Xmas Offer $22,50

For three months course. Write before Dec. 21 15 years experience. British Canadian Business College, Yonge and Bloor streets, Toronto.

Visitors to the Ontario Agricultural College during the past summer were shown a Holstein Friesian cow, which was expected to produce twenty thousand pounds of milk within the year. As a matter of fact, she has actually exceeded this estimate. From October 27, 1906, to October 26, 1907, she has given 20,778 pounds of milk, testing a fraction over 3.99 per cent. and containing 781.91 lbs. of butter fat. The cost of the feed as charged up by the college authorities was $72.66. The value of the butter fat, at prices that have been paid neighboring farmers by the college creamery, was $190.38. If the 20,000 pounds of skim milk and buttermilk were to be valued at, say 20c per cwt., it would amount to $40. Adding this to the value of the butter fat, the total yield of butter fat and skim milk would equal $230.38. Deducting the cost of feed, we have a profit over feed consumed of $157.72. At the prices for cream which have been received during the past year by her former owner Mr. George Rice of Tilsonburg, Ont., the butter fat in this cow's milk would have been worth $224.57. The skim milk in this case would have been, say 175 cwt., worth $35, making total proceeds of $259.57, or a profit, over cost of feed, of $186.91.

Distribution of Seed and Grain

From the Central Experimental Farm, Ottawa, 1907-8.

By instruction of the Hon. Minister of Agriculture a distribution is being made this season of superior sorts of grain and potatoes to Canadian farmers for the improvement of seed. The stock for distribution has been secured mainly from the Experimental Farms at Indian Head, Sask., and Brandon, Man. The quantity of oats sent is 4 lbs, and of wheat or barley 5 lbs., sufficient in each case to sow one-twentieth of an acre. The samples of Indian corn and potatoes weigh 3 lbs. each. A quantity of each of the following varieties has been secured for distribution:

OATS—Banner, Wide-Awake, White Giant, Danish Island, Thousand Dollar, Improved Ligowo, all white varieties. Black oats are not reccommended for general cultivation, a few samples, however, are available which can be sent if specially asked for.

WHEAT—Red Fife (beardless), Preston, Pringle's Champlain and Huron (early bearded sorts), Percy and Stanley (early beardless varieties).

BARLEY—SIX ROWED—Mensury, Odessa, Mansfield and Claude. TWO ROWED—Standwell, Invincible, Canadian Thorpe and Sidney.

INDIAN CORN (for ensilage)— Early sorts, Angel of Midnight, Compton's Early and Longfellow; later varieties, Selected Leaming, Early Mastodon and White Cap Yellow Dent.

POTATOES—Early varieties, Early White Prize and Rochester Rose. Medium to late varieties, Carman No. 1 and Late Puritan. These later varieties are as a rule more productive than the earlier kinds.

Only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat, barley, Indian corn or potatoes. Lists of names from one individual, or applications for more than one sample for one household, cannot be entertained. The samples will be sent free of charge through the mail.

Applications should be addressed to the Director of Experimental Farms, Ottawa, and may be sent in any time before the 15th of February, after which the lists will be closed, so that the samples asked for may be sent out in time for sowing. Applicants should mention the variety they prefer, with a second sort as an alternative. Those applying for Indian corn or potatoes should bear in mind that the corn is not usually distributed until April, and that potatoes cannot be mailed from here until danger from frost transit is over. No postage is required on mail matter addressed to the Central Experimental Farm, Ottawa.

WM. SAUNDERS,
Director of Experimental Farms.

ALL THIN, PALE WOMEN

Can Learn the Cause of Their Nervous, Used-up Condition.

With women, ill-health is usually traceable to nerve exhaustion. Feeling rundown and tired most of the time is nature's warning that more nerve-force is required.

You must build up, nourish the body, vitalize the nerves, get more flesh and blood.

It's the abundant nutriment and building material in Ferrozone that enables it to cure so many sick women. It increases the appetite, adds weight and strength, restores lost color and develops a surplus of energy and nerve force that defies sickness of any kind. There is living proof in Mrs. Daniel Ferguson, Jr., of Prescott, Ont. Read her statement:

"A year ago my health failed. I grew thin and exceedingly pale. At times I was prostrated with nervous and sick headache. All day I was tired. At night it was difficult to obtain restful sleep. My appetite was variable and indigestion bothered me considerably. I became morose and suffered from heart palpitation. you could scarcely believe the benefit I derived in one week from Ferrozone. Color came back to my cheeks. My vitality and appetite increased, renewed nerve force and better spirits came also. Ferrozone did a world of good and made me well."

Remember this: No alcoholic stimulant can nourish and build up like Ferrozone. Fifty cents per box or six boxes for $2.50. At all dealers, or N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U. S. A.

Prevention of Eye Trouble.

Prevention is better than cure.
It is cheaper.
It is possible when cure is impossible.
Eye trouble may be avoided by the timely use of glasses, averting discomfort, suffering and permanent impairment of sight. We are properly equipped to adjust glasses and guarantee satisfaction.
