STAMMERING CORRECTED, HELPful booklet giving full information. Write today. W. Dennison, 150 Carlton Street, Toronto.

What Science ★ Is Doing ★

WEATHER HAS A "ROOF"

A "roof" for the weather, discovered just under the stratosphere, was described to the fourth International Congress for Applied Mechanics at Cambridge, Mass.

The roof is made of huge streaks of air, shaped like fishhooks. One hook may be a third the breadth of the United States. Twenty or thirty of them may be detected on one day, roofing the United States from the Rockies to the Atlantic.

On special maps they resemble a mass of snakes, partly coiled. They appear to be the controls for the mixing bowl beneath them, the whirls of air which are "lows" or storms, when revolving in one direction, and "highs" or fair, in the other.

Their detection and their part in making the weather was reported by Dr. C. G. A. Rossby, of Massachusetts Institute of Technology. They were found by airplanes and weather sounding balloons.

"DEATH IS PEACEFUL"

We speak of the shadow of death, because we fear it as a darkness stabbed with pain. Yet there is one thing that no one ever seems to bother to point out for our comfort; and it is this:

That all the medical evidence points to death, not as an agony, but as a painless passing from consciousness to the last equivalent of sleep.

Did you ever read Dr. Alexis Carrel's "Man, the Unknown?" Dr. Carrel explains that death is not instantaneous. It consists of two stages: general death, or the death of the individual, and local death, or the death of the organs. General death takes place with the last beat of the heart. At this point, personality ceases and the man is biologically dead. But each organ dies at its own rate. The kidneys, for instance, can live on for more than an hour.

MEASURES VITAMIN "A"

Invention of a device which determines the Vitamin A content in the human system in 30 seconds is claimed by Dr. Lionel Bradley Pett, 28-year-old University of Alberta lecturer-scientist.

Lack of the vitamin is related closely to "night blindness," colds and other diseases of the nose and throat.

The device, simple in appearance but actually mathematically involved in its construction, outwardly resembles a circus midway "penny peep" machine. Staring into the peep-tubes, a patient's eyes are dazzled by a strong light shining on white paper.

The length of time taken for the eyes to return to normal shows any deficiency in Vitamin A content.

ARMS USELESS ON A WET DAY

Rheumatic Pains Relieved by Kruschen

Here is a noteworthy instance of the manner in which damp weather can affect the joints of one who is subject to rheumatic pains.

"I had been suffering from rheumatism very badly," a man writes, "and had such pains in my joints that I could hardly bear it, on a wet day especially. It pained me terribly to use my arms, and I was hardly able to work. I tried two different remedies, but I was still as bad after the treatment.

"Then I was told to try Kruschen Salts, which quickly brought relief. So of course I have kept on with it, and I am now much better and have never felt so fit for years. I used to feel so miserable and sluggish, but now it is a pleasure to be able to work."—S.B.

The pains and stiffness of rheumatism are often caused by uric acid crystals in the muscles and joints. The numerous salts in Kruschen assist in stimulating the internal organs to healthy, regular activity, and help them to eliminate excess uric acid.

Blue Coal Appointments

HENRY S. GAGE

HAROLD VERMILYEA

It is with considerable interest that the coal industry received recent news of the appointment of Henry S. Gage, Sales Agent of the D. L. & W. Coal Company in Western New York and Ontario, to an executive position in the head office of that company in New York City.

Harold Vermilyea, who was formerly a representative in Ontario, has been appointed Sales Manager for Western New York and Ontario in his place. Mr. Vermilyea is widely known throughout Ontario and although regretting the departure of Mr. Gage, his return will be welcomed by coal trade throughout this territory.

HAVE YOU HEARD

THE LITTLE THINGS

It takes a little muscle, and it takes
a little grit,
A little true ambition, with a little
bit of wit;
It's not the biggest things that
count, and make the biggest
show;
It's the little things that people do,
that make this old world go.
A little bit of smiling, and a little
sunny chat,
A little bit of courage, to a comrade
slipping back;
It's not the biggest things that
people do, that makes this old
world go.
It takes a kindly action, and it
takes a word of cheer,
To fill a life with sunshine, and to
drive away a tear,
Great things are not the biggest
things, that make the biggest
show;
It's the little things that people do,
that makes this old world go!

The anxiously expectant father had been pacing the room, nervously, biting his nails, when the nurse appeared with the news that he had a baby daughter.

"Thank God, it's a girl," said the father. "She'll never have to go through what I have!"

READ IT OR NOT

Piano tuning has been found a suitable craft for the blind.

New Books: (Politics and Financial) "How to Skin Friends and Bamboozle People."

Cora — "I never knew Jones had twins."

Dora — "My dear! He married a telephone girl, and, of course, she gave him the wrong number."

When it comes to pass that the town isn't overflowing with friendly, genial, fast-talking fellows with a fist-full of cards, an arm full of posters, enough promises to fill a volume, it's a pretty good guess the election is over.

The world has now divided itself into two classes of people; those who get jobs and those who have influential relatives.

Minister — "Mr. Zeigler, I never see you at my church. Don't you ever attend a place of worship?"

Zeigler — "Yes sir. I'm on my way to her house now."

By hard work and close application we may in the next few years get back to where we were ten years ago.

Blondine — "Did you go to the circus?"

Brunetta — "Yes, and I am certainly glad of it."

Blondine — Why?"

Brunetta — "Because ever since I saw the hippopotamus I have been better satisfied with my own shape."

Civilization has developed to the point where a trip around the world hardly gives a man time enough to grow a beard on the way.

Sue — "I'm just temperamental."

Joe — "Yes, 98 per cent. temper and 2 per cent. mental.

Motorists in British Malaya now have no fuel taxes, insurance, or driver's license to care for since the introduction of the tax of $25 a year on automobiles, which covers everything.

Issue No. 41—'38

Scottish Farmers' Canadian Visit

Interested in Breeding of Cattle And Draught Horse Stock

A group of Scottish farmers and their wives and families will visit Canada in November.

It is not known at present how many will be in the party but they will arrive in Montreal November 12 in the Canadian Pacific liner Duchess of Atholl, and will spend a fortnight in Canada. Ten days of this period will be spent in Toronto, from November 13 to 23. They will spend Saturday, November 12, in Montreal.

The tour has been organized by the Ayrshire Cattle Herd Book Society and the Clydesdale Horse Society, two notable Scottish organizations devoted to breeding of cattle and draught horse stock.

Town Clerk Finds Owner of Teeth

Walter Hawkins, Port Stanley (Ont.) municipal clerk, is called on for many unusual requests, and to give assistance on problems, but none has been more curious than the recent successful case of the missing false teeth.

During the summer a Port Stanley resident found the teeth at the water's edge on the main bathing beach, and turned them over to Mr. Hawkins. In turn, he watched the lost and found newspaper advertisements appearing in the daily papers, and posted a notice on the municipal bulletin board.

Now he has learned that a summer visitor had lost his plate and accordingly sent the missing item to the owner, a resident of Detroit, who discovered that the welfare of the tourists is considered highly important here.

Today's Changes In Hospitality

Modern Hostess Sets Fresh Rules—More Casual Treatment of Guests Is Seen

Hospitality—like most things—has undergone some changes in the last few years. Once to be hospitable meant to urge a guest to come, urge him to eat (or drink) too much, urge him to stay longer than he should, and keep him at the door while he was urged to come back.

Today, modern hostesses realize all that is a strain—even more of a strain on the guest than on the hostess. So women have started treating guests more casually. Not, mind you, in the affected "Why in the world did you turn up, but now that you are here we'll make the best of it" manner of the people who mistake rudeness for sophistication. But in the manner of real friendliness that means "If you can come we want you. If you can't we'll understand." And then, once the guest arrives, lets him do about as he pleases. And lets him go without argument when he says he must ...

Real Friendliness Shown

Today's hostess doesn't let talk turn to gossip—or monopolize the conversation herself. Neither she nor the host outshines the guests—no matter how easy that might be.

You go to her house feeling that she wants you because you are YOU. You never feel while you are there that she has gone to too much trouble (though she has, of course) and you leave without feeling apologetic for not staying longer.

World's Finest Ski Instructor

Second Only to Hans Schneider Is coming to Gray Rocks Inn, St. Jovite, Quebec—Will Establish Famous Hans Falkner Ski School There.

One of the greatest forward steps in the promotion of ski-ing in Canada and the United States, both for beginners and for those who already consider themselves experts, is the transfer of the famous Hans Falkner Ski School from Ober-Gurgl, Austria, to Gray Rocks Inn, St. Jovite, Province of Quebec. Falkner is probably the most outstanding ski instructor in the world today, with the possible exception of Hans Schneider, and he brings with him to Canada several of the teachers who have been associated with him in his work at Ober-Gurgl.

The establishing of the Hans Falkner Ski School in the Province of Quebec should be of great interest to skiers in Eastern Canada and the Eastern section of the United States. Falkner, himself, is an international figure, who will be remembered by many as the man who rescued Prof. A. Picard and his stratosphere balloon from a crevasse in the Ober-Gurgl glacier in May, 1931.

The Londonderry Cup

Among the prominent people attending the ski school at Ober-Gurgl were Ishbel MacDonald, daughter of the former Prime Minister of Great Britain, and the Marquess and Marchioness of Londonderry. The two latter guests were so pleased with the spirit and attractions of the school that the Marquess donated a large silver cup to be yearly given to the winner of an international ski race organized and directed by Hans Falkner. These races were to be open to ski experts, amateur and professional, from any portion of the world. This race was to be designated as the Londonderry Race.

Before Falkner's arrival in Canada he was promised by Lord and Lady Londonderry every co-operation possible and was also given the right to establish in Canada an international race with the Londonderry Trophy as a prize.

Canada and Jamaica

Flour, cornmeal, oats, wheat, ham, pickled pork, condensed milk leaf tobacco and potatoes were the principal agricultural exports from Canada to Jamaica in 1937, when the total of all Canadian exports amounted to considerably more than four and a half million dollars. As in former years, Canada was the largest individual supplier to Jamaica of goods classed as food, drink, and tobacco.

Ate His Shoes

By eating a pair of sandals, a peasant of Demir Dree, Turkey, has won a bet of one Turkish pound (80c). He mixed butter with the sandals, which he had torn into pieces and fried for half an hour.

Wolves Attack Browsing Herd

Situation Becoming Serious in Bruce County As Pack of Nine Wolves Seen Together

LUCKNOW. — David Carruthers had a 1,200 lb. steer killed last week by wolves in Kinloss Township. The animal was pastured on the McGillivray farm, near the Carruthers' farm. Hearing a commotion, Mr. Carruthers investigated but found nothing except the herd running fast, but the next morning he made the discovery. It was evident that the animal had been attacked on the throat and countless places on the body.

The situation is regarded as serious as one report states that nine wolves were seen chasing a deer recently. Those in the Holyrood area who have had animals destroyed are Richard Elliott, three sheep, also William Statters and William Thompson's have been attacked.

During a storm at Brusa, Anatolia, millions of dead frogs rained from the sky, their bodies being found over an area of several square miles.
