The Washington Wheat King

The Spokane Spokesman-Review of Dec 11 gives the following facts regarding a great wheat crop raised last year in the state of Washington by Lillis F. Smith. The paper says: What is believed to be the largest check ever issued to a farmer for a single crop of grain in eastern Washington has been given Lillis F. Smith of Endicott for his crop of 1904 The check is for $45,364.30, and is drawn on the First National bank of Colfax, by Seymour Manning, general agent for the North western Warehouse company. This represents the value of nearly 62,000 bushels of wheat grown on Mr. Smith's land this year. The larger portion of this was grown by Mr. Smith on 1500 acres the remainder being his share of the crop grown by his son, Leslie, on Mr. Smith's land which the son had rented. Lillis Smith and son had a total of 3400 acres in wheat this year.

We have crowned Lillis Smith the "wheat king" of the Palouse country, with a golden crown worth more than $45,000 said Seymour Manning, the agent who bought the crop. Continuing Mr. Manning said: Mr. Smith has been called the "wheat king" of the Palouse for several years, but this year claims were made that he had lost the title because of the immense crops of other farmers. Henry Hickman of Almota received a check for $25,931.73 for his 1904 crop but Mr. Smith's check is the largest ever issued to a farmer for a single crop in this county.

Mr. Smith's success as a farmer is a shining example of what can be done in this country by pluck, perseverance and hard work. Beginning with a homestead of 160 acres, taken near Endicott in 1883, Mr. Smith has acquired land and wealth until he now owns 4900 acres of land, all of which is in cultivation, in this county; 800 acres in California, in addition to many other investments. His Whitman county land is estimated to be worth $35. per acre, a total of $171.500.

In addition to his wheat crop, Mr. Smith sold $6150 worth of horses this year, making a total income of more than $51,000. His fortune is estimated at $250,000.

Twenty years hence the boys of today will be men. They will be the doctors and drunkards, lawyers and liars, thieves editors and idiots, ministers and murderers, Liberals and Conservatives, and so on down the line. It is impossible to tell to a certainity in what class your boy will be. But it is not impossible for your boy to be put into such influence that will steer him in the right direction. Follow the boys of twelve years and in twenty years some of them will be in parliament, while others will be in jail. What class is your boy training for?—Fritz in Hanover Post.

HEALTHY HORSES

The horse has but one stomach, and has but one chance at his food, so it is absolutely necessary to extract the largest amount of good from the food in its rapid passage through the stomach. As a rule, horses are either overworked or underworked, and it suffers much from impaired digestion. This is followed by stagnation of the blood and a whole host of diseases. No trouble should be too great, to get and keep him in good shape for his every day work. Clydesdale Stock Food, with his ordinary feed, regulates his whole system by aiding the digestion, regulating the bowels, stimulating and correcting the action of the liver, loosening the hide, giving sleekness to the coat, and your horse will do more work and on less feed. It can be stopped at any time without bad results. Mr. D. B. McEachern, Harriston, Ont., says: "I have used your Clydesdale Stock Food for the last six months in my stable, and I find it is the best tonic I have ever used, and it is the only tonic that when using, I can stop at any time without bad results, and my horses will not lose in flesh like they will with other Stock Foods. No better remedies on the market than Clydesdale Heave Cure, Colic Cure, Worm Powder, Gall Cure, Embrocation Liniment and Tar Foot Remedy; they should be kept handy. You never can tell when they may be needed. If the above preparations are not found satisfactory your money will be refunded cheerfully by our dealers in your district, namely:

MELOTTE CREAM SEPARATORS

have machine cut gears [illegible] are always completely covered with oil. They have no worm threads or any other contrivance causing needless friction The gear wheels are of high grade steel, permitting reduction in their size and weight. The suspension of the separator bowl from the spindle saves a great amount of friction as compared with the old fashioned plan, which the bowl is balanced on top of one or more heavy spindles held rigidly in position by two or even more bearings. For close skimming the Mellotte is unexcelled.
