THIS REMINDS US

No doubt many of our subscribers have read the old gag about a man who crawled into a hollow log but was unaple to back out, and found himself trapped. The story goes to show that his past wicked deeds rose up before him. When he rememberd how much he owed his local paper it made him feel so small that he had no difficulty whatever in backing out.

Well, the following true incident made us think of that story: A farmer who owned a fine silo found one day last week that two of his young stock had found a door open and climbed into the silo where they filled up on ensilage to such an extent that it was impossible to get them out the door again. Here is the following expedient resorted to: Bags were tied over their heads and the animals were left there until the next day when their waist measure was reduced to such an extent that exit was made easy.

ORANGEVILLE RESIDENT PASSES IN 106th YEAR

In the passing of Joseph Snowden of Orangeville, the town lost its oldest resident. He was born in Lancanshire, England, 105 years ago. At an early age he emigrated to Canada, settling at Brampton, and for a number of years was employed in Parkmon's factory. About fifty years ago he moved to this district engaging in farming until his retirement and removal to Orangeville A son, Thomas, 75 years of age, resides in Amaranth Township, and is the only surviving member of the family of seven.

Mr. Snowden was a Conservative, and an adherent of the United church. The funeral was held this afternoon to Greenwood cemetery.

MAXWELL PUBLIC SCHOOL

4th Class — John Lougheed, Helena Long,* Annie Robertson, Bern Pallister*, John New*, Lawrence Cameron, Lorna Chard, Violet Parker,* Warren MorrisonMorrison*, Mabel Ross, Lawrence Fenwick, R. J. Udell.

Sr. 3rd — Margaret New*, Mary Long*, Mary Bemrose, John Bemrose, Ruby Robertson, Golden Udell, Gorley Blakey.

Jr. 3rd — Kathleen Morrison*, Reta Fenwick, Cecil Chard, Marjorie Seeley*, Jean Young.

Jr. 2nd — Edith Lougheed, Tillie Kerton.*

Class 1 — Marie Chard, Stella Young, Irene Parker, May Linley, Belva Long, Isabel Pallister*, Billie Kerton*, Annie Murphy, Robt Priestly, Donald Radley.

Pr. C. — Merle Buckingham* and Ethel Fenwick, equal, Lloyd Morrison, Leslie Secley, Helen Guy*, Jean Ross.

Pr. B. — Mabel Bemrose, Tommy Pallister.

Pr. A. — Jim Poole.

Those marked * were present every day. Number on roll 43. Average attendance 42.6.

HELEN MAYNARD

Hon. Chas. McCrea has announced decision of the government to take over fish hatcheries in this province which are being given up by the Dominion Government next month. The announcement followed a conference here with federal officials. The hatcheries are at Point Edward, Kenora, Collingwood, Wiarton, Port Arthur, Southampton, Belleville and Kingsville. The province already operates hatcheries at Port Arthur, Fort Francis, Kenora and Normandola. When the Dominion Government gave notice that it proposed to discontinue nine hatcheries in Ontario, vigorous representations were made the Ontario government not to let them be abandoned in view of the needs of the fishing industry, & Mr. McRea has placed an amount in the estimates this year in connection with maintenance.

FEVERSHAM

There appears to be an epidemic of Influenza all over this locality, and while there are no cases that we have heard of just now in the village ,several persons had to have the servics of Dr. Guy, and out in the country it is raging, and what with the condition of the roads and the Dr. going night and day, it is taking a great deal of patience on his part.

Mrs. F. H. Sayers spent a few days in our village last week renewing old acquaintances.

Mr. P. Robinson of Collingwood spent the week end in our village.

The teachers have again taken up their duties after the Easter holidays.

Mrs. Alex McIntyre and son, Gordon of McIntyre, visited with Mr. and Mrs. Colquette last week.

Get your implement repairs for Cockshutt plows and Frost and Wood Implements from Colquette in Feversham.

Mrs. Ern Hawton is under the Dr.'s care at present with an attack of pleurisy. We hope for a speedy recovery.

It is now the middle of April, and there are great banks of snow yet with very little bare ground to be seen anywhere This is one of the most backward seasons residents in this part ever remember of, although twenty five or thirty years ago we remember driving fourteen miles to town on the sixteen, and there was good sleighing but we were working on the land before the first of May, so keep smiling boys.

There has been no syrup of any account made in this district this spring yet, the cold winds and the deep snow preventing the sap from running.

Mr. and Mrs. Geo. Conn of Maxwell spent Sunday with the former's brother's John and Wm. here.

Mr. John Black lost a valuable horse from indigestion recently.

Mr. Will Ferguson of Carolina attended the funeral of his brother Alex. as did Jas. and Chas of the west.

Miss Eva Spencer has returned to take up her duties near Toronto after spending the holidays at her parental home here.

Mr. Alex Mullen of Rob Roy has had a sick horse in Mr. Robinson's stable here for some days. Alex came to the mill one day last week and when he turned away from the mill the horse was stricken with Arzaturia and he got him to Mr. Robinson's stable but has not been able to get him home since.

LADY BANK

Mr. Wm. Poole had the misfortune to hurt his shin one day last week while skidding logs. The whiffle tree breaking caused the accident.

Mr. and Mrs. Joe Sewell visited with Mr. and Mrs. Wm Harbottle of Duncan on Sunday of last week.

Misses Verna and Dell Roberts of Toronto are spending their Easter holidays at their parental home here.

Messrs Wm. Tyler and Gaylord Kaitting are engaged with Mr. Wm. Temple cutting wood at present.

Miss E. Allison, teacher of the No. 6 school, Osprey, is spending her holidays in Collingwood.

Sorry to have to report Mr. David McMullen not so well again.

The Ladies' Aid and members of Providence have employed Mr. Lue Lenard to do some repairing and papering to the church, and there will be special services held.

Mr. Jas. Fawcett of the town line Collingwood has been taken to the Owen Sound hospital for nerve treatment. We hope to hear soon of an improvement.

FEEDING NEW CHICKS

O. A. C. POULTRY DEPT. TELLS OF ITS METHODS.

While Very Young Chicks Should Be Fed Very Carefully After the First Three Days.

(Contributed by Ontario Department of Agriculture, Toronto.)

No feed is given the chicks until they are nearly three days old. Water may be given as a drink if the chill is taken off. The chicks for the first few weeks should be fed about six times daily at regular intervals. Give the first feed in the morning as early as the chicks can see to eat and the last at night as late as possible. If growing chicks in February one feed may be given at night, using artificial light.

We have adopted the plan for the first five or six days in the brooder, of weighing the feed. An experienced feeder may not need to weigh the feed, but the beginner generally does better by weighing it. We allow one ounce of the dry mixture for every fifty chicks at each feed, or six ounces per fifty chicks per day during the first five days in the brooder. The plan followed is to moisten the first feed with canned tomatoes, the second with eggs, and the third with minced liver, and then begin the series over again. The above amount will not satisfy the chicks' appetite. They will create a great noise at feeding time, but it gives the chick a chance to completely absorb the yolk.

After the first period one should feed two or three times each day, all the chicks will eat. We begin feeding sour milk when the chicks are about a week old. When the chicks pass the second week, sprouted grains may be fed, also a little cracked grains, tender green grass, if available, and a little grain. If leg weakness is noticed try and get the chicks outside in the direct sun for an hour or so each day, or if the weather is cloudy add two per cent. Cod Liver Oil to the mash.

Many Use Hopper.

Many people do very well in rearing chicks by using the hopper method. The hopper method as compared to, the six moist meals per day method, entails much less labor and with some people gives as good results. We have not been able to raise a high percentage of chicks on the hopper method but they do grow fairly well.

Ration for Hopper Method.

Ground yellow corn (sweet and clean), 50 pounds.
Middlings, 45 pounds.
Bran, 5 pounds.
Fine oyster shell, 5 pounds.
Fine dry salt, 1 pound.
Beef scrap, 18 pounds.

Thoroughly mix—if not well mixed the salt may do more harm than good. To each 100 pounds of the mixture should be added one pint of Cod Liver Oil. It is well not to mix the oil in the feed to far in advance of feeding, one week is the limit. If the chicks have plenty of sunlight and tender green feed the Cod Liver Oil may be omitted.

We advise the use of cut alfalfa hay of good quality, as a litter in the brooder, it should be renewed in about a week or ten days.

Feed the mast in boxes or troughs kept constantly before the chicks. Have plenty of boxes so that each chick gets a chance.

Feed each 100 chicks about three desert spoonfuls of fine chick feed, such as pinhead oatmeal nad cracked corn each day, sprinkle in the litter that the chicks may exercise.

If milk is given to drink take 75 per cent. of the beef scrap out of the ration given. If milk and water are both given then reduce the beef scrap one half.

General Advice.

It is best to rear the chicks on new ground each year, and never to brood two lots of chicks on the same ground in any one year. Many chicks are sent in for examination each year that have troubles due to land infection.

Keep the feed boards clean, move them a little each day or better every feed, that the ground may be sweet and clean. Grit is always in easy access of the chicks. ItI is advisable and necessary to add a little oyster shell dust or fine particles to the ration daily. A certain amount of lime is necessary.

Mouldy feeds, dirty feed boards, and musty litter are to be avoided. Moulds kill large numbers of chicks.

As the chicks get older the number of feeds per day may be reduced, so that at an age of seven weeks three or four feeds per day are sufficient; in fact, after the second week hoppers of crushed oats or dry mash may be placed in the pen where the moist mash system is used. The feeds of moist mash being continued in what ever amount the chicks will clean up. — Poultry Dept., O. A. College.

Successful Brooding.

Successful brooding can be summed up under five headings:

1. Proper heat without drafts.
2. Careful and regular feeding, without sudden changes, ration to include milk in some form, and green stuff. Avoid over feeding.
3. Get chicks on the ground and in the sun as soon as possible. Cut a sod and put it in the pen if the weather is cold and wet. Use a window in the brooder house that will permit the passage of ultra violet light rays (one of the glass cloth preparations).
4. Avoid overcrowding.
5. Sanitary surroundings, clean dry litter. Clean water fountain, clean feed dishes.
6. When weather is cloudy or if rearing chicks very early in the season, add two per cent. Cod Liver Oil to the mash.

Sunlight and the Chick.

Exposure to sunlight and contact with the bare ground, are outstanding factors in controlling leg weakness. These two factors with plenty of exercise aid in controlling toe pecking, cannibalism, and other evils that follow idleness and overcrowding.

CARD OF THANKS

We desire to express our sincere thanks to our neighbors for their kindness during the illness and death of Miss Elizabeth Wood.—The Family.

CHEVROLET

Thousands of testimonials!

In 1925

CHEVROLET had its greatest year. During that time literally thousands of testimonial letters were received from satisfied Chevrolet owners—a tremendous avalanche of evidence that the public possesses a genuine appreciation of the car and its performance.

In 1926

New Low Prices

Chevrolet offers even greater values than before. With its never-failing standard of quality and the new LOWER prices, Chevrolet is demonstrating to the public, in greater degree than ever, its policy of

"QUALITY AT LOW COST".
