Canada's Oldest Exhibition

The Silver Jubilee of the Western Fair, London, September 8 to 17, is going to be the best in the Association's history and will be formally opened by Sir Oliver Mowat, Lieutenant-Governor of Ontario, and in all likelihood the Governor General and Lady Aberdeen will give the Western Fair a visit before retiring from office. Such are the expectations at present, and will be fully made known on receipt of their acceptance.

Applications for space are being made at such a rate that several departments are nearly full already, and the general impression throughout Western Ontario is that with the good crops now being harvested, the farmers and their families will turn out en masse to get a much needed rest and support the fair, which they have been largely the means of bringing to the proud position it now holds of being the most successful in the Dominion to day.

Its immense growth has caused the directors no end of trouble in the past, providing proper accommodation for the Live Stock and Agricultural Implements in particular, and every other department in general. The additional box stalls, the extension to the carriage building, and the annex to the main building for art, will assist them in supplying the wants of the numerous exhibitors, and giving them buildings equal to the best.

The entries close Sept. 7th, but as the space and stabling will be allotted in the order the entries are received, it behoves intending exhibitors to make them as early as possible, and secure the choice positions. Write the Secretary, Mr. Thos. A Browne, for information, prize lists, programmes, etc.

The attractions, which have always been entertaining, are to be even more so this year. The Royal Canadian Dragoons will give exhibitions of fancy drill, sword combats, etc. Prince O'Kabe's Japs (10 in number) have been secured. The Watson Sister's Triangular Electrical Trapeze, Webb and Hassan, the Marians, Burk and Andrews, with their Texas mule, the Gregory Combination, and others to be supplied by Sie Hassan Ben Ali, who is now in Morocco selecting something of a very high order. Each evening there will be the grandest pyrotechnic display ever given in London, together with the realistic representation of the "Blowing up of the Maine," assisted by all of the ring and stage attractions. As special excursion trains leaving London after 10 o'clock each evening are being arranged with the railway companies, it is expected that a very large numbers will remain for the fireworks.

On Friday the barn of coun. Patrick shaw, of Proton, on the 10th con. of that township, caught fire from a spark from the chimney of the house and was destroyed. We understand there was no insurance on account of the house and barn being so close together, no company would take the risk.—Representative.

S. L. M. Luke, the journalistic tourist, struck Shelburne about noon on Saturday. He had no sooner got inside the corporation limits than he was spotted by a constable and questioned closely about his connection with the Woodbridge and Orangeville burglary. Luke satisfied the minion of the law that he had not yet descended so low as to rob grocery stores and hotels and was allowed to go. He left in the afternoon for Proton township.—Shelburne Free Press.

Breeders and dealers say that high class horses are as high now as they have ever been because of their scarcity. The American Government pays $125 for cavalry and artillery horses, and exporters pay about the same price. Choice to fancy coachers and drivers sell in the United States for $200 to $500 and extra drafters up to $300, but common, small horses are cheaper than ever before. Thus, while the poorer horses are cheaper than ever before, the horse of superior quality commands a high price. Breed good horses and the price will be good.

A horse with a terrible injury is to be seen in Dr. Tanner's infirmary. A great hole, which would probably hold four or five pounds of flesh and bone, has in some way been gouged out of the poor brute's head from between the eyes well down to the nostrils. The animal eats well and is doing all right, but whether the monster wound will heal up or not is doubtful. The horse belongs to Ed. Robinson of Luther, and was found in the pasture field in its present condition, but how the wound was inflicted is hard to say, it being surmised that the animal ran against a stake, limb of a tree or some such object.—Representative.

The toad is beneficial to the farmer and gardener. Eleven per cent. of its food is composed of insects and spiders, beneficial or indirectly helpful to man, and eighty per cent. of insects and other animals directly injurious to cultivated crops, or in other ways obnoxious to man. The enemies of the toad are hawks, owls and, worst of all, small boys, who stone and kill many of them. There have been excellent laws enacted to protect insectivorous birds. Why should there not be as stringent legislation against the destruction of toads?

CURES THE WORLD

Rheumatism Banished Like Magic.

A Marvellous Statement—Relief from One Dose.

Mr. E. W. Sherman, proprietor of the Sherman House, Morrisburg, Ont. is known by thousands of Canadians, hence the following statement from Mr. Sherman will be read with great interest and pleasure. "I have been cured of rheumatism of ten years' standing in three days. One bottle of SOUTH AMERICAN RHEUMATIC CURE performed this most remarkable cure. The effects of the first dose of South American Rheumatic Cure were truly wonderful. I have only taken one bottle of the remedy, and now haven't any sign of rheumatism in my system. It did me more good than all the doctoring I ever did in my life."—26.
