Result of a Neglected Cold.

DISEASED LUNGS

Which Doctors Failed to Help,

CURED BY TAKING

AYER'S Cherry Pectoral.

"I contracted a severe cold, which settled on my lungs, and I did what is often done in such cases, neglected it, thinking it would go away as it came; but I found, after a little while, that the slightest exertion pained me. I then

Consulted a Doctor

who found, on examining my lungs, that the upper part of the left one was badly affected. He gave me some medicine which I took as directed, but it did not seem to do any good. Fortunately, I happened to read in Ayer's Almanac, of the effect that Ayer's Cherry Pectoral had on others, and I determined to give it a trial. After taking a few doses my trouble was relieved, and before I had finished the bottle I was cured."—A. LEFLAR, watchmaker, Orangeville, Ont.

At Henderson's Store

Straight Roller Flour, $3.75 per bbl. Other grades equally low. Our 25c TEA is pronounced by our customers the best value for the money they can get. It is a fine flavored tea, (try it.) Oranges, Lemons and Bananas on hand. First class Tomato Plants for sale. We are selling off our **Trunks and Valises** at near cost. An early call solicited.

WM HENDERSON

FLESHERTON STEAM LAUNDRY.

I have opened up a complete steam laundry in Flesherton, and am prepared to take in any quantity of laundry work at lower prices than are charged elsewhere. I have put in the latest and most improved machinery to that end. Kindly give me a call. Entire satisfaction guaranteed, and prices low.

MRS. GEO. MOORHOUSE

Road Making

A. W. Campbell, C. R., Provincial Instructor in Road-making, has issued the following bulletin from his department:

DRAINAGE

Perfect drainage, first, of the foundation of the road-bed; secondly, of the road surface, are the points in road-making on which too much stress cannot be laid.

The first is accomplished by underdrainage, tile drains being laid at a depth of three or more feet below the surface on each side of the road-bed at the foot of the grade and parallel to it. Care should be taken to fit and settle the tile in the trench so that, when re filling with earth, they will not be displaced. As a rule two and a half inch to four inch tile will be sufficient. The joints should be close and the grade a true line. Loose joints and an uneven grade allow silt to pass into the tile and remain there, destroying the drain.

Surface drainage is accomplished by open drains on each side of the grade, having sufficient capacity to drain, not only the road-bed, but the land adjoining. With open drains and with tile drains make and maintain a free outlet to the nearest watercourse. A drain without an outlet is useless. In constructing a good road a dry foundation is the matter of first importance.

CROWNING THE ROAD

The graded portion of the road should be wide enough to accommodate the travel upon it, and not greater, the slope being uniform, not heaped in the centre. The crown should be well above the overflow of storm water, and should have a grade sufficient to shed water readily to the open ditches on either side. Do not round it up so as to make the grade steep and dangerous, under the mistaken impression that better drainage will thereby be secured. Nor should it be so low as to allow water to stand upon it in depressions. Under ordinary circumstances one inch or one inch and a half to the foot is a proper grade; that is, a road-bed twenty-six feet wide should be from thirteen to twenty inches higher at the centre than at the side.

QUALITY OF GRAVEL

The gravel should preferably be sharp, clean and of uniform size. Pit gravel usually contains too much earthy matter, and where the latter is in excess, the gravel, as a road-making material, is useless. Lake gravel is apt to be rounded, water-worn and lacking in the necessary earthy matter to make a solid and compact surface, but is generally a better road metal than pit gravel. A coating of pit gravel with a surfacing of creek gravel is a good combination. All large stones should be removed as they will work to the surface, and will then roll loosely or form rough protuberances

PLACING THE GRAVEL

The gravel should be spread evenly over the surface of the sub-grade to a depth of six or eight inches, and to the required width, then rolled with a heavy roller. Rolling should be performed in showery weather, as it is impossible to consolidate dry earth or gravel. The heavier the roller the better will be the results, but if a heavy roller cannot be obtained, a light roller is much better than none. The roller should be passed over the surface until the gravel or earth is so compact as not to be displaced and rutted by the wheels of a wagon passing over it with an ordinary load. The surface must be maintained smooth and hard, to shed water and resist wear. Every municipality should have a roller, but whether one can be obtained or not the gravel should not be left in a heap just as it falls from the wagon. Spread it evenly.

REPAIRS

Gravel roads already constructed will need repair. By the use of road machinery scrape the surface and cut off the corners, which will have formed at the foot of the grade by the washing down of dusty material from the crown of the road. Loosen the surface, particularly that part of the travelled portion and where the road is rutted, with picks, or, if possible, with road machinery, then apply a coating of gravel and roll thoroughly. It is of more importance, however, to see that the drains are not obstructed in their course and that their outlets are free and open.

East Grey S. S. Convention

The second annual meeting of the Sabbath School Association of Centre Grey was held on Tuesday, 9th inst., in the Methodist church, Markdale. The inclemency of the weather seriously affected the size of the audience, while the absence of the Methodist preachers to the Toronto Conference interfered with the program, but notwithstanding these and other adverse circumstances the attendance was fair and the program excellent. The following clergymen were present; Rev. J. F. McLaren, D. D., Rocklyn; Rev. R. J. Murphy, Walter's Falls; Rev. Dr. Dixon, Galt; Rev. R. J. Husband, Holland Centre; Rev. Mr. Walker, Meaford, and Revs. Hunter, Goldberg and Edwards of Markdale. Rev. Mr. McLaren was re elected president, Mr. C. R. Sing, treasurer, and Mr. W. G. Pickell, secretary, for the ensuing year, and it was decided to hold the next annual convention in Thornbury, the executive committee to arrange the date. At the morning session Rev. Mr. Murphy gave an interesting paper on "Lesson Helps," which was intelligently discussed.

In the afternoon Rev. M. M. Goldberg gave an able and very interesting paper on the Jewish training of children, which was followed by a discussion. A paper on "Teaching the catechism in the S S." by Rev. Mr. McLaren was also interesting and briefly discussed. Rev. Mr. Hunter gave an address "Organized S. S. Work," which was well received. An address by Rev. Dr. Dixon of Galt was a treat, and closed the p. m. session.

EVENING SEESSION

At 8 o'clock the president took the chair and after devotional exercises Mr. Pickell gave an address of welcome after which an animated discussion took place on "The aim of the S. S. in his work," which discussion brought out the theological side prominently. Later on Dr. Dixon gave an excellent and much appreciated address on "Home influence in relation to the Sabbath school." The Dr. also conducted the question drawer in a masterly manner. The choir rendered various appropriate selections very creditably. At 10 o'clock this very interesting and profitable convention closed.—Standard.

Honor Rolls.

Flesherton Public School, honor roll for May 1896.

Class 5 sr. — Frank Irwin, Ernest Armstrong, John Hill.

Class 5 jr.— Zella Trimble, Mervin Vanzant.

Class 4. — Ida Gjerdrum, Harry Stewart, Hattie Sullivan.

Class 3 sr. — Teenie Smith, Carrie Rutledge, Russell Smith.

Class 3 jr. — Mina Beattie, Willie Swanton, Geo. McCormack.

Class 2 sr. — Roy Hamilton, Linda Flesher, Wilda Crossley.

Class 2 jr.—Eva Goodall, Willie Hales, Albert Legard.

Part 2 sr.—Walter Loucks, Emerson Wickens, Ida Sullivan.

Part 2 jr. — Ella Barnshouse, Millie Crossley, Lottie Moore.

Mr. Arthur Benson shot two very large copper head snakes at Shawanaga last week, with a 22 calibre rifle. One of the snakes measured 7 ft. 6 ins, the other 6 ft. 8 ins. After shooting the reptiles Arthur skinned them. The skins are exceedingly beautiful, and makes elegant belts or slippers for ladies. —Enterprise.

J. Nelson, who lives three or four miles east of Ayton, had a couple of sheep killed one night of last week and naturally concluded that dogs were the offenders. The next night we understand his milk cans were emptied and from the tracks about he became suspicious that it was a very large kind of a dog that was about and he sent word to Jim Peters, a neighbor and a noted hunter of by gone days. It did not take Peters long to decide that the marks were bear tracks and he armed himself with his gun and started off. Pretty soon a report of a shooting iron was heard and on investigation a big four hundred pound bear was found mortally wounded by Peters. Bruin was on exhibition at Ayton on Sunday. —Post.

One of those pleasing events which gives pleasure to so may took place at the residence of Mr. Richard Parslow of Swinton Park on Tuesday, June 9th, the occasion being the marriage of his youngest daughter, Miss Sara E. to Mr. Percy Lawrence of Bury, Quebec. The Rev. Hartley officiated. Mr. George Parslow filled the position of groomsman while the bride was assisted by her cousin, Miss Minnie Parslow. The bride and bridegroom were tastefully costumed in cream cashmere trimmed with chiffon and wore boquets of paragonia blossoms. Miss M. Hardy played and with the assistance of Mr. John Shaw on the clarionet furnished music for the afternoon entertainment of the guests. A large number of friends witnessed the ceremony and after the wedding a most sumptuous dinner was served. The happy couple left on the afternoon train for Ottawa and other places. Many and costly were the presents, the bride being one of the most popular young ladies in the neighborhood.—Herald.

AYER'S Hair VIGOR

Restores natural color to the hair, and also prevents it falling out. Mrs. H. W. Fenwick, of Digby, N. S., says:

"A little more than two years ago my hair began to turn gray and fall out. After the use of one bottle of Ayer's Hair Vigor my hair was restored to its original color and ceased falling out. An occasional application has since kept the hair in good condition."—Mrs. H. F. FENWICK, Digby, N. S.

Growth of Hair.

"Eight years ago, I had the varioloid, and lost my hair, which previously was quite abundant. I tried a variety of preparations, but without beneficial result, till I began to fear I should be permanently bald. About six months ago, my husband brought home a bottle of Ayer's Hair Vigor, and I began at once to use it. In a short time, new hair began to appear, and there is now every prospect of as thick a growth of hair as before my illness."—Mrs. A. WEBER, Polymnia St., New Orleans, La.
