Lost His Sight

Attention has been recently drawn to the sad condition of Capt. Andrews, of Toronto, who lost his sight by saving the lives of others, having rescued from drowning eighteen persons. An appeal is to be made to the government to grant him a pension, with which it is to be hoped they will comply. Unfortunately, shall we say many lose their sight, not as Capt. Andrews has done by saving a score of lives, but by the desire to save a few cents by wearing cheap or other spectacles that are of inferior material, not properly ground, or that are not the proper correction. Others injure their sight by not wearing spectacles when they need them, thinking the longer they can do without them the better, whereas it is the reverse. We recommend that you do not allow false pride or other reasons to keep you from wearing spectacles when you need them, and when you do begin make sure that you are wearing the right kind for you. There is no way of knowing this but by having your eyes properly tested and glasses given according to the needs of each eye. I have made a study of the testing of sight by improved methods, and guarantee a perfect fit at reasonable prices.

The people of this locality are anxiously looking for the departure of snow, owing to the scarcety of feed.

During the recent cold snap two benighted travellers called at the home of one of our young farmers to seek lodging for the night, but finding the door locked and no one at home took shelter in the barn amongst the hay for the night. The young farmer returning home a little later on, and thinking things looked rather suspicious about the barn thought it wise for him to seek shelter at a neighbors house for the night. This he did. That's right, there's nothing like being safe, Joe.
