A GREAT ARRAY OF EXTRA VALUES

In

NEW SPRING GOODS

Extraordinary Bargains In New Spring wash Goods

It is very hard for us to describe this unusual offering in new spring wash goods, which consists of fifty of the newest and most wanted designs in Wash Fabric. Never before have such goods been sold at the beginning of the season at such a ridiculously low figure. When we tell you that this line is extra good value at 12½c and 15c. per yd. we tell you what is correct, but to make the selling brisk for the next ten days put the lot on sale at per yard 6c.

2,000 yards fancy Wash Fabrics, representing 12½c. and 15c values, on sale at per yard, special 6c.

To make the lot go around we limit the quantity of 12½ yards to a customer.

Is published every Thursday at $1.00 per annum if paid in advance, $1.50 if not so paid.

All subscribers paying $1.00 strictly in advance get the Montreal Herald one year free as a premium.

Pasture Crops.

BY PROF. C. A. ZAVITZ.

The area of cleared land devoted to pasture in Ontario amounts to nearly three million acres, and that devoted to hay and clover to about two and one half million acres annually. A large number of varities of grasses and clovers have been grown in the Experimensal Department of the Ontario Agricultural College, both singly and in combination, for pasture and for hay. The mixture of seed now used for the production of pasture for a two years' stand in the short rotation on the College farm is as follows: Red Clover, 7 lbs.; Alsike Clover, 2 lbs.; Timothy, 4 lbs.; and Orchard Grass, 5 lbs., making a total of 18 lbs. per acre. This mixture can also be used for hay, but when the chief aim is the production of hay the Orchard Grass is not included and only 15 lbs of seed per acre are sown.

Farmers frequently write in the spring of the year, stating that through lack of germination of the grass and clover seed, the killing of the plants by the hot dry weather of the summer, or the heaving of the clover in the early spring, the pasture crop is likely to be deficient in the coming season, and asking what they can sow in the spring of the year that will furnish the best pasture in the same season. In each of four years we conducted an experiment in testing fourteen different kinds of crops for the production of pasture in the same season in which the seed was sown. As a result of these experiments we find that we can get better return from a combination of varieties than from any one variety sown by itself. The following mixture, when sown in the spring, is likely to be ready for use about six weeks after the seed is sown and to give good satisfaction in furnishing pasture throughout the summer; Oats, one and one half bushels; Early Amber Sugar Cane, thirty pounds; and Common Red Clover, seven pounds; thus making a total of eighty-eight pounds of seed per acre.

Sometimes a farm contains a considerable amount of comparatively rough land, or fields which lie at a long distance from the buildings, and the owner is anxious to use a mixture of grasses and clovers which will make a permanent pasture. From twenty years results in testing different varieties of grasses and clovers, both singly and in combination, we would suggest the following mixture for permanent pasture on an average soil: Orchard Grass 4 lbs.; Meadow Fescue, 4 lbs.; Tall Oat Grass, 3 lbs.; Timothy, 2 lbs.; Meadow Foxtail, 2 lbs.; Lucerne, 5 lbs.; Alsike Clover, 2 lbs.; and White Clover, 2 lbs. thus making a total of 24 pounds of seed per acre. Some of these varieties produce grass very early in the spring, while others are later and furnish a good bite during the hot dry weather which occurs frequently in the months of July and August. The seed can be sown in early spring either with or without a grain crop. Such a mixture as this, when once well established on suitable land, should form a pasture abundant in growth, excellent in quality, and permanent in character.

Honor Rolls

Report of S. S. No. 17, Artemesia for February:

V—Violet McLean.

IV sr—George English, Vera Phillips and Mabel Chard.

IV jr—Maggie Fisher, Fred Russel, Arthur Chard and Eddie Chard.

A Serenely Happy Man

Is Mr. Thos. McOlashan of North Pelham who was cured of muscular rheumatism by Nerviline, the most powerful rheumatic remedy in the world. "I suffered all manner of pain for years, he writes and Nerviline was the only thing that did me any good. I can heartily recommend Nerviline for all forms of rheumatism; it goes to the core of the pain and brings lasting relief. Let every sufferer from lame back, aching joints and swelled limbs use Nerviline. It's sure to cure and costs 25c. for a large bottle.

Sproule, Crossley & Co., Flesherton, are receiving this week their second car shipment of best American W. W. Coal Oil, which they are selling at rock bottom prices by the one or five gallon lots.

An Owen Sound lady who was given a piano lamp for her birthday, named it after her husband for the following reasons It has a good deal of brass about it, it is handsome to look at, is not remarkably brilliant, requires a good deal of attention, is somewhat unsteady on its legs; liable to explode when half full, flares up occasionally, is always out at bed time, and is bound to smoke.—Orillia Sun.

Blank receipt books for sale—at this office.

Milliner y apprentice wanted.—Boyd Hickling & Co.

For best Manitoba and Ontario flour at lowest prices go to Sproule, Crossley & Co., Flesherton.

Owen Sound council refused to cut down the number of licenses from eleven to nine, as requested by a large deputation.
