$1,200 LOST—REWARD 6 CENTS.

Woman in England Bestows Munificent Reward Upon Honest Lad.

A correspondent of the London Daily Mail sends an account of the loss and recovery of a bag of gold, containing £240. and the "generous" reward of threepence paid to the finder.

The bag was found on a seat at Newton Heath Railway Station by a boy, who at once took it to the lost property office. From subsequent inquiries it was found that the money was the property of a lady who had been on a visit to Newton Heath, and who did not miss the bag until she arrived at Victoria Station, Manchester. She duly reported the loss, but could give no idea where she had left her property.

After recovering her gold the lady rewarded the finder with threepence.

TERRIBLE RESULT OF BLOOD POISON

CHRONIC ULCERS AND SORES FOR 9 YEARS — ZAM-BUK WORKED A MARVELLOUS CURE.

The wonderful value of Zam-Buk, the herbal balm in cases of chronic ulcers, sores, etc., is illustrated by the experience of Mrs. W. E. Rice, of London Junction (Ont.). She says.

"For nine years I had been a sufferer from running sores on my legs caused by blood-poisoning. I had tried every kind of ointment and salve that I had heard of, but none of them seemed equal to my case. Last winter I was worse than ever, and could not bear to stand on my feet for five minutes. The pain was so acute that I could not bear to have my slippers on.

"I heard of Zam-Buk, and decided to give it a fair trial. From first commencing with it it did me good, and it has now cured me. Whereas before I could not stand on my feet for five minutes at a time, I can now not only stand, but walk about without feeling any pain whatever. I feel like a new woman. I have waited to see if the cure was permanent before making any statement, and now I am very willing to give my testimony. I shall be pleased to answer any inquiries, and if any one cares to come and see me, I shall be pleased to tell them what Zam-Buk has done for me."

It is by working such cures as the above that Zam-Buk has made for itself its world-wide reputation. It is a certain cure for cuts, burns, bruises, eczema, pimples, running sores, spreading scabs, scalp diseases, poisoned wounds, festering sores, piles, ulcers, bad legs, abscesses, boils, ringworm, erysipelas, scrofula, barber's rash, blackheads, acne, stiffness, rheumatism, and all injured, diseased or inflamed conditions of skin and tissue. Of all druggists at 50c a box, or postpaid from the Zam-Buk Co., Colborne Street, Toronto, upon receipt of price. 6 boxes for $2.50.

Husband—"You are not economical." Wife—"Well, if you don't call a woman economical who saves her wedding-dress for a possible second marriage, I'd like to know what you think economy is."

An Inheritance of weak lungs is a serious handicap, but Allen's Lung Balsam taken at the first signs of a cough will ensure immunity from this dangerous defect. Don't trifle with unknown cure-alls.

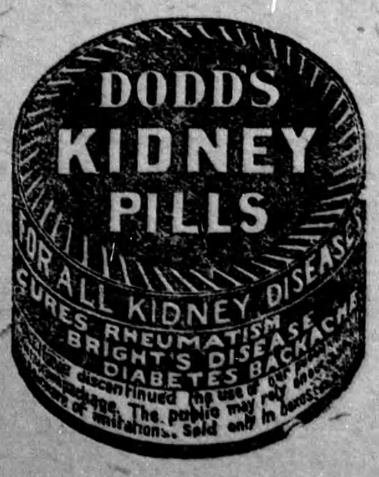
Podkins—"Do you think Peters capable of deceiving a friend?" Dodkins—"Oh, no; none of his friends believe a word he says."

A Cure for Costiveness.—Costiveness comes from the refusal of the excretory organs to perform their duties regularly from contributing causes usually disordered digestion. Parmelee's Vegetable Pills, prepared on scientific principles, are so compounded that certain ingredients in them pass through the stomach and act upon the bowels so as to remove their torpor and arouse them to proper action. Many thousands are prepared to bear testimony to their power in this respect.

The huge guns of modern navies can only be fired about seventy-five times before they are worn out.

Death or lunacy seemed the only alternative for a well-known and highly respected lady of Wingham, Ont., who had travelled over two continents in a vain search for a cure for nervous debility and dyspepsia. A friend recommended South American Nervine. One bottle helped, six bottles cured, and her own written testimony closes with these words: "It has saved my life."—20

Mrs. Hale (just married): "Marie, we will have eels as a second course for dinner." Marie: "How much ought I to get, ma'am?" Mrs. Hale: "Oh, I think two yards will be sufficient!"



It is a pleasure to comment upon the conservative methods employed by the G. & C. Merriam Company in the publication of the Webster's International Dictionary. Not every little slang word or phrase is put into the book regardless of its scholastic or linguistic qualities. It is this conservatism backed by the scholarship of the editor-in-chief, William T. Harris, Ph. D., LL. D., late United States Commissioner of Education, and hundreds of others of the greatest educators of this and other nations which has made the International the standard in the United States Supreme Court and all the State Supreme Courts, also the standard of the Government Printing Office, and the basis of nearly all the schoolbooks in the country. It is indorsed by every State School Superintendent, universally recommended by College Presidents and Educators, and adhered to as standard by over 99 per cent. of the newspapers. Should you not own such a book? Get the best.

EGYPT'S LANDHOLDERS.

There are an enormous number of small landholders in Egypt, 5,000,000 acres being cultivated by over 1,000,000 landowners, of whom 6,000 are Europeans, owning, on an average, a little over 100 acres. Nine hundred and forty peasants hold under five acres each, or 23 per cent. of the whole cultivated land; while 12,000 men of means have holdings above fifty acres, their total being over 2,250,000 acres, or 44 per cent. of the whole; proprietors of between five and twenty acres having 21 per cent.

COAL BURNED BY STEAMSHIPS.

There are many ships which burn from 100 to 300 tons of coal per day, the lowest consumption being when the vessel is going at a moderate rate. British men-of-war do not consume so much in proportion as swift passenger steamers which ply between Europe and America, for, unless in an emergency, they are not driven at the highest attainable speed. The ocean passenger steamers often burn from 2,500 to 3,500 tons during a passage lasting six to seven days.

THE ART OF GLOVE-CUTTING.

The cutters of the great glove houses in Brussels and in France earn even higher wages than the cutters of the most fashionable tailors in London and New York. So difficult is this art of cutting gloves that most of the principal cutters are known to the trade by name and by fame, and the peculiar knives which they use in the business are so highly prized that they are handed down from generation to generation as heirlooms.

An Irishman entered a New York Post Office for the purpose of mailing a letter to his fiancee. He paused in perplexity before a board containing three letter-slots bearing the words "City," "Domestic," "Foreign." "Faith," he muttered, "this is a pretty problem. Maggie's a domestic, she lives in the city, and she's a foreigner. What beats me is how I'm to get the letter in the three holes at wanst."

One trial of Mother Graves' Worm Exterminator will convince you that it has no equal as a worm medicine. Buy a bottle and see if it does not please you.

"There's a quare thing about a cousin o' mine," said Barney O'Flynn. "He's a great habit of walkin' in his sleep." "Can he be cured av it at all?" "Cured av it? Sure 'tis the makin' av him. He's in the police force."

To Starve is a Fallacy.—The dictum to stop eating because you have indigestion has long since been exploded. Dr. Von Stan's Pineapple Tablets introduced a new era in the treatment of stomach troubles. It has proved that one may eat his fill of anything and everything he relishes, and one tablet taken after the meal will aid the stomach in doing its work. 60 in a box, 35 cents.—24

Attorney—"You can sue him for breach of promise, madam; but it seems to me preposterous to claim fifty thousand dollars damages." Fair Client—"I want to get so heavy a judgment against him that he'll just have to marry me—the scoundrel!"

A BIG SUPPLY NECESSARY.

Up and down the drill-ground, first right and then left, an awkward squad had tramped all the morning; but no amount of drill seemed to put any smartness into their movements.

"Stand easy," called their mentor at last, wearily mopping his brow, and inwardly abusing the Fates for making a soldier of him.

"Dullhead," he said to the warrior who had insisted on turning round three times every time the "about" was ordered, under the impression probably, that he was playing blind man's buff, "did you ever hear fish was good for the brain?"

"Aye, sergeant."

"Then for goodness sake go and eat a whale."

EIGHTY-FOUR WEDS THIRTY.

A mild sensation was recently caused in the quiet village of Old Windsor, Berks, on the occasion of a hastily-arranged wedding which took place at St. Peter's Church, the bridegroom being a very old inhabitant, eighty-four years of age, and the bride a young woman of about thirty summers. A donkey-chaise was in waiting for the bridegroom after the ceremony, but the bride preferred to ride her bicycle both to and from the church.

Many inherit weak lungs, and as disease usually assails the weakest point, these persons are continually exposed to attacks of cold and pulmonary disturbances. The speedy use of Bickle's Anti Consumptive Syrup will be found a preventative and a protection, strengthening the organs so that they are not so liable to derangement from exposure or abrupt atmospheric changes. Bickle's Syrup is cheap and good.

"It is true that she has money, but she is also very exacting. If you marry her you will have to give up smoking and drinking." "Well, if I don't marry her I'll have to give up eating as well."

"There ought to be one head to every household," shouted the orator. "That's right," muttered a worried-looking man in the audience. "You agree with me?" shouted the orator, singling him out. "I do; I have just finished paying for the bonnets of my nine daughters."

ASTONISHED THE DOCTOR.

Physician Said She Might Drop Dead At Any Time.

Mrs. Robert Eaton

"The Doctor told me I had heart disease and was liable to drop on the street at any time," says Mrs. Robert Eaton, of Dufferin, Ont.

"I was afraid to draw my breath, it pained me so. I was nervous, short of breath, had dizziness, loss of appetite, smothering and sinking spells, and could not sleep.

"Sometimes I would have to lie down to keep from falling. My hands and feet would seem to go to sleep and a sort of numbness would come all over me.

"I began using Dr. Leonhardt's Anti-Pill. From the start I improved. I feel much stronger, look better, and altogether Anti-Pill has made a new woman of me.

"I am entirely cured."

PROFESSIONS THAT KILL.

The latest compilations which have been made show that the air in cutlery factories is laden with invisible metal-dust, and this, being carried into the lungs, causes asthma and consumption. The steel-grinders bending over their work, inhale such huge quantities of metal-dust that they rarely live beyond the age of forty. All metal trades are very hazardous, and phthisis or tubercular affections and respiratory diseases are penalties of these pursuits. The rate of mortality amongst brewers is 50 per cent. greater than that among men of ordinary callings. Gout is an enemy which makes itself sorely felt in this occupation. Bakers, too, are more than normally subject to premature death. In the flour there is a very small microbe which has its effect on the teeth, and attacks the drums of the ears, causing deafness.

The next day after she becomes engaged a girl begins to wonder if her happiness will last till she is married.

A Medicine for the Miner's Pack.—Prospectors and others going into the mining regions where doctors are few and drug stores not at all, should provide themselves with a supply of Dr. Thomas' Eclectric Oil. It will offset the effects of exposure, reduce sprains, and when taken internally will prevent and cure colds and sore throat, and as a lubricant will keep the muscles in good condition.

WHAT THE CHEMIST ADVISED.

A man went to see a doctor. The doctor examined him carefully and with a grave face told him he was very ill, and asked if he had consulted anyone else.

"Oh," said the man, "I went to see a chemist and asked his advice, and he—"

"Chemist!" the doctor broke in angrily. "What was the good of that? The best thing you can do when a chemist gives you a bit of advice is to do exactly the opposite."

"And he," the patient continued, "advised me to come to you."

Jones—"That was a scathing sermon on mean men the parson gave us last Sunday. Wonder what Smith thought about it?" Brown—"Singular. I met Smith yesterday, and he said he'd like to know your opinion on it.'

In Nature's Storehouse There are Cures. — Medical experiments have shown conclusively that there are medicinal virtues in even ordinary plants growing up around us which give them a value that cannot be estimated. It is held by some that Nature provides a cure for every disease which neglect and ignorance have visited upon man. However, this may be, it is well known that Parmelee's Vegetable Pills, distilled from roots and herbs, are a sovereign remedy in curing all disorders of the digestion.

POSTAL ARMY.

The British Postmaster-General has a staff under his control bigger than the standing British Army. The postal system keeps busy from 170,000 to 180,000 men and women, and has within its sphere of operations more offices than there are people in Sheerness. The Post Office is among the most profitable businesses in England. With an outlay of $50,000,000, it makes a profit of nearly $20,000,000.
