarkable fact that Dr. Thomas' Eclectric Oil is as good for internal as external use. For disease of the lungs and throat and for rheumatism, neuralgia, crick in the back, wounds and sores, it is the best known remedy, and much trouble is saved by having it always on hand. Jacob Lockman, Buffalo, says he has been using it for rheumatism. He had such a lame back that he could do nothing; but one bottle entirely cured him. 76-1.

Thousands have used Kendall's Spavin Cure for rheumatism after all other remedies had failed, and have experienced instant relief. 76-1.

When you have got an old horse that has passed the market period, apply a bottle of Kendall's Spavin Cure and the result will be marvellous. Read advertisement. 76-1.

Hanchett & Carter, proprietors of the great 13th Street Livery, Chicago, in a letter dated Dec. 6, 1879, speak thus of Kendall's Spavin Cure: "It is several years since we bought the first of you, and we do not hesitate to say it is the very best article for spavins, ringbones, scratches, splints, etc., we ever used. We would not be without it in our large livery for thousands of dollars. We pronounce it one of the greatest discoveries of the age. It stands without a peer in horse liniments." See advt. 76-1.

Mrs. A. Nelson, No. 94 Colborne Street, Brantford, writes: "I was a sufferer from chronic dyspepsia for eleven years. Always after eating an intense burning sensation in the stomach, at times very distressing, causing a dropping and anguid feeling, which would last for several hours after eating. I was recommended by Mr. Poppelwell, chemist, of our city, to try Northrope & Lyman's Vegetable Discovery and Dyspeptic Cure, and I am thankful to say that I have got been better for years; that burning sensation and anguid feeling has all gone, and food does not lay heavy on my stomach. Others of my family have used it with the best results." Being personally acquainted with Mrs Nelson, I certify to the truth of the above statement. (Signed) A. A. POPPELWELL, chemist and druggist, Brantford. 76-1.

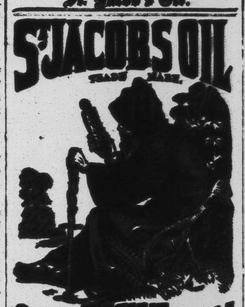
St. Jacob's Oil.



ST. JACOBS OIL

THE CERTAIN CURE REMEDY.

FOR

RHEUMATISM,

Neuralgia, Sciatica, Lumbago, Backache, Soreness of the Chest, Gout, Quinsy, Sore Throat, Swellings and Sprains, Burns and Scalds, General Bodily Pains, Toothache, Earache and Headache, Frosted Feet and Ears, and all other Pains and Aches.

No Preparation on earth equals St. Jacobs Oil as a safe, sure, simple and cheap External Remedy. A trial entails but the comparatively trifling outlay of 50 Cents, and every one suffering with pain can have cheap and positive proof of its claims.

Directions in Eleven Languages.

SOLD BY ALL DRUGGISTS AND DEALERS IN MEDICINE.

A. VOGELER & CO.,

Baltimore, Md., U. S. A.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere. 25 cents a bottle. 73-1y.

Rest and Comfort to the Suffering.

"Brown's Hoseehold Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any Kind of pain or ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful." "Brown's Household Panacea," being acknowledged as the great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, should be in every family handy for use when wanted, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds;" and is for sale by all Druggists at 25 cents a bottle. 73-1y

The Elements of Bone, Brain and Muscle

are derived from the blood, which is the grand natural source of vital energy, the motor of the bodily organs. When the circulation becomes impoverished in consequence of weak digestion and imperfect assimilation of the food, which should enrich it, every bodily function flags and the system grows feeble and disordered. When the blood becomes impure either from the development of inherited seeds of disease, its contamination by bile, or other causes, serious maladies surely follow. A highly accredited remedy for these evils is Norrmoor & Lyman's Vegetable Discovery and Dyspeptic Cure, which eradicates impurities of the blood and fertilizes it by promoting digestion and assimilation. Moreover, this fine alterative and stomachic exerts a specific action upon the liver, healthfully stimulating that organ to a performance of its secretive duty when inactive, and expelling bile from the blood. It likewise possesses diuretic and diaphoretic properties of a high order, rendering the kidneys active and healthy, and expelling from the system the acrid elements which produce rheumatic pain. Price, $1. Sample bottle, 10cts. Ask for Norrmoor & Lyman's Vegetable and Dyspeptic Cure. The wrapper bears a fac simile of their signature. Sold by all medicine dealers. 76 cow 2.

NEW BLACKSMITH SHOP.

D. M. LEARY,

of Downeyville, begs to inform his friends and the public that he has removed to Lindsay and has opened a

BLACKSMITH SHOP

in Knowlson's Block, on William-st., opposite C. L. Baker's feed store, fourth door from Kent-st., where he hopes by strict attention to business to merit a share of public patronage. He is prepared to shoe horses with neatness and dispatch. Horses entrusted to his care will be promptly attended to by the most scientific workmen and a first class job guaranteed. Corns, Quitters and Sand Cracks properly treated. Horses dropped from interfering and forging. Advice given on the proper treatment of all diseases of the horse's feet. Horses entrusted to his care will not be beaten or legs broken. A CALL SOLICITED
