OF SPECIAL INTEREST TO MEN

IN TAILOR-MADE CLOTHING.

A saving of $2.50 to $4.00 on your new Fall Suit Owing to the Finlay Smith fire in Montreal we were able to secure from the Insurance Companies a very large stock of Fancy Worsteds, Scotch Tweeds, Clay Worsteds, Venetians and Serges at a very low rate on the dollar, hence the reason we are able to save you from $2.50 to $4 on your new Fall Suit. The following partially tells the tale :

In fancy Worsteds and Blue Worsted Serges we are offering a suit that would cost you $15.50 to $16 in the ordinary way for . 12.75

In Scotch Tweeds, Fine Worsteds and Clay Twills we are offering you a suit that would be reasonably priced at $17.50 to 18 for 14.50

In extra fine qualities of fine Worsted Scotch and Irish Twill, colors black, blue and dark grey, we are offering a suit regularly priced at $20 to $24 at 17.50 to..$19

Remember, we specially invite inspection, no need to buy. Best of Trimmings, always a guaranteed fit with choice of tailors.

Cylinder Oil	Lanterns

Have you all the dishes you need for threshing time? Our China stock is full and complete in all household lines.

The Value of Agricultural Fairs.

It is a self-evident proposition that agricultural fairs which receive grants of public money should give the public something of value therefor. It is not the province of governments in these days to assist in providing amusement for the people. A good many agricultural societies are now making an earnest effort to improve their fairs by the introduction of educational features, and their example is being followed by the large exhibitions which do not ordinarily receive legislative grants. There are still some fairs controlled largely by the business men of the towns, which seem to be held for the purpose of attracting visitors who will prove good customers, but the number is fortunately becoming few. It is now generally recognized that shows exist primarily for the purpose of improving agricultural conditions.

TEACHING MARKET REQUIREMENTS.—The up-to-date fair secures the services of expert judges, who explain the reasons for their decisions in the ring and give addresses on the best types of horses, cattle, sheep and swine. In this way the judging may be made an education feature instead of merely an allotment of premiums by men who are often incompetent or biased in their judgment. The awarding of prizes at a fair is a comparatively unimportant matter as compared with other considerations. What is really desirable is that fairs should be the means of disseminating information and of fixing correct ideas in the minds of those who are producing foodstuffs and on whom the prosperity of Canada depends. Desirable and undesirable types of fowls may be shown, with lectures on the fattening of chickens for the British and domestic markets and exhibitions of killing, plucking and packing for export. A model poultry house, with incubators, brooders, fattening crates and other appliances, interested thousands of visitors at the Toronto fair this year. Practical demonstrations of the proper packing of fruit for export should be given in fruit districts by expert packers, and the most approved styles of fruit packages exhibited.

TO IMPROVE FARM PROSPECTS.—Another feature worthy of adoption by all agricultural societies, but which only a few have yet taken up, is the growing of illustration plots on the fair grounds. At a small expense a very interesting and instructive exhibit of the best varieties of grasses, clovers, millets, sorghum, corn, fodder and pasture plants, turnips, mangolds and sugar beets can be provided. By studying these plots farmers may learn just what crops and what varieties are best adapted to their farms, thus bringing home to particular conditions of soil and climate the general conclusions arrived at by the experimental farms. In all kinds of farm crops the yield per acre may be materially increased and the quality substantially improved by the use of seed which has been graded by careful growing and systematic, intelligent selection, continued without interruption from year to year. This fact cannot be too soon brought home to the farmers of Canada, and one of the best ways of doing so would be to have on view at the fairs representative exhibits of the great work being done by members of the Canadian Seed Growers' Association.

INTERESTING THE WOMEN AND CHILDREN.—Demonstrations of agricultural processes are interesting to everyone, but the operation of a model kitchen and dining room, with exhibitions of cooking simple dishes and addresses on domestic science, will appeal especially to the farmers' wives and daughters. That the children may be led to take an intelligent interest in the fair, prizes might well be offered for exhibits by school children of cut flowers, grains, clovers and grasses, roots and vegetables, fruits, pressed and mounted wild flowers, weeds and weed seeds, beneficial and injurious insects and native woods. These exhibits could be supplemented by essays for which prizes might be offered. Wherever tried this plan has proved effective in inducing children to begin the fascinating study of nature. Every precaution should be taken to have a good clean fair, where all the boys and girls may go to spend a pleasant and instructive day without coming in contact with any injurious influences.

Why Brain Workers Break Down

Man is not a machine that keeps going as long as the steam is applied. He is a creature of blood, nerves, and delicately balanced organism. Many don't realize this, but overwork their brains and break down. Brain workers need a strong, bracing tonic like Ferrozone to fortify their nerves and keep their blood pure and rich. Take Ferrozone and you'll do more work because your system will be in first class order. For your health and strength take Ferrozone regularly. Price 60c. at druggists.

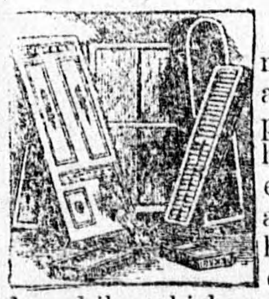
Reginald Williams fell into the cylinder of a thrashing machine near Delhi, and was instantly killed.

Thomas Pattenden of Collingwood attempted to catch a greasy pig in the town sports. He fell against a wagon, broke several ribs and the pig got away.

While engaged in threshing grain on the farm of Alexander Badour, in Goderich township, Fletcher McCartney was burned to death. McCartney was the owner of the machine, and was trying to haul it out of the barn, when the flames rushed in, enveloping him and the machine. The barn was completely destroyed. McCartney was married, and had a good-sized family.

Mr. Patrick McConvey one our most esteemed citizens, has this week recovered from the painful result of a mishap which occured in a rather peculiar manner. Mr. McConvey purchased a quantity of carbolic acid for use in doctoring a horse, and put the bottle containg the same in the hip pocket of his trousers. After a time the cork came out of the bottle and the burning liquid ran over his hip and down his leg to his foot, and the result was an exceedingly bad burn The sufferer was confined to bed for some time and he was indeed called upon to bear much pain.—Chatsworth Banner.

Flesherton Sash, Door and Planing Mills



AFTER muchlabor and expense we have reopened our actory and have just erected a dry kiln, which puts us in a position to fill all orders for Sash, Doors, Frames, Mouldings, Base, stair materials and machine work such as planing and matching, scroll and band sawing and turning of every description. Our stock of north shore white pine is complete. We also carry a good stock of panel doors and sash and can fill all orders promptly and will guarantee satisfaction to our customers in all lines of our business and our prices will be found as reasonable as any.

Our Chopping Department shall have our best attention.
