SPOTS OF SPORTS

By FRANK MANN HARRIS
("A Sixbit Critic")

In this space recently we quoted a gentleman who is getting rather tired of trying to sponsor small-town hockey, and who gave some of his views as to what ails amateur hockey in general. In this connection it is rather interesting to note a statement from Mr. George Panter, President of the Ontario Hockey Association, a body that is widely self-heralded as the greatest amateur hockey organization in the world—or maybe that should be the universe.

* * *

Out in Winnipeg for the junior playoffs, Mr. Panter was greatly shocked at the mere suggestion that the poor, hard-worked Toronto St. Mikes should travel all the way to Edmonton for one game of that series. Matter of fact, he seems shocked that the St. Mikes should have to travel from their own cosy fireside at all. "It only serves a minority interest," says Mr. Panter. "The teams and players all want to travel east and play in Maple Leaf Gardens. They benefit financially by such an arrangement.

* * *

The President of this great AMATEUR association went on to say that the participating clubs stand to lose something like 25 G's by having the junior finals in Western Canada this year. He seems to overlook completely the fact that those western fans, whose loyal support throughout the season kept those teams going, just possibly rate a break once in a while, and deserve a chance to see their favorites in playoff action without having to travel halfway across a continent. Maybe Mr. Panter, in his touching zeal for the welfare of the M.L. Gardens, has forgotten that ordinary citizens cannot pick off railway tickets as painlessly as do Presidents who travel on an expense account.

* * *

Just as eels become accustomed to skinning, sports writers are supposed to get hardened to seeing their predictions go haywire. But for once we were really glad to see one of our prognostications go wide of the target, when the Brooklyn Dodgers finally decided to give Jackie Robinson a chance at the big show. Whether or not he's able to stick up there may depend, in a large measure, on the sort of co-operation he gets from his teammates—as an unpopular or unwanted player can be made to 'look bad' in scores of ways almost impossible to detect with the naked eye. But Robinson has loads of natural ability—enough, perhaps, to overcome the handicap of playing out of his proper position; and thousands of Canadian fans, who admired not only his hitting and fielding but also the way he conducted himself in general, are pulling hard for him to make it.

At the present time of writing it looks as though there is a real possibility of a Canadian horse—Canadian-owned, that is—winning the Kaintucky Dubby, suh! Which recalls the last time, in fact the only time, that such a thing happened before. That was in 1919, when Sir Barton, owned by J. K. L. Ross of Montreal, and one of the few maidens ever to turn the trick, popped down in front of eleven other starters, paying off at odds of 13 to 5. (What a marvellous memory? What a handy record book!)

Only 3.6 per cent. of the land in Norway is under cultivation; the rest is unproductive or forest.

New Alloy Used In Watchmaking

If you have bought an Elgin watch since Jan. 1 of this year, you have a mainspring which, it is claimed, will not rust, is non-magnetic and will run from 2 to 6 hours longer without winding than other watches.

This is due to a new alloy called "Elgiloy" developed after 12 years of research by the Elgin National Watch Company. Called "the most important development in watches since jewelled bearings were introduced 243 years ago," Elgiloy is expected to have applications in many other fields. Razor blades, stainless cutlery, gunsprings and electronic appliances may all be improved by the new alloy.—Financial Post.

Plastic Air Cushion

Air cushion of fused plastic comes in translucent or bright opaque colors; folds to pocket or purse size and can be inflated easily by mouth. Makers claim use for picnics, spectator sports, boats and cars and for invalids.
