Port Law

From Our Own Correspondent

The harvest of 1900 has been gathered in and farmers are enabled to arrive at an approximate estimate of returns for their year's hard labor. Crops of all kinds are light, and perhaps will not be more than 50 per cent. of an average crop. However, although there is not the abundance of last year, there will be no want for man or beast, and we must be thankful for small mercies "and fondly hope for more."

Heart Humbug

It is fashionable to-day to have a new heart scare every 24 hours. The commonest symptoms of dyspepsia or nerve trouble, such as palpitation, weak spells, loss of appetite, and poor circulation, are magnified and distorted into serious signs of heart trouble, with the object of frightening the public into taking this or that heart remedy. If a hundredth part of the heart trouble we hear about were real, the cemeteries would be filled in a month. A wrong construction is put upon common ailments in order to humbug the people into the belief that heart disease is prevalent, whereas real heart trouble, which is so sadly and suddenly fatal when it does occur, is a rare disease. Lopsided arguments cannot convince an intelligent people. Iron is the vital element of the blood. Too little iron means weakness, lack of spirit, pallid cheeks, shortness of breath, sleeplessness, nervousness, loss of vital force, ending in general break-down. The iron in Dr. Ward's Blood and Nerve Pills is in the soluble form you need, in combination with other curative agents in such a manner that disease can't resist their action. You feel yourself getting well when you take Dr. Ward's Blood and Nerve Pills.
