PAGE FENCING

THE BEST IS THE CHEAPEST

When you buy a knife for instance, you consider the **quality** of the steel in the blade. The biggest and heaviest knife is not necessarily the best. Now there is just as much difference in the quality and strength of steel in fence wire as there is in a knife blade or razor. The Page Co. use a **high carbon steel wire,** which though it costs you but little more, is fifty per cent. (50%) stronger than wire in other fences. The lightest PAGE fence is as strong as the heaviest of other makes.

Notice the lock in PAGE "EMPIRE" FENCE. You may have noticed also that **others are imitating it.** That is a good recommend for it. Where we lead others follow.

All PAGE wire is **"COILED,"** not crimped.

THE LOCK IN PAGE "EMPIRE" FENCES.

Besides the extra strength and superior workmanship, PAGE FENCES are **dipped in a special white paint,** which on top of the best of galvanizing, will lengthen the life of wire for years. And, also, this white coating makes wire much more sightly.

Owing to the great strength and elasticity of PAGE fencing, **one-third less posts** are required, thus reducing the cost of the fencing.

As you get in PAGE FENCES **one-half more fence strength,** greater protection against rust, better workmanship, better appearance, use less posts, can you afford to use other fences, even though you could buy them for one-half the price of the PAGE? But, really **ours cost you little, if any more.** e 408
