I Am Not Responsible—

—For the advice that people take, but for the advice that I give.

—For what people believe about me, but for what I give them reason to believe.

—For my misfortunes, but for my attitude toward them.

—For the scandal that comes to me, but for that which I repeat.

—For the high prices, but for my high living.

—For my ancestry, but I have a responsibility to my descendants.

—For all the rubbish that is printed, but for that which I buy.

World's Biggest Book.

Measuring 5 ft. 10 ins. high by 3 ft. 2 ins. across, a volume of maps, presented to Charles II. by the Amsterdam merchants in 1660, is preserved in the British Museum. It is moved about on a trolley.

Loves Waist She Used to Hate!

Never discard a garment because you don't like its color. Nor because it's dull or faded. In less than an hour, you can make it a brand new, fashionable shade!

Home dyeing lets you dress better, and have the nicest home furnishings, without spending a lot of money. It's easy to dye anything—right over other colors—but whether dyeing or tinting, be sure to use *real* dye. Always ask for Diamond dyes; they give full rich colors, and true tints.

FREE at your drugstore, now: the Diamond Dye Cyclopedia; full of suggestions and complete easy directions. See actual piece-goods color samples. Or write for big illustrated book Color Craft — free — address DIAMOND DYES, Dept. N5, Windsor, Ont.

OWL-LAFFS

BY
O. W. L.
(Os With Laughter)

Many a self-made man is a personal demonstration of the horrors of unskilled labor.

At last someone has been found that believes in signs. He is a sign painter.

What's become of the old-fashioned preacher who believed that a sermon to be big had to be long?

Then and Now.

The bathing girls in days of yore
Were dressed like Mother Hubbard,
But now they oft array themselves
Like Mother Hubbard's cupboard.

Money is good. He married her for her own good.

The Difference.

The boy was asked to tell the difference between a biography and an autobiography. "A biography," he wrote in reply, "is the history of the life of a man. A naughty biography is the history of the life of a lady."

Folks who are snappy make others unhappy.

This would be a far happier world were it so arranged that one could run out of debt.

Imagine the plight of a man being shaved by a lady barber when a mouse runs across the floor.

"Why hasn't she made a rich marriage if her face is her fortune?"

"Poor girl, she has a tongue that is her misfortune."

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with griping pains; is seized, with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandry. What is to be done on such occasions? As often as not there is no a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Checkers.

"Life is like a game of checkers,"
Said a wise one long ago,
"Life is like a game of checkers,
I have played it and I know."

There is comfort in this adage
When the Worry Kings stand fast,
Massed by fate against all wisdom,
No moves count so as the last.

Final moves count most, find courage,
Let the lost years bear their sorrow,
Fighting ever with new hope,
Victory may be yours to-morrow.

—George Elliston.

Tit for Tat.

A woman in a crowded church spoke to someone in a pew. "Pardon me, but you are occupewing my pie."

The seated one said: "Excuse me, but I was sown into this sheat."

A mob has many heads but few brains—usually none at all.

REFUSED LIFE INSURANCE BECAUSE OF KIDNEY TROUBLE

The experience of this gentleman of Albany, N.Y., may be of great value to you, if you have been refused life insurance, as he was.

"Overwork undermined my constitution. I paid little attention to the matter until I failed to secure a life insurance policy. I consulted the doctor who had examined me and then I learned of my disease.

"Friends brought to my attention Warner's Safe Kidney and Liver Remedy. A slight improvement was noted immediately on taking the first bottle. Improvement continued. My life insurance was granted me and I feel I owe my health to Warner's Safe Kidney and Liver Remedy." (Name on request).

Sold by all druggists. Price $1.25 per bottle.

Warner's Safe Remedies Co., Toronto, Ont.

Trappers Overtake Swift Deer

Many tales have drifted down from the north of how men have overtaken and captured wolves, deer and other swift-footed inhabitants of the woods of Ontario and Quebec. Readers of such have often been skeptical but the above photograph, taken only a short distance from the Canadian Pacific lines in the Laurentian Mountains, proves such a thing is possible, in the case of deer at least. Heavy snow, as can be seen, accounts for this and in the pictures above several trappers on snowshoes have succeeded in capturing two animals in question. The deer looking placidly into the camera was no doubt caught only after an exhausting chase through the deep drifts. The little doe that seems to be just an armful for the trapper, will doubtless be admired in a short time by thousands of people in some city park. Trappers in the northern sections of Ontario and Quebec have saved many of these young animals from death by freeing them from heavy drifts of snow, and thus keeping them from packs of hungry wolves.

Treatment of Measles.

Measles, like the other eruptive diseases of childhood, is what is called a self-limited disease; that is to say, it usually runs a definite course and at the end of a certain period terminates in recovery. It cannot be cut short by any known remedy, though doubtless some serum or vaccine will eventually be discovered by means of which it can possibly be prevented, or possibly cured if taken at the very start. The treatment is therefore one of watchful waiting—expectant treatment, as it is called by the doctors. Whatever is done is with the object of making the child as comfortable as possible, at the same time carefully watching for any complication in order to attack it at once before irreparable harm is done.

As soon as the trouble is diagnosed, or even suspected, the patient should be placed in a room where a plentiful supply of fresh air from the open window can be obtained while the room itself is warm and free from drafts. A large open fire is ideal, as it insures good ventilation while it warms the atmosphere. The patient must be well covered and warm in bed, but not to the overheated point. During the height of the fever very light covering will suffice, but later, when the fever has disappeared, the temperature may become subnormal and then the patient will feel cold. Rather than pile on many blankets it will be better to put on a woolen robe over the cotton or linen nightgown.

Sponging with hot water several times a day will be comforting and will bring out the rash if there is a tendency for it to delay. The best food during the fever is milk diluted with lime water. The mouth must be kept clean by swabbing with some antiseptic fluid. The chief anxiety of the doctor is to prevent the occurrence of catarrhal laryngitis or bronchitis or broncho-pneumonia. There is danger also of ear trouble; and if the child is seen to put the hand often to the ear, or if he seems to be in pain, the doctor's attention should be called to it at once. There is almost always more or less inflammation of the eyes, which can usually be relieved by drops of boric acid solution and camphor water. The glare of the sunlight should be shut out and the bed so placed that the patient does not face the light. In favorable cases measles last only about a week, but it is wise to keep the child in bed for another week in order to prevent any of the unpleasant and dangerous catarrhal complications.

Don't let indigestion after meals, biliousness, heartburn, or dyspepsia take the pep out of you. Take Seigel's Syrup. Any drug store.

The Palace.

In the greenest of our valleys
By good angels tenanted,
Once a fair and stately palace—
Radiant palace—reared its head.
In the monarch Thought's dominion—
It stood there!
Never seraph spread a pinion
Over fabric half so fair!

Banners yellow, glorious, golden,
On its roof did float and flow,
(This—all this—was in the olden
Time long ago,)
And every gentle air that dallied,
In that sweet day,
Along the ramparts plumed and pallid,
A winged odour went away. . . .

And all with pearl and ruby glowing
Was the fair palace door,
Through which came flowing, flowing, flowing,
And sparkling evermore,
A troop of Echoes, whose sweet duty
Was but to sing,
In voices of surpassing beauty,
The wit and wisdom of their king.

—Poe.

Fogs and Clouds.

A fog is a cloud on the earth, and a cloud is a fog in the sky, according to Dr. W. J. Humphreys, of the United States weather bureau.

Kill warts with Minard's Liniment.

THIS SPRING TIME IS TONIC TIME

Something is Needed to Quickly Improve Your Health.

With the passing of winter many people feel weak, depressed and easily tired. There is no particular disease, but the system lacks tone. You find yourself tired, low-spirited, often unable to get sound sleep at night. All this is the result of closer in-door confinement of the winter months, and shows that the blood has become thin and watery. New, rich, red blood is what you need to put you right and there is no other tonic medicine can give you this new, rich blood as surely and as speedily as Dr. Williams' Pink Pills. This new blood goes to every part of the body and quickly improves the general health. The digestion is toned up, and you have better appetite, the nerves are strengthened and sleep is refreshing. The special value of Dr. Williams' Pink Pills at this season is shown by the statement of Mrs. Elizabeth Clarke, R.R. No. 1, Hastings, Ont., who says:—"I know Dr. Williams' Pink Pills are a great blood builder because I use them in the spring, when one naturally feels run-down after our long winter. Last spring, I was feeling weak and easily tired, and again used the pills with the result that I have had splendid health since. The pills also restored my daughter, Mae, who was badly run-down, and seemed almost bloodless. She used the pills faithfully for a time and has since enjoyed the best of health. Naturally I never hesitate to recommend Dr. Williams' Pink Pills to people who are run-down."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams Medicine Co., Borckville, Ont.

Conundrums.

Why is the letter H like a cure for deafness? Because it makes ear hear.

—When does a tailor serve his customers ill? When he gives them fits.

—Where are balls and routs supplied gratis? On the field of battle.

—When may a chair be said to dislike you? When it can't bear you.

—When is coffee like the earth? When it is ground.

—The best thing out—a conflagration.

—What part of speech is most distasteful to lovers? The third person.

"We have it in our power," said Sir W. Arbuthnot Lane, the famous surgeon, recently, "to keep our bodies so healthy and clean that they are able to resist entirely such diseases as rheumatism and gout."

Toxoid and the Prevention of Diphtheria.

For centuries diphtheria has taken its toll of lives and left countless thousands handicapped by its after-effects. Thirty years ago this dread malady was yearly claiming 90 deaths for every 100,000 people in Ontario. "I have seen too many little children choke to death, or fade out under the poisons of this terrible malady, to think calmly about the medical helplessness of that awful time," says Dr. Royal S. Copeland. In 1925 the death rate meant a loss of 8 deaths per 100,000 of our population. And this in spite of the fact that the number of cases suffering from the disease was practically the same for both years.

How was it possible to save so many lives? The answer lies in the fact that a specific cure—anti-toxin—was discovered in 1890 and the victims of the disease in Ontario have, during the last few years, been given this treatment early in the disease. Our parents have learned the wisdom of calling the doctor at once if a child shows symptoms of diphtheria. The discovery of anti-toxin is one of the greatest advances in medical science the world has ever known.

Following the discovery of a cure, has come within the last few years the perfection of a preventive. Inoculation of a child by Toxoid (two doses of 8 drops each into the skin of the arm) given four weeks apart, means that the child will not contract diphtheria. Thousands of children throughout Ontario have been given this protection within the last three years; thousands of parents have been relieved from worry and anxiety as a consequence, and hundreds of children have been saved from the tragic aftermath of diphtheria, damaged hearts particularly, and even from death itself.

With Toxoid to prevent it and anti-toxin to cure it (both supplied free to physicians by the Department of Health), no child in Ontario need contract diphtheria—much less die from it. A death from diphtheria is unnecessary, preventable, and sufficient matter for official investigation.

How to Boil Fruit Jelly.

After preparing the juice and sugar, put it in the preserving pan over a gas stove or fire, and stir until the sugar is dissolved. Then bring to the boil and let it boil quickly for 25 minutes, removing the scum as it rises. Then take it off the fire. If it is allowed to boil slowly, or longer than the 25 minutes, the ingredients will return to the original consistency and will never jelly.

For distemper—Minard's Liniment.

Origin of Illustrous Men.

Columbus was the son of a weaver. Shakespeare was the son of a wool-sampler. The father of Burns was a plowman, and Burns himself was known as the "plowboy." The great Cardinal Wolsey's father was a butcher. Benjamin Franklin was the son of a tallow-chandler. John Jacob Astor was an apple-pedler. Oliver Cromwell's father was a brewer. Bishop Hall's father was a poor farmer, and the famous Whitfield's father kept a small tavern.

Apparently China interprets the "white man's burden" as the burden of the white man.
