BLOOD POISON

For over thirty years we have treated and cured all forms of Blood diseases, both hereditary and acquired. Our New Method Treatment is original with ourselves, and never fails to eradicate the poison from the system. Beware of mercury and other mineral poisons, which so many doctors prescribe for this terrible disease, as they will ruin the system. Other treatments drive the poison into the system, whereas our treatment destroys the virus or poison in the blood and removes it from the system entirely, so the symptoms can never return. If you have any of the following symptoms consult us before it is too late: Blotches, eruptions or pimples; falling out of the hair, itchiness of the skin, stiffness or pains in the joints, soreness in the muscles, sore throat, ulcers or bad taste in the mouth, sore tongue, sourness of the stomach, enlarged glands, running sores, etc.

Our New Method Treatment will purify the blood, heal up the sores, remove all pains; the hair will grow in again, all organs will be restored to their normal condition, and the patient prepared to renew the duties and pleasures of life. We guarantee marriage possible with absolute safety.

CURES GUARANTEED OR NO PAY

We treat and cure Varicocele, Nervous Debility, Stricture, Gleet, Blood Poison, Urinary Drains and Losses, Kidney and Bladder Diseases.

Give the Boys a Chance

Now that vtcation is at an end, this paper renews its entreaty to fairly well-to-do parents to give their sons a college education, even if their daughters cannot then be sent to an academy. Give the boys the prference. They are the future bread winners, they are more exposed to temptation, they are out in the world to influence it—therefore they need education more than the girls do.

The book called "Who's Who" gives a list of 7852 men who have risen to distinction in this country. Of them 31 had no schooling in boyhood, 808 had a common school training, 1245 went through high school and 5768 were college graduates.

From these facts it appears:

1st. That an uneducated child has one chance in 150,000 of attaining distinction as a factor in the progress of the age.

2nd. That the common school will increase his chances nearly four times.

3rd. That high scool training will increase the chances of the common school boy twenty-three times, giving him 87 times the chance of the uneducated.

4th. That a college education increases the chances of the high school boy 9 times and giving 219 times the chance the common scoool boy, and more than 800 times the chance of the untrained.

Too many young men fill subordinate positions, because they have not been educated for anything higher. Don't keep your sons down—give them a chance; send them to college.—Exchange
