HANDS AT WORK...
LEARNING MOTOR VEHICLE REPAIR

ONTARIO'S progress and prosperity are directly dependent on her ability to produce goods in sufficient volume to meet domestic needs and the demands of world markets. To keep production lines moving requires thousands of vehicles, powered by gasoline and diesel engines . . . and these vehicles must be maintained in first-class condition. Skilled maintenance men and operators are needed to keep a smooth and increasing flow of raw materials moving to industry . . . to move workers to their jobs . . . to speed produce to market. For those who master such skilled occupations higher wages, job security and better working conditions are within easier reach.

Today, through the plan sponsored by the Department of Veterans' Affairs and other agencies, thousands of young workers are being trained to meet the needs of motor vehicle trades and other industrial needs of the province. Graduates of these rehabilitation courses are now ready to take their places in Ontario's industry. Available to you are veterans, well started on the road to skilled motor trades such as motor mechanics, service management, service station operation, diesel mechanics and operation. Seek them out with confidence. They are your future craftsmen.

DIESEL MECHANICS

The Diesel Course offers exceptional opportunity for the average experienced motor mechanic. Shop work, with a combination of theory, covers all phases of operation, and is designed to give the student all essentials for proper diesel engine maintenance. Course available at Hamilton only.

Vocational training courses in the arts, professions and trades are offered at training centres located in the following cities and towns in Ontario: Toronto, Hamilton, Kitchener, Windsor, Ft. William, Brockville, North Bay, Ottawa.
