LINDSAY, FRIDAY, MARCH 9, 1881.

FARM AND FIRESIDE.

The Use of Salt as a Fertilizer.

We give another section of the summary of Professor Brown's evidence given in the report of the agricultural commission. Several items in local correspondence last week and probably this week as well show how the farmers of this county are going in for this fertilizer. We are gratified to note improvements in other respects, such as stock breeding. The report says: Mr. John Moore, of North Dummer, in the county of Waterloo, who was one of the witnesses examined during the sittings of the commissioners at Peterboro, Jan. 4th, 1881, gives through the Dominion Vindicator his own practical experience as follows: "From 10th of March last year until the same date this year I have sold 831 pounds of butter for $145.81. I had five cows, two of them heifers. During that time I estimate that it took the produce of two to supply the house as we use considerable new milk, cream for fruit, and butter during the year. Then that would not leave more than the product of three for sale. Now the income from these three cows will be in excess of the value of the well fatted steer of three years old which, as shown at the club, takes the feeding of four head to make him worth $100. Again if my cows were fed the same quantity of meal that the steer would get in addition to their daily allowance of a half bushel of turnips during the winter the difference in favour of dairying would be much greater, besides the manure in that case would be just as valuable as from the fattening animal. Now if the milk from these three cows was made into cheese the direct income would be much larger as the milk that will make 1 lb. of butter will make ¾ lbs. of cheese but you cannot raise calves on the offal and it is not worth much even for pigs. No doubt there is much more labor connected with dairying (especially butter making) than with fattening stock. Still I think after paying for the extra labor there would be a handsome sum in favor of the milking stock. In the first place an average farmer like myself must keep at least two cows to supply house, now if he has a few more they do not increase the expense in the same proportion as the first two. The same milk room and utensils with the exception of a few more pans will do. There is no more trouble in driving them up to be milked than the smaller number, therefore the more a person can conveniently manage the less expense per cow. From my five cows I raised five calves which are worth at least $10 each. I got new milk for the first two weeks, the next two twelve hours milk and after that the ordinary skim milk as the cows did not all come in at the same time the calves had a better chance than they otherwise would; the pigs were also fed a quantity of milk, say $10 worth. Now these two items in my judgment pay for not about the extra labor but all of it leaving the $145.81 to compare with the $100 and the labor be it little or much to be deducted from that.

Farmers Clubs.

The Oshawa Farmer's Club on "Dairying and Breeding."

The important subject of "Dairying" was discussed at the last meeting of the Oshawa farmer's club. The discussion was not as interesting as usual. A suggestive remark was made by Mr. Mackie who said that to have a beef meal worth $100 each year it was necessary to have a cow, a calf, a yearling, a two year old and a three year old. Thus for the $100 you have to feed four animals. This would keep four milch cows, and these cows fed as the beef cattle would be, would yield more than could be got for the beef by fifty per cent. The trouble was that the best feed was given to the beef, and the cows got what the others would not eat. Then they complained that butter-making would not pay. A good cow, well fed, should produce 300 lbs. per annum. This at 20 cts., would give $60 per cow. But, taking the yield at 200 lbs., and the price only 15 cents, then the four cows would yield $120, and the milk would pay for the cost of milking and butter making. This gave a profit of $30 over beef. Mr Campbell said four cows would eat more than the four beef animals. Mr Lick said that if cows were fed like beef animals, and not as well bred cows as a beef animal that would make $100, at three years the yield would be from 90 to 100 lbs. of butter per annum. Mr. Mackie said he did not think the butter was not better now than previously. He did not believe that the butter could not be improved until a market was established here. The sort of butter brought here would be driven out of the Port Hope market. The quality of butter was improving in Whitby on account of the market. The shop keepers would not grade the butter, and so long as all sorts of butter would bring the same price, it would not be improved. Mr. Campbell said routing farmers were not in a position to make butter, as they had not proper appliances. He put very little value on the skim milk, he thought it would not pay the cost of the labor of dairying. Mr. Lick said, where, which was much poorer than skim milk, was considered to be worth $5 per cow per annum. He thought that fed to pigs the skim milk would pay for the labor. He said the quality of salt was a most important thing. He found nothing equal to Ashton salt. The Canadian and the American was not good for best butter.

An East Whitby Farmer's View.

The point brought out by Mr. Mackie at the Oshawa farmer's club meeting as to the relative profit of dairying and beef has elicited an interesting letter from an "East Whitby Farmer," who has a rap at the "experimenters" on the agricultural farm, gives through the Dominion Vindicator his own practical experience as follows: "From 10th of March last year until the same date this year I have sold 831 pounds of butter for $145.81. I had five cows, two of them heifers. During that time I estimate that it took the produce of two to supply the house as we use considerable new milk, cream for fruit, and butter during the year. Then that would not leave more than the product of three for sale. Now the income from these three cows will be in excess of the value of the well fatted steer of three years old which, as shown at the club, takes the feeding of four head to make him worth $100. Again if my cows were fed the same quantity of meal that the steer would get in addition to their daily allowance of a half bushel of turnips during the winter the difference in favour of dairying would be much greater, besides the manure in that case would be just as valuable as from the fattening animal. Now if the milk from these three cows was made into cheese the direct income would be much larger as the milk that will make 1 lb. of butter will make ¾ lbs. of cheese but you cannot raise calves on the offal and it is not worth much even for pigs. No doubt there is much more labor connected with dairying (especially butter making) than with fattening stock. Still I think after paying for the extra labor there would be a handsome sum in favor of the milking stock. In the first place an average farmer like myself must keep at least two cows to supply house, now if he has a few more they do not increase the expense in the same proportion as the first two. The same milk room and utensils with the exception of a few more pans will do. There is no more trouble in driving them up to be milked than the smaller number, therefore the more a person can conveniently manage the less expense per cow. Victoria County Directory.

PROSPECTUS OF A

DIRECTORY for the COUNTY OF VICTORIA

FOR 1881-2.

A complete directory of the County of Victoria, including the town of Lindsay, has never been published and believing that the want of a good and reliable publication of this kind is much felt by business men and others, and also that the publishing of such a work would do much to promote the material interests of the town and county, the undersigned has determined to undertake the work provided sufficient encouragement and support is accorded.

The general plan of the work will be similar to that of the Directory for the County of Hastings, issued by the Belleville Intelligencer Printing and Publishing Company in 1879, but several improvements will be introduced, so as to render it indispensable to every business man in the County, and those out of it, who have business relations with its inhabitants. The following are some of the features of interest which will be found among its contents:

1st.—A Map of the County showing each Lot and Concession, according to the last surveys, with the leading roads specially marked.

2nd.—Maps of the town of Lindsay and Villages of Omemee, Fenelon Falls, Bobcaygeon, Woodville and probably some others.

3rd.—A complete list of the Householders, alphabetically arranged, of each Town, Village, and Township in the County, with Street or Concession and Lot upon which they reside, together with the Post Office Address of each Householder.

4th.—A Classified Business Directory of the Trades and Professions of the Town of Lindsay and principal Villages.

5th.—An abstract of each County, Town and Village By-laws as are of public interest.

6th.—A complete list of the County, Town, Village and Township Officials, and Dominion and Provincial Officials residing within the County.

7th.—A Law Directory, giving dates of Courts held in the County, limits of the several Division Court Districts, &c., &c.

8th.—A complete list of all the different Churches, Associations, Boards, Institutes, Volunteer Companies, Clubs, Societies, Orders, and Lodges in the Town and County, with the names of the principal Officers of each.

9th.—Full particulars as to the Educational facilities of the County.

10th.—An Exhibit of the Progress, Position and resources of the County, based upon the census returns of 1881.

11th.—An article on Lindsay's present and prospective position as a Commercial, Manufacturing and Railway Centre.

12th.—Every pains will be taken to render the descriptive information attached to each Municipality both complete and correct.

13th.—As the North part of the township of Manvers, a part of the township of Brock, and the township of Thorah and village of Beaverton are commercially connected with Lindsay, these sections will be included in the plan and scope of the Directory.

The general public as well as business and professional men will, it is confidently expected, at once appreciate the advantages that will result from the publication and circulation of such a work. Great care will be taken to ensure accuracy of detail, and no pains or expense will be spared to render the work in every respect a credit to the publisher and to the town, and a benefit to the Town and County.

The directory will make a work of from four to five hundred pages, 8vo. demy, will be clearly printed on good paper, and bound in cloth.

In order to ensure the largest possible circulation, the subscription has been fixed at the low price of TWO DOLLARS PER COPY. Intending subscribers are respectfully requested to hand in their names without waiting to be asked.

CHAS. D. BARR.

OFFICE OF THE POST, LINDSAY, FEBRUARY 17TH, 1881.

W. J. Marshall.

MUSIC & STATIONERY EMPORIUM.

W. J. MARSHALL

Respectfully informs the public that he has purchased the stock in trade and good-will of the business carried on by Mr. A. M. Rockie, and has received a large stock of the best Organs in Canada including the celebrated EXCELSIOR, and the New York WEBER PIANOS, the best in the world; a choice stock of Musical Merchandise, Stationery of all kinds, Musical Instruments, Violins, from $2 to $50; Concertinas from $1 to $7; Organs at greatly reduced prices, the lowest ever known of in Lindsay. CALL AND SEE THEM.

☞ Don't forget the place: Rockie's old stand, next to Milne and Graham's.

Lindsay, March 17th, 1881.

The Manhattan Feed.

THE MANHATTAN FEED,

For Horses, Cattle, Milch Cows, Sheep, Pigs and Poultry.

COWS fed on this Feed will give one-quarter more and richer milk than when fed on the old system. This has been proved by actual experiment.

FOR FEEDING PURPOSES the MANHATTAN FEED, if used as directed, will fatten in a surprisingly short time, as a considerable saving will be effected in preparing animals for the market. The flesh of such animals is much better and firmer than when fed in the ordinary way.

READ THESE TO FIRST RECOMMENDATIONS.

Corner of Lacroix and Rousseau Streets, (Near Dalhousie Square) Montreal, Jan. 12th, 1880.

I have used the Manhattan Feed for my horses and cows, and found it to be very beneficial, and very noticeable on cows especially, the quality of milch Kows increased considerably, and the same quantity of food, and they have fattened also to a considerable extent at the same time. Z. GRAVEL,

Peterboro, Jan. 4th, 1881,

Messrs. Taylor & McDonald, Agents,—Dear Sirs: The Manhattan Feed bought from you has not only done all you proposed for it, but much more. Before feeding it to our hens we were only getting on an average two eggs per week from each hen now we average five to six. The difference it has made in our sheep one would have to see in order to credit. I would advise all interested in getting their cattle in good condition to get a bag. It has more than paid me its cost twice over.

(Signed) ROBERT PARKER, Farmer, 5th con., Township Dummer.

Scott & Bowne.

SEE WHAT PHYSICIANS

AND PEOPLE IN CANADA SAY ABOUT

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME & SODA

As a Remedy for Consumption and Wasting Diseases.

PETERBORO, N.B., Nov. 5, 1880.

Messrs. SCOTT & BOWNE:—I have used and prescribed for some time "Scott's Emulsion of Cod Liver Oil," and find it an excellent food preparation, agreeing well with the stomach, easily taken, and its continued use adding greatly to the strength and comfort of the patient.

A. H. CHAPMAN, M.D., Penn. Med. College.

AMHERST, NOVA SCOTIA, Nov. 8, 1880.

Messrs. SCOTT & BOWNE, Gentlemen:—For nearly two years I have been acquainted with Scott's Emulsion of Cod Liver Oil with Hypophosphites, and consider it the finest preparation now before the public. Its permanency as an Emulsion, with the pleasant flavor, makes it the great favorite for children, and I do highly recommend it for all wasting diseases of the system.

Yours, very truly,

C. A. BLACK, M.D.

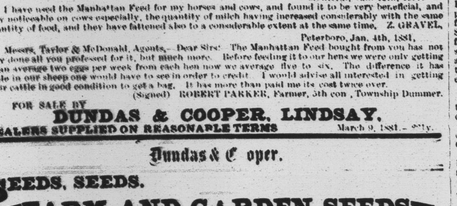
ELORA ONT., JULY, 1880.

This is to certify that my daughter has had Lung Disease for some time, and was very much reduced in flesh, and had not strength enough to walk across the street. She was advised by a lady friend to try Scott's Emulsion, and to our great surprise before she had used three bottles her health was completely recovered. I recommend it to every one troubled with the same disease.

JOHN W. BOWES.

For sale by all Druggists at $1 per Bottle.

Pain-Killer.



The PAIN-KILLER

Is recommended by *Physicians, Ministers, Missionaries, Managers of Factories, Hotels, Nurses in Hospitals*—in short, *everybody and anybody who has ever given it a trial.*

TAKEN INTERNALLY, it cures Dysentery, Cholera, Diarrhœa, Cramp and Pain in the Stomach, Bowel Complaint, Painter's Colic, Liver Complaint, Dyspepsia or Indigestion, sudden Colds, and Chills, Fever and Ague.

USED EXTERNALLY, it cures Boils, Felons, Cuts, Bruises, Burns, Scalds, Old Sores and Spines, Sore Throat, Diphtheria, Chilblains, Pain in the Face, Neuralgia and Rheumatism, Chapped Hands, Frost Bites, Feet, &c.

The PAIN KILLER is sent up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively. The large bottles are therefore cheapest.

TOWNSHIP OF FENELON,

In the County of Victoria.

Pursuant to the decree made in re MARSHALL, MARSHALL vs. MARSHALL, bearing date the 14th day of January, A. D. 1881. There will be offered for sale with the approbation of WILLIAM WARREN DEAN, Esq., the Master of this Court at Lindsay, at

The McArthur House, in the Village of Fenelon Falls,

—ON—

Saturday, the Ninth day of April, A. D., 1881,

at 12 o'clock noon, the following parcels of land and premises in four parcels:

PARCEL I.—The west half of lot No. Sixteen in the Eighth concession of the Township of Fenelon, containing One Hundred acres more or less. There are on this about forty acres cleared and under cultivation, and the remaining portion about five acres are covered with hardwood and the balance mixed timber. There are about fourteen acres under fall wheat.

PARCEL II.—The south west quarter of lot No. Seventeen in the Eighth concession of the said Township, containing Fifty acres more or less. There are about twenty four acres cleared and under cultivation on this parcel and the balance thereof is covered with tamarac. There are a log house 20x30, a log barn 35x20, and a log stable on this parcel.

PARCEL IV.—The west half of lot No. Eighteen in the Eighth concession of the said Township of Fenelon, containing One Hundred acres, more or less. There are about Eighty-five acres cleared, fenced and under cultivation on this parcel, and of the remainder thereof about six acres are covered with hardwood and the balance with mixed timber. There are erected on this parcel a good log house 20x30 with frame kitchen 18x16 attached, a frame barn 52x32, a log barn and log stables.

The above property is conveniently situated, being about four miles from the village of Fenelon Falls and about twelve miles from the town of Lindsay. There is a good school about a mile from the property.

TERMS.—Ten per cent. of the purchase money down and the balance in one month from the day of sale without interest. There will be a reserved bid on each parcel. The other conditions will be the standing conditions of the Court of Chancery.

Further particulars and conditions of sale can be had on application to MESSRS. HUDSPETH & JACKSON and WILLIAM McDONNELL, Esq., Solicitors, Lindsay, and JOHN HOSKIN, Esq., Q. C., Toronto.

Dated this 15th day of March, A. D., 1881.

(Signed) W. W. DEAN, Master.

HUDSPETH & JACKSON, Vendor's Solicitor's, Lindsay. 22-4.
