GIRLS' GOSSIP.

How to Make Delicacies From the Fruit of the Season—Other Household Hints.

Raspberry jam, which is regarded as the best of all fruit jams, is made precisely like the blackberry, in proportions and time and manner of cooking.

Wet the top of a dish of mashed potatoes with milk and set it in the oven to brown. Let it stay there until there is a brown crust over it.

In washing a sore mouth, take a teaspoonful of powdered borax, a tablespoonful of honey and four ounces of water, well mixed. Hold in the mouth for a little while.

For burns and scalds cover thickly with carbonate of soda, and bind up with a cold, wet bandage. If the skin is not broken, painting with turpentine will remove the smarting heat.

During the hot weather one of the most refreshing beverages I know is composed of a spoonful of currant wine or raspberry vinegar, a spoonful of kirschwasser, a lump of ice and a glassful of soda water or of plain wate.—*London Truth.*

Chair covers (or slips) are very pretty made of brown crash, and worked with worsteds. Work each chair a different design. One with poppy leaves, another acorn and oak leaves, a third scarlet geranium, a fourth with roses. Then another might be embroidered with birds such as a swan, a thrush and nest.

Pineapples make a delicate preserve. Slice the pineapple thin, as you would for the table; to one pound of the fruit, allow three-quarters of a pound of sugar; simmer them together until the pineapple looks transparent. This preserve, by the way, is a delicious accompaniment to ice cream. It is nice for tea, also, with rolls or bread and butter.

A deal of breakage amongst glass and crockery can be prevented by the simple precaution of placing lamp-chimneys, tumblers and such articles in a pot filled with cold water, to which some common table salt has been added. Boil the water well, and then allow it to cool slowly. When the articles are taken out and washed they will resist any sudden changes of temperature.

A friend writes word from Trouville, France, that the eccentricities there in head coverings are great. Among other monstrosities huge sunbonnets are worn, made of all kinds of materials. Inside them you perceive the face of the wearer at a long distance; and the roof of the edifice is crowned with lizards, beetles, toads, and any repulsive looking animal you may like to suggest.

One of the novelties and luxuries of the period is banana cake. Take one cup of butter, two cups of sugar, one cup of water or of sweet milk, three eggs, four cups of flour, three small teaspoons of baking powder. Mix lightly and bake in layers. Make an icing of the whites of two eggs, and one cup and a half of powdered sugar. Spread this on the layers, and then cover thickly and entirely with bananas sliced thin. The cake may be flavored with vanilla. The top should be simply frosted.

There seems to be nothing which the cholera scare will not induce people to do. The last preventive measure taken in France is for men to trim their moustaches with carbolic acid, so as to keep the microbes away. It is said that even ladies are using carbolic acid; but that I can hardly believe—unless, by-the-bye, some thoughtful "perfumer" has succeeded in preparing "carbolic rouge." This would, doubtless, be very popular.

A lady writes: I think crab apples are good spiced. For 7 pounds of crab apples use 3½ pounds of sugar, 1 quart of best vinegar, 2 ounces of stick cinnamon, 1 ounce of whole cloves and 2 or three pieces of root ginger. Boil the syrup fifteen minutes before putting in the apples, cook until tender, then remove to glass or stone jars, boil down the syrup one half and pour over the apples. I always select the large, perfect ones, and leave them whole and the stems on, for I think they look much better so.

To preserve the large plums that have tough skins, it is necessary first of all to remove the skins. This may be done very easily by dropping a few of the plums at a time into hot water, then with a very sharp knife removing the skins. Cut the plums in halves, drop them into a syrup made of sugar and water. The plums should be weighed, and an equal quantity of sugar should be set aside for the syrup. Let them cook so gently that they will keep their shape. Take them from the syrup with a skimmer, put them into the cans and pour the syrup over them, having first removed the scum from it.

The Princess de Sagan goes about Paris in a Pierrotte hat, with a very high crown, peaked at the top, made of Manilla straw. In front the brim advances rather over the face, and behind it is turned up and lined with poppy-colored tulle. A regular shower of bows and ends of scarlet and blue ribbon forms the trimming. With this very becoming hat the Princess generally wears a costume composed of dark blue mohair or delaine and scarlet foulard; the tunic is of delaine, caught up on the side with silver olives. The long pelerine of mohair is lined with scarlet foulard. The hood is lined with foulard and a cascade of ribbons hangs from its points.

Blackberry jam, as well as blackberry wine, is good to eat in any bowel or stomach trouble. It is medicinal and pleasant to eat. Children will take it gladly at any time, when medicine would be scornfully rejected by the small tyrants. In making blackberry jam, see that the fruit is perfectly fresh, as any acidity will spoil the whole, and you will have had all your work for nothing. After carefully picking over the fruit, and seeing that no foreign substance remains with them, weigh them, and to every pound of the fruit allow half a pound of nice brown sugar; put the berries into the preserving kettle by themselves, with a small cup of water in the bottom to prevent their burning; cook them, stirring frequently, until the fruit seems reduced to an almost solid mass; then add the sugar and cook for half an hour longer; put them in glass jars and seal. Some persons add a litttle powdered ginger to the berries to give a "snap" to the jam, as they say. It does certainly give it a character, but most persons prefer the jam without any foreign flavor. This jam is nice for tarts, and also to serve for tea or luncheon, with bread and butter.

CURRENT TOPICS.

Some successful explorations have been made in the central and western part of Asia Minor by Ramsay, the Scotch traveller, and Dr. Sterrett, of the American school in Athens. They made an expedition with special reference to the ruins of the cities of ancient Phrygia, Pisidia and Lycaonia, including the points to which interest is given by the travels of the Apostle Paul. They have brought back observations on the remains and position of more than ten Greek towns of which no other modern explorer has given any account.

The word "fudge" has a positive personality underlying it. Such is it, at least, if Disraeli's account be authentic. He quotes from a very old pamphlet entitled, "Remarks Upon the Navy," wherein the author says: "There was in our time one 'Captain Fudge,' commander of a merchantman, who, upon his return from his voyage, how ill fraught soever his ship was, always brought home his owners a good crop of lies, so much that now, aboard ship, the sailors, when they hear a great lie told, cry out: 'You fudge it!' The ship was the Black Eagle, the time that of Charles II."

Prof. Douglass, of the Michigan State University, produces amateur cyclones at will by suspending a large copper plate by silken cords. The plate is charge heavily with electricity, which hangs down like a bag underneath, and is rendered visible by the use of arsenious acid gas, which gives it a green color. The formation is a miniature cyclone as perfect as any started in clouds. It is funnel-shaped, and whirls around rapidly. Passing this plate over a table, the cyclone snatches up copper cents, pith ball and other objects, and scatters them on all sides.

The Island of Mauritius is the home of witchcraft. The London *Times* asserts positively that young children are frequently tortured and killed for alleged magical purposes. One Picot was tried by the British authorities and condemned to death. He coolly told his Judges that they could not hang him. Nor did they. The house of the Chief Judge was instantly haunted by spirits, who threw stones. Night after night the missiles rattled about the slats. No watchers could discover the human hands of the flesh and blood allies. Finally, "the Judge's lady was nearly frightened to death," says the *Times*, and the Judge himself pleaded for Picot's life with the Executive Council.

The German *Military Gazette* concedes that on the water Great Britain still holds first place with her armored fleet; France the second; Germany the third; Italy the fourth; Russia the fifth, and Austria the sixth. But at the present moment France is building fourteen vessels of the most powerful model and eight armored vessels for coast defence. Therefore, in four years France will have thirty war vessels, twelve of which will be of the first-class, and England thirty-two, only one of which will be of the same strength as any one of the twelve French ships. Italy is now building five first-class war vessels; Russia three and three ironclad cruisers; Germany one ironclad cruiser and two gunboats; Austria one war vessel, and Denmark one ironclad for coast defence. Consequently the maritime pre-eminence of Great Britain is decidedly menaced by France. England being obliged to employ a great portion of her fleet in the Mediterrrnean, and at different distant points, it is fair to presume that in 1887 or 1888 France would be able to oppose a fleet of forty-two armored vessels against an English one of thirty at the most, including even the vessels for coast defences.

A careful observer of the weather probability reports asks:

Why are temperatures taken in the shade? To me it seems a roundabout way of getting at the truth—an artificial mode of reaching natural results. Grain does not grow, fruit does not ripen, nor farmers work in the shade. The difference in temperature as compared with sunshine must be infinitesimal and inconstant, varying with the breadth and depth of the shade, as can be seen in a large building or tree. Those great movements in the variable belts or winds—the hot and cold waves of which you speak so often—would surely be sooner generally understood if sunshine and ground temperature were taken instead of shade.

To which a reliable meteorologist replies that, while these contentions are well founded, the temperature record is designed to show the temperature of the air. As different soils and different bodies on the same soil have different conductivities and radiate different amounts per square foot of the sun's heat, it follows that if thermometers were exposed to the free radiation from the soil or surrounding objects they would not register the actual air temperature. To give the air temperature the instrument must be so protected from radiation that it will receive no heat from bodies warmer than the air and part with none of its own heat to bodies cooler than the air. On August 9th, 1881, during a western hot spell, four thermometers in different parts of Spencer, Ind., registered 106° in the shade for five consecutive hours. But a thermometer simultaneously exposed there to the direct rays of the sun shining upon a metallic background registered 150°, and upon the roof of a woodshed registered 140°. The real temperature of the atmosphere was not above 106°. For it has been shown that if a thermometer is tied to a string and swung round the head for some minutes its reading is almost the same whether it is swung in the sunshine or in the shade.

A Sleep-Walker's Peculiar Fresk.

A young girl, a servant with Mr. Lovell, at Avon Paper Works, Linlithgow bridge, disappeared. On search being made no trace of her could be found for a considerable time. She was ultimately discovered, shortly before midnight, clinging to the turbine wheel in connection with the works, which a few minutes later would have been set in motion. To get there the girl had to walk up a tunnel from the tail race about 50 yards in length, and in which the water is always about four feet in depth. On being questioned she could give no satisfactory account of herself for the time she had been absent, nor any reason for her strange adventure, by which she had narrowly escaped from a shocking death.

Pop corn is placarded in the Crystal Palace, London, "as sold to the nobility."

A NATIONAL FAMINE.

Will It Ever Occur?—The Wonderful Experience of One Who has Solved the Bread Problem.

(American Rural Home.)

A national famine would cause the greatest disaster, and there are many who believe it will eventually occur. Still the diversities of climate, the richness of soil and the character of the country seem to proclaim the impossibility of such a calamity. But without such aids as machinery furnishes the grass and grain of the country could not be secured. With all the machinery at their disposal and the employment of every man that can be hired for such work, our farmers in the great grain-growing sections of the country almost always fail to secure their entire crop in the best possible order, simply because sufficient help cannot be secured. Take away the harvesting machinery and the farm labor of the country could scarcely care for more than a twentieth of the present average yearly crop. As a consequence fewer acres would be planted, the lesser yield would enhance the price of grain, and bread would reach a figure beyond the means of the laboring classes—in fact, become a luxury. Manufacturers of harvesting machinery have, therefore, benefited, not only the farmer, by enabling him to reap more acres of grain than he otherwise could, but all other classes through the cheapening of grain (and consequently of bread) as a result of the vast quantity produced.

There is no man in America who has contributed more to this result that Mr. C. D. Dewey, President of the Johnston Harvester Company, of Batavia, N. Y. Through his energy and ability the harvesting of grain by means of his wonderful machines has become almost an exact science, and in the accomplishment of this purpose Mr. Dewey has been an indefatigable worker. Indeed for an extended period he was so closely confined to his duties that he scarcely took time for proper rest or recreation. While in the very midst of these great labors he observed a peculiar sensation about the head which did not leave him and which he attributed to the strain of business. He also noticed that his appetite was fickle and his sleep broken, but he did not anticipate the terrible troubles which were before him and like nearly every man who is prosecuting a great work his interest in the undertaking overcame all thoughts of self. But the physical difficulties, which were slight at first, kept increasing. The little pains grew to agonies; the minor symptoms to serious calamities until at last he broke down completely and was confined to his bed for more than two months. At that time his condition was deplorable. His mind was in a nearly comatose state and his body perfectly helpless. During the entire period he did not move a pillow's length, so great was his exhaustion.

It would indeed be difficult to imagine a more helpless position than that in which Mr. Dewey then was. And yet to-day he is a picture of health and attends to his duties constantly. When asked how this had been accomplished he made answer as so many thousands of others have: "By means of Warner's Safe Cure. This great remedy, I am happy to state, has restored me to nearly the health and vigor I formerly had. It is not surprising, therefore, that I consider it a most valuable medicine, and that I cordially recommend it."

The sharp competition of the present day forces men of business far beyond their strength before they are aware. The claims of society and the family undermine the vitality of women unknown even to themselves or their friends. The end of all such taxations is sickness, pain and death. Fortunate is the one who finds the means of escape from this terrible ending before it is too late. More fortunate is the one who avoids its final stages by overcoming the first symptoms while they are yet in their beginnings and by such means as have been shown to be efficient and pure.

Sympathy for the Cook.—Mother (to married daughter)—"Why, what's the matter, Clara? What are you crying about?" Clara—"Henry is so awfully cruel (sob), he is getting worse and worse every day (sob). What do you suppose he said just now? He told me I must get rid of the cook; he couldn't stand her cooking any longer (sob). And he knows well enough that she hasn't done one bit of cooking for a fornight, and that I have done it all myself! Boo-hoo! boo-hoo-hoo!"—*Boston Transcript.*

The Venus of Milo has been partially restored during the alterations in the Paris Louvre.

A Voice from London

Repeats the oft-repeated story that Putnam's Painless Corn Extractor is the best, least harmful, most certain and prompt of all preparations ever offered for the removal of corns. Kennedy & Callard, London, Ont., writes, "Nothing ever introduced has given the satisfaction that Putnam's Painless Corn Extractor has. We recommend it." Beware of cheap or poisonous substitutes. Sold by druggists and dealers in medicine everywhere. Polson & Co., proprietors, Kingston. Always safe, harmless and sure.

The wealthiest man in Oregon is living this summer for fun in the log cabin which he used to inhabit from necessity.

What 10 Cents Will Do.

A 10 cent bottle of Polson's Nerviline will cure neuralgia or headache. A 10 cent bottle of Nerviline will cure toothache or faceache. A 10 cent sample bottle of Nerviline is sufficient to cure colds, diarrhœa, spasms, dysentery, etc. Nerviline is just the thing to cure all pains, whether internal or external. Buy a 10 cent sample bottle of Nerviline, the great pain cure. Safe, prompt and always effectual. Large bottles at any drug store, only 25 cents.

A Connecticut paper tells of a family reunion in which a father, son and grandson went on a spree together.

—Many ladies who for years had scarcely ever enjoyed the luxury of feeling well have been so renovated by the use of Lydia Pinkham's Vegetable Compound that they have triumphed over the ills flesh issaid to be heir to, and life has been crowned with added charms and fresher beauty.

Manitoba and the Northwest.

There are 373 telephones at present in use in Winnipeg.

W. Anderson, Indian Agent, has received the appointment of Coroner for the Northwest Territories.

Mr. Keerfoot, superintendent of the Cochrane sheep ranche, is homeward bound from Montana with 8,000 sheep.

Mr. G. H. Stanton is revelling in the luxury of home-grown tomatoes, the product of his own garden in the city.—*Winnipeg Free Press.*

The Stonewall *News* says: "The Northwest will have over 6,000,000 'acres' of grain for export this year." How will the acres be moved?

Lector Bellrose finished a new house on his farm at Big Lake on Thursday last. The event was celebrated by a ball in the evening, to which people travelled nine miles on foot.

Advice was received last mail of the shipment from England of the new telephones for Edmonton, St. Albert and Clove Bar, to be worked in connection with the telegraph line.

During the ten months since the last session of the Northwest Council the sum of $2,278.75 has been received for liquor permits. It takes considerable liquor for medicinal purposes in the Northwest, says the Moosejaw *News.*

Another train of twenty car loads of Montana cattle arrived from Maple Creek yesterday morning, and were unloaded at the Canadian Pacific Railway stock-yards. After 24 hours' rest they were reloaded and shipped to Chicago.

A correspondent of the *Free Press* says: "The M. & N. W. Railway Company have signified their intention to go to the town of Birtle and ask for a bonus of $40,000 from the municipality. A by-law granting this amount will be submitted and voted on the 23rd of September." The amount is a large one for a corporation of 400 or 500 inhabitants.

The detachment of mounted police at Pitt has been strengthened by the addition of eight men from headquarters, who went up on Saturday last, filling the complement of men assigned to that post.

Saskatchewan *Herald*: "Big Bear has deliberately made himself out a fraud and a liar, by still further deferring settlement on his reserve, notwithstanding his recent solemn promises. He gives no reason for it other than that he wants to see his friend Riel. He and Lucky Man have gone to Prince Albert to have a talk with the new leader of the people of that settlement."

There was a stormy meeting of the Winnipeg City Council on Monday night. The resignation of Wilson was accepted as Chairman of Finance, and he will probably be asked to resign his seat in the Council. W. G. Scott was appointed treasurer to succeed the present chamberlain, and D. S. Curry, permanent auditor. G. H. Kerr, health inspector, was suspended. A motion to suspend the city solicitor was withdrawn. He had just arrived from the east, and was present at the Council, when he denied emphatically many of the charges brought against him by the auditors, and claimed that the others could be explained satisfactorily. The matter will come before the Finance Committee this week, and a special meeting of the Council will be held immediately after. The city is greatly excited over the situation.

Samson Breaks Loose.

While at Haley, Idaho, a few days ago Cole's huge elephant, Samson, severed his chains and started to attack his keeper, who made a hasty retreat. A cage of lions stood in the way of the infuriated animal and he picked it up and hurled it to one side, killing two horses. He then struck a pile of lumber and scattered it to the winds. By this time there was a genuine furore. The circus people called on the crowd to shoot the elephant, and a lively firing began, but without appreciable effect. Finally a party of men succeeded in roping the beast and he was quieted. Thirty bullet holes were found in his hide. The damage done by him amounted to $10,000.

Vital Questions!!!!

Ask the most eminent physician

Of any school, what is the best thing in the world for quieting and allaying all irritation of the nerves, and curing all forms of nervous complaints, giving natural, childlike, refreshing sleep always?

And they will tell you unhesitatingly

"*Some form of Hops!!!*"

CHAPTER I.

Ask any or all of the most eminent physicians:

"What is the best and only remedy that can be relied on to cure all diseases of the kidneys and urinary organs; such as Bright's disease, diabetes, retention, or inability to retain urine, and all the the diseases and ailments peculiar to Women"—

"And they will tell you explicitly and emphatically" "*Buchu!!!*"

Ask the same physicians

"What is the most reliable and surest cure for all liver diseases or dyspepsia, constipation, indigestion, biliousness, malaria, fever, ague, etc.," and they will tell you:

Mandrake! or Dandelion!!!!"

Hence, when these remedies are combined with others equally valuable,

And compounded into Hop Bitters, such a wonderful and mysterious curative power is developed, which is so varied in its operations that no disease or ill health can possibly exist or resist its power, and yet it is

Harmless for the most frail woman, weakest invalid or smallest child to use.

CHAPTER II.

"Patients
"Almost dead or nearly dying"

For years, and given up by physicians, of Bright's and other kidney diseases, liver complaints, severe coughs, called consumption, have been cured.

Women gone nearly crazy!!!!!

From agony of neuralgia, nervousness, wakefulness and various diseases peculiar to women.

People drawn out of shape from excruciating pangs of rheumatism, inflammatory and chronic, or suffering from scrofula,

Erysipelas!

Saltrheum, blood poisoning, dyspepsia, indigestion, and, in fact, almost all diseases frail"

Nature is heir to

Have been cured by Hop Bitters, proof of which can be found in every neighborhood in the known world.

☞ None genuine without a bunch of green Hops on the white label. Shun all the vile, poisonous stuff with "Hop" or "Hops" in their name.

Latest from Ireland.

Ireland is likely to come more into favor this year as a coursing ground.

Mushrooms are sent from the river Liffey to England at the rate of a ton per day.

Mr. Michael Doyle, the well-known yacht builder, of Kingstown, died on the 8th August.

For the first time in four years there is a growth of mushrooms in the fields around Mote.

Recently Killashee House, the residence of Major St. Leger Moore, master of the Kildare hounds, was destroyed by fire.

The Lord Chancellor has appointed Dominick Lionel D'Arcy, of Mellford, Kilkerrins, Justice of the Peace for the county of Galway.

Thomas McCabe, of Sutton, was found lying on the railway track, near Sutton Station, on the 7th August, with his head completely severed from the trunk.

The Maharsja Sir Runo-o-deep Sing, Prime Minister of Nepaul, wears a ruby worth $100,000.

LYDIA E. PINKHAM'S
VEGETABLE COMPOUND
IS A POSITIVE CURE

For all of those Painful Complaints and Weaknesses so common to our best FEMALE POPULATION.

It will cure entirely the worst form of Female Complaints, all Ovarian troubles, Inflammation and Ulceration. Falling and Displacements, and the consequent Spinal Weakness, and is particularly adapted to the Change of Life.

It will dissolve and expel Tumors from the Uterus in an early stage of development. The tendency to Cancerous Humors there is checked very speedily by its use.

It removes Faintness, Flatulency, destroys all craving for stimulants, and relieves Weakness of the Stomach. It cures Bloating, Headache, Nervous Prostration, General Debility, Depression and Indigestion.

That feeling of Bearing Down, causing Pain, Weight and Backache, is always permanently cured by its use.

It will at all times and under all circumstances act in harmony with the laws that govern the female system.

☞ Its purpose is SOLELY for the legitimate healing of disease and the relief of pain, and that it does ALL it claims to do, thousands of ladies can gladly testify. ☜

For the cure of Kidney Complaints in either sex this remedy is unsurpassed.

Lydia E. Pinkham's Vegetable Compound is prepared at Lynn, Mass. Price $1. Six bottles for $5. *Sold by all druggists.* Sent by mail, postage paid, in form of Pills or Lozenges on receipt of price as above. Mrs. Pinkham's "Guide to Health" will be mailed free to any Lady sending stamp. Letters confidentially answered.

No family should be without Lydia E. Pinkham's Liver Pills. They cure Constipation, Biliousness and Torpidity of the Liver. 25 cents per box.

D. C. N. L. 37—84.

Woodstock College,
WOODSTOCK, ONT.

For ladies and gentlemen; terms very moderate; facilities unrivalled.
Collegiate Course, Ladies' Regular Course, Ladies' Fine Arts Course, Commercial Course, Preparatory Course. Opens September 4th, 1884.
For catalogues containing full information address
REV. N. WOLVERTON, B.A., Principal.

30 DAYS' TRIAL
DR. DYE'S
(BEFORE) (AFTER.)
ELECTRO-VOLTAIC BELT and other ELECTRIC APPLIANCES are sent on 30 Days' Trial TO MEN ONLY, YOUNG OR OLD, who are suffering from NERVOUS DEBILITY, LOST VITALITY, WASTING WEAKNESSES, and all those diseases of a PERSONAL NATURE, resulting from ABUSES and OTHER CAUSES. Speedy relief and complete restoration to HEALTH, VIGOR and MANHOOD GUARANTEED. Send at once for Illustrated Pamphlet free. Address
Voltaic Belt Co., Marshall, Mich.

WESLEYAN LADIES' COLLEGE
HAMILTON, CANADA.
Will reopen on September 2nd, 1884. It is the oldest and largest Ladies' College in the Dominion. Has over 180 graduates. The building cost $110,000 and has over 150 rooms. Faculty—Five gentlemen and twelve ladies. Music and Art specialties. Address the Principal,
A. BURNS D.D., LL.D.

I CURE FITS!
When I say cure I do not mean merely to stop them for a time and then have them return again, I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and I will cure you.
Address Dr. K. J. ROOT, 37 Pearl St., New York.

YOUNG MEN!—READ THIS.
The Voltaic Belt Co., of Marshall, Mich. offer to send their celebrated Electro-Voltaic Belt and other Electric Appliances on trial for thirty days, to men (young or old) afflicted with nervous debility, loss of vitality and manhood, and all kindred troubles. Also for rheumatism, neuralgia, paralysis and many other diseases. Complete restoration to health, vigor and manhood guaranteed. No risk is incurred as thirty days trial is allowed. Write them at once for illustrated pamphlet free.

EYE, EAR AND THROAT.
DR. G. S. RYERSON, L. R. C. P. S. E., Lecturer on the Eye, Ear and Throat Trinity Medical College, Toronto. Oculist and Aurist to the Toronto General Hospital, and Clinical Assistant Royal London Ophthalmic Hospital, Moorefield's and Central London Throat and Ear Hospital. 317 Church Street Toronto. Artificial Human Eyes.
