A Common Affliction

Permanently Cured by Taking

AYER'S Sarsaparilla

A CAB-DRIVER'S STORY.

"I was afflicted for eight years with Salt Rheum. During that time, I tried a great many medicines which were highly recommended, but none gave me relief. I was at last advised to try Ayer's Sarsaparilla, by a friend who told me that I must purchase six bottles, and use them according to directions. I yielded to his persuasion, bought the six bottles, and took the contents of three of these bottles without noticing any direct benefit. Before I had finished the fourth bottle, my hands were as

Free from Eruptions

as ever they were. My business, which is that of a cab-driver, requires me to be out in cold and wet weather, often without gloves, and the trouble has never returned."—THOMAS A. JOHNS, Stratford, Ont.

Priceville, June 2, '96.

Grasshoppers

"A Friend of Farmers" writes from L'Assomption, Que., stating that grasshoppers have appeared in large numbers, and that there is much anxiety lest they should increase and do as much harm as they did last year. He suggests that the same useful remedy, Paris green, which is employed to such good effect against potato beetles and all other biting insects, might be used against these beasts also, by putting the poisons on the leaves of trees and distributing the branches through the fields. I am rather doubtful whether this remedy could be adopted to any large extent, but experiments might be tried by spraying or dusting grass or other vegetation with a strong mixture of Paris green and scattering it with a pitch fork in such places as the insects are found to infest most, as is done for cutworms. The insects which are generally known as grasshoppers, belong to three distinct species, and would be more accurately designated by the word "locusts." Probably the only practical treatment which can be applied to large areas is to make use of the implements which are now well known through the West as "hopper-dozers." The following is from the Report of the Dominion Experimental Farms, 1895:

"Excellent results have followed the use of the implements called "hopper-dozers." When young locusts are observed to occur abundantly in June, it certainly will repay all time, trouble and expense to use them, from the increased crop which will be saved. They must be used early in the season, because the locusts become full grown by the end of June and are then able to fly long distances from place to place. I give herewith a simple plan from which one of these implements can be easily made. The following extracts are from Prof. Herbert Orborn's writings and set forth plainly the advantages and the manner of making and using a hopper-dozer.

"In meadows and pastures we believe the use of the hopper dozer the most practical plan that can be recommended. In many cases it can be used to capture these and the leaf-hoppers at the same time, especially if used when grasshoppers are still quite small and can be held by a thin layer of coal tar used on the simple flat sheet of iron. When larger they need a deepper layer of coal tar, or a pan of water with a covering of coal oil on it. A cheap and simple plan for this purpose, costing but from $1.50 to $2, was described many years ago by Prof. Riley. It consists of a strip of sheet iron 8 or 10 ft. long, turned up 1 inch in front and 1 ft. behind, with pieces soldered in at the ends (or made of wood) and hooks placed in front at the ends for the attachment of ropes. If to run on rough ground, it will be better to put runners 1½ or 2 ins. high underneath. Into this put a layer of coal tar half an inch deep, or water and kerosene. It can be drawn by a boy at each end, or by horse power if preferred.

"To treat pastures and meadows for grasshoppers and leaf-hoppers, it would seem from present experience the best plan to run over all grass lands early in May with the simple dozer described for leaf hoppers (a piece of sheet iron 8½ feet long and 2 feet wide, was coated on the upper side with coal tar, and lying flat on the sod was dragged along by means of three cords, one fastened at each end and one in the middle) Pastures should be treated a second time about the middle of June. For meadows, the second treatment may follow hay cutting, if insects are abundant, and then, if grasshoppers appear in July in numbers resort to the deep hopper-dozer described above. (Bull. 14, Iowa Ag. Exp. Station, p. 176.)

Summarizing the result of his experiments with leaf-hoppers, the same writer says: "Experiments with hopper-dozers for grass leaf-hoppers show that this method can be used very successfully in capturing the insects, that the simplest form, a flat sheet of sheet iron, was most satisfactory, that one application resulted in adding 34 per cent. to the crop of hay on a plot experimented on, and in one experiment leaf-hoppers were captured at the rate of 376,000 per acre.

These results are most striking, and one cannot but feel convinced that it would pay well to adopt systematically such a simple and cheap method of freeing pastures of the myriad insects which reduce the yield every year."

Hon. John Beverley Robinson, ex-Lieut. Governor of Ontario, dropped dead while attending a Tupper political meeting in Massey Hall, Toronto, on Friday night last, aged 76 years.

County and District

The editor of the Hanover Post has had a basket of green peas presented him. This is early.

CURIOSITIES.—A Tavistock man has a chicken with four legs and four wings. Barrie claims to have the tallest boy in America. His name is Arthur B. Thompson. He is 17 years of age and stands 7 feet and 3 inches.

The late John Livingstone, of Listowel, was at his death, the richest man in the County of Perth, his estate being valued at $500,000. In addition to this his life was insured for $500,000. Thirty-five years ago he landed in Canada, a poor Scotch lad without a second suit of clothes.

Mr. John Hamilton's residence, at Hamilton's Hill, near Chatsworth, was burned Sunday week. The main building was a substantial brick, and there was $650 insurance on building and contents, which will not nearly cover the loss.

John Wilson, of West Luther, had Michael Manion of the same township up before Mayor Colcleugh the past week charged with killing his dog. The two men are neighbors. The defendant pleaded not guilty. The evidence was, however, against him, and his worship fined Manion $2 and $13.35 costs and to pay besides $10 for the dog. In all, a $5 hot.—Rep.

It has been asked how many votes a candidate must secure to save his deposit of $200. The statute provides that the $200 deposit shall be returned to the candidate making it, "in the event of his being elected or of his obtaining a number of votes at least equal to one half the number of votes polled in favor of the candidate elected, otherwise it shall belong to her Majesty for the public uses of Canada; and the same shall be applied by the Returning Officer toward the payment of election expenses."

John Marr, an old man who resides at Southwold station, nearly chocked to death at the Penwarden House, St. Thomas, Thursday. John is toothless, and he endeavored to swallow a piece of meat about 4 inches long, 2 inches wide and half an inch thick. Naturally the meat got stuck in his throat, and for a few minutes John was nearly dead. Dr. Gustin was hastily summoned and succeeded in pulling the meat from the man's throat.

House and Lot For Sale

For sale cheap, on easy terms that comfortable residence on Mary St. Flesherton, containing 8 rooms and wood shed, with hard and soft, water pumps, both under cover, beautiful garden and orchard also well finished stable and drive house 28 x 24 ft. Apply to J. E. MOORE, Furniture dealer.

Result of a Neglected Cold. DISEASED LUNGS

Which Doctors Failed to Help,

CURED BY TAKING

AYER'S Cherry Pectoral.

"I contracted a severe cold, which settled on my lungs, and I did what is often done in such cases, neglected it, thinking it would go away as it came; but I found, after a little while, that the slightest exertion pained me. I then

Consulted a Doctor

who found, on examining my lungs, that the upper part of the left one was badly affected. He gave me some medicine which I took as directed, but it did not seem to do any good. Fortunately, I happened to read in Ayer's Almanac, of the effect that Ayer's Cherry Pectoral had on others, and I determined to give it a trial. After taking a few doses my trouble was relieved, and before I had finished the bottle I was cured."—A. LEFLER, watchmaker, Orangeville, Ont.
