A truck belonging to Mr. Runsdadler has a curious habit of starting off without a driver, like some horses we have known. Twice it has surprised its owner with its intelligence in this manner. The other day it was standing in front of the hotel with the engine running. All at once it pricked up its ears, as it were, and started off on its own with gear on high. It described a half circle and started off towards the station. It had gone some 200 feet before it was boarded and stopped. Some wise truck, that!

A liquor case was heard at Ceylon on Saturday afternoon, when a young man was charged with drinking liquor in an illegal place and fined $100 and costs. The young man swore that he did not know what he was drinking when offered the drink from a sealer, and he informs The Advance that such was a fact. He was offered a drink and asked what it was. The donor told him to drink it and find out. Now, if this were the case what guilt could be attached to the act? It is pretty hard lines to be soaked for an unintentional misdemeanor of this kind, if what the young man says is true, and would savor more of persecution than prosecution.

Insurance Is Good, But—

Insurance will, in a measure, repay you for loss from fire due to lightning.

But *it will not prevent the fire.*

It takes the DODD System of Lightning Protection to do that.

In the past thirty years over 300,000 buildings have been rodded by the DODD System and in not a single instance is there a record of the DODD System properly installed, having failed to prevent damage by lightning.

The fact that you haven't yet suffered loss by lightning only means that you are fortunate, not that you are proof against it. ***Ask us today what it will cost you to have DODD protection.***
