LAND, HO!

Odd angle photo makes $10,000,000 Coast Guard icebreaker Mackinaw appear to be traveling on dry land. Ship was maneuvering close to shore of Black River (not seen in photo) with Lake Erie in background, near Lorain, Ohio.

The Government Must Have Money

If everything in Canada were to be handled by the co-operatives, as some are suggesting, there wouldn't be many taxes coming from private business, comments The Lethbridge Herald. The Government would then have to do what the Russian Government does. There a turnover tax on the business of co-operatives brought in 800,000,000 rubles last year, and co-operative farms had to pay besides eight percent, on product sold and on revenues distributed to their members. After all, the State must have cash on which to operate.

Mustard gas released in a damp, dense jungle may remain effective for a year.

Future of Radio

Radio manufacturers expect to employ 68 per cent more persons after the war than they did in 1940 to meet the predicted demands for new household radios.

Ninety-five per cent of Haiti's population of 3,000,000 are pure-blooded Negroes.

VOICE OF THE PRESS

SCARE 'EM TO DEATH

War is reaching new depths. The Germans urge civilians to "kill, murder or poison the enemy." And the Allies are terrorizing the Nazis with bagpipes.

—Peterborough Examiner.

THAT HANDWRITING

Something for Hitler to think about: The longer heavy Allied bombing continues, the fewer walls will be left for him to see the handwriting on.

HITLER'S COMPLAINT

Rudy Hess complains of the way they cook his fish. Hitler's case is different. He doesn't like the way they're cooking his goose.

How Sun's Rays Affect Steel Mast

Studies made of a 125-foot tubular stainless steel mast atop a New York Skyscraper indicate that although mounted and designed to stand vertically it actually does so only on heavily clouded days and at night.

When the sun's rays strike the mast, the metal on the sunny side becomes heated and expands more than the shaded ,cooler opposite side, causing the mast to bend away from Old Sol.

In the course of a bright sunny day, the top of the mast swings through a 12-inch arc, bending six inches to the west before noon, and six inches to the east in the afternoon.

The mast would stand erect in the sunshine only if the sun were directly overhead, an unlikely circumstance in New York, for that city is far north of the Earth's equartor.

Berliners Dread Artillery Barrage

Berlin people fear the artillery barrage they figure the Russians will lay on the city once they are within range of the German capital says the Windsor Star. So, as many Berliners as possible are making tracks for somewhere else.

Once the guns open up on Berlin, it will be just too bad for the people and the city. Artillery can do what bombs cannot accomplish. While airplanes soar overhead, drop their bombs and fly away, the artillery simply sets up the guns and keeps on firing until demolition piles on demolition.

An artillery battery can train its guns on a given target and fire away until there is nothing but rubble. Then, the sights can be shifted and the battery can go to work on another target.

The Amazon river drains an area as large as the United States.

No Coal! Just Like Buckingham Palace

Queen Elizabeth inspected a kitchen exhibit a short time ago and peeped inside a plastic coke bin on a prefabricated heating unit.

"Oh", she exclaimed. "No coal! Just like most houses now."

Then she observed, "My goodness, it has been cold in Buckingham Palace."
