CREAM

Big Demand for Butter

There is an exceptionally big demand for butter at the present, so special care should be given milch cows during this time of year, in order to keep up production. We suggest :-

Stabling during the cool nights.
More grain feeding.
This will undoubtedly pay you well.

POULTRY

Because of the scarcity of meats, poultry is much in demand. It is to your advantage to get your poultry in shape, and market as soon as possible. Thus, while you are receiving good prices now, you are also helping to maintain good prices late in the fall. We are in the market to handle large quantities of both live and dressed poultry. Get in touch with us.

NOT BOMBS ... *Just dirty stove pipes*

It *can* and it *will* happen here—perhaps in your very home! If you allow fouled stove pipes, flues or chimneys you are courting with such disaster. Do you know that practically every farm house fire is the result of faulty heating equipment or chimneys? An ounce of prevention NOW may head off irreparable loss this winter.

Clean out your stove pipes and replace any poor ones. Clean out your chimneys and make any necessary repairs. Clean out your stoves and furnace—tidy up the cellar. *Never* quicken a fire with coal oil or gasoline.

Never light a fire in a hot water heating system or in a stove with a water front *if there is any chance of the water pipes being frozen or clogged—it may cause a fatal explosion.*

Make every member of your household a fire warden. Never before has the need for fire prevention been so urgent. Remember that buildings are now next to impossible to replace—that your loss is the *Nation's* loss now.
