Rates for Telephone Service

Our rates for exchange service, fixed many years ago, developed many inequalities as between cities at one time equal in population.

In the new schedule filed with the Board of Railway Commissioners we have so grouped cities and towns of approximately equal telephone development as to wipe out these inequalities.

The rates for exchange service proposed for FLESHERTON under the new schedule are shown in the following table.

Business Service	*Proposed Monthly Rate*
Individual line	$2.75
2-Party line	2.25
Residence Service	
Individual line	$2.00
2-Party line	1.75
Rural party service	1.75

These new rates, we submit, should be considered in the light of the present purchasing power of the dollar. They compare favorably with the increased rates which telephone companies have had to secure from public service bodies all over the continent.

The commodities we have to buy—labor and material—have advanced in no lesser degree than have those staples of every day use, the cost of which has made present living expenses so high.

Feed your land with Harab-Davies Fertilizer

and you will have a bigger and better crop of

Fall Wheat

THIS is no arm-chair theory. It's a fact! Harab-Davies Fertilizer contains available plant food in the form of Ammonia, Phosphoric Acid and Potash. Fall Wheat sown with Harab-Davies Fertilizer can be sown late in order to avoid the Hessian Fly. It gives the growing plant a good root system. It promotes quick and strong top growth. It practically eliminates winter-killing. It hastens a harvest with long straw, and big, plump, meaty kernels that grade high on the market.

The Fall Wheat photo alongside was taken May 27, 1920.

In the Spring of 1919 the well-grown portion of this field was sown in oats, fertilized with Harab-Davies Fertilizer. After the oats were harvested the whole field was disked and cultivated and sown to Fall Wheat without additional fertilizer. The difference between the fertilized and unfertilized portion is amazing — and it incidentally proves that Harab-Davies Fertilizer will show results the second season.

THE BUSINESS OUTLOOK

The purchasing power of a dollar has been cut in two since 1914. With a trend toward normal prices the dollar will again be worth more. There will be great opportunities in the next few years for the man with ready capital. Be dollarwise, save and deposit regularly.

New Perfection Oil Cook Stove

Speedy—Touch a match to the burner and it is ready for use instantly, just as speedy as a gas stove.

Steady—Set the flame where you want it. You can always see it through the mica door and it stays where you set it.

Clean—Does not blacken pots and pans. The long blue chimney turns every drop of oil into cooking heat. None of it escapes in smoke or soot or disagreeable odor.

Hot—For every cooking purpose there is always an abundance of steady, clean, intense cooking heat directly against the utensil.

Oven—Glass door, will not steam or break. Three point lock device saves heat. Scientific heat circulation, all steam and moisture carried away. No soggy food.

Call and let us show them to you. Made in 2, 3 and 4 burners.
