98% Metal

A MAXWELL is 98% metal, and the very best metal that metallurgists can specify. Pound for pound it equals the metal in any car built.

The Maxwell is made of light-weight but strong metals.

They had to be light because the mission of the Maxwell is economical transportation.

They had to be strong because the Maxwell is built to carry just as heavy a passenger load over the same roads and at the same speed as any car, despite its price or size.

Any engineer will tell you that in getting that rare combination of strength with lightness high prices must be paid for the metals.

Their use, however, repays the makers of the Maxwell in many ways because each car each day is winning friends.

To-day these friendships, expressed in terms of cars, are well on the road to 400,000.

You cannot go back of these numbers any more than you can go back of the fact that the sun rises in the morning.

They tell the story; and it's largely a story of what the Maxwell is made of—fine metals.

The Maxwell is waiting for you in our show-rooms. Come round and get behind the wheel. To-day.

A War Romance Shattered

A pitiable aftermath of a war time marriage in England has been brought to light in Wiarton, according to a despatch from that place to the Toronto Globe. Early in the war Laurence Keeshig, a member of the Cape Croker Indian band, enlisted, went overseas and was wounded while on active service. While convalescing he became acquainted with a beautiful English maiden, and later, it is said, succeeded in having her go through a form of marriage with him.

Keeshig, who is a well educated Indian, having graduated from the local high school, speaks English fluently and is possessed of a personality that would make a favorable impression.

Late Saturday evening the English girl arrived here with a babe several months old. The latter is a beautiful, happy child, and apparently shows no trace of Indian ancestry, being of a very blonde type. Keeshig met the couple at the train, and they remained at the local hotel, not being taken to his home on the Indian reserve for the reason, it is alleged, that at that point resides an Indian wife with two or three children, whom he left behind when he went overseas.

Just whrt will be the outcome of the situation cannot yet be conjectured, a the English girl is keeping her own counsel and says little or nothing to any townspeople. Her plight has aroused the sympathy of all, and any assistance that can be given her will be rendered with dispatch. So far as can be ascertained no officials of the law have been notified or received any instructions regarding the case. It is rumored that the English girl has cabled to her family, who are said to be very well to do, and it is deemed probable that she may slip quietly away without causing any trouble to her erring Indian lover.

Another scene has been enacted in connection with the romance, when Willis Keeshig, a brother of Lorne, was married in Owen Sound by Rev. T. G. McAteer, at the parsonage, to Miss Edith Mary Engall, who gave the information that she was a spinster and that her address was London, England. She was accompanied by a beautiful little six months old baby which showed absolutely no characteristics that would suggest Indian blood. Willis Keeshig gave the information that the child was adopted by Miss Engall.

But that is not all. Lorne Keeshig was arrested at Cape Croker on Friday by the Wiarton police, charged with bigamy and wife beating. His preliminary trial will be held within a few days. Just what will be the outcome of the whole affair is very hard to say. Mrs. Keeshig is evidently not very well educated, but of exceptionally good family, and may find it rather difficult to accommodate herself to the life on the Indian rerervation.

CHEVROLET

Made in Canada

You'll be surprised how little it costs to operate this Chevrotet "Four-Ninety" Touring Car. Twenty-five miles on a gallon of gasoline is not an unusual record. Tires last an unusually long time. Repairs are few and far between. Care-free, regular performance is the Chevrolet rule. Yet with all its economy and low price, Chevrotet "Four-Ninety" Touring Car is a handsome, roomy, comfortable car—a car you can be proud to own.

The more a man knows about automobiles, the more experience he himself has had with them, the more critical he is apt to be of their essential features. To satisfy this class of motorists is the chief motive of Chevrolet construction and equipment. It is to this element therefore that the convenience of operation, accessibility and equipment, the dependability and economy of the Chevrolet makes its greatest appeal.

Township Put To An Expense of $800

A despatch from Meaford says: A case that probably is without precedent in the annals of Canadian law courts has just been disposed of by Judge Sutherland in the Division Court here. R. J. Orr, a farmer residing at Fairmount, about eight miles from Meaford, sued the township of Euphrasia for the recovery of 71 cents, which he claimed to have overpaid the township collector in the way of taxes. The plaintiff, in his testimony, stated that he had been at a loss of $58.67 in trying to have the alleged error corrected. In the meautime Orr had a petition circulated alleging that the township treasurer was behind in his accounts, and asking that his books be audited by a chartered accountant. This was done, and the result was that the books were found to be correct, with the exception of a few cents. The audit cost the township $800. The judge dismissed the action with costs to the plaintiff. It is said the township council will bring action against Orr for the recovery of the amount paid for the audit.

Chatsworth business places will have a Wednesday half holiday for the next four months.

NOTICE

As it is Cream Separator season and you want the best and most reliable Separator on the market remember the De Laval was the first invented and still the leading separator. More o them in use than all other machines. Sold by

HUGH KNOTT, Agent,
Markdale, Ont,

THE MARKETS

Carefully Corrected Each Week

Butter	0 48 to 0 50
Eggs	0 45 to 0 45
Wheat	2 00 to 2 10
Peas	1 40 to 1 50
Oats	90 to 91
Barley	78 to 80

ESTABLISHED 1872

The young man who plans to save one dollar every week and will deposit it in the bank, very soon finds himself depositing two, three or five dollars a week. Before he started to save he did not realize how easily he could spare a few dollars regularly as a protection for the future.
