Weak Women

To weak and ailing women, there is at least one way to help. But with that way, two treatments, must be combined. One is local, one is constitutional, but both are important, both essential.

Dr. Shoop's Night Cure is the Local.

Dr. Shoop's Restorative, the Constitutional.

The former—Dr. Shoop's Night Cure—is a topical mucous membrane suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerve, all tissue, and all blood ailments.

The "Night Cure", as its name implies, does its work while you sleep. It soothes sore and inflamed mucous surfaces, heals local weaknesses and discharges, while the Restorative, eases nervous excitement, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—Tablets or Liquid—as a general tonic to the system. For positive local help, use as well

Dr. Shoop's Night Cure

A Hair Dressing

If you wish a high-class hair dressing, we are sure Ayer's Hair Vigor, new improved formula, will greatly please you. It keeps the hair soft and smooth, makes it look rich and luxuriant, prevents splitting at the ends. And it keeps the scalp free from dandruff.

Does not change the color of the hair.

Formula with each bottle
Show it to your doctor
Ask him about it, then do as he says

Ayer's

At the same time the new Ayer's Hair Vigor is a strong hair tonic, promoting the growth of the hair, keeping all the tissues of the hair and scalp in a healthy condition. The hair stops falling, dandruff disappears. A splendid dressing.

—Made by the J. C. Ayer Co., Lowell, Mass.—

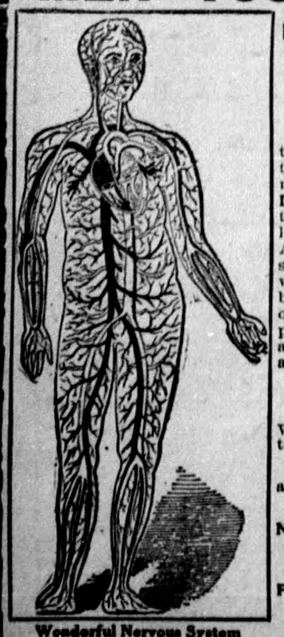
MEN-YOU NEED NERVE



Wonderful Nervous System

EARLY INDISCRETIONS AND EXCESSES HAVE UNDERMINED YOUR SYSTEM

The nerves control all actions of the body so that anything that debilitates them will weaken all organs of the system. **Early Indiscretions** and **Excesses** have ruined thousands of promising young men. **Unnatural Drains** sap their vigor and vitality and they never develop to a proper condition of manhood. They remain weaklings, mentally, physically and sexually. **How you feel?** Are you nervous and weak, despondent and gloomy, specks before the eyes with dark circles under them, weak back, kidneys irritable, palpitation of the heart, bashful, debilitating dreams, sediment in urine, pimples on the face, eyes sunken, hollow cheeks, careworn expression, poor memory, lifeless, distrustful, lack energy and strength, tired mornings, restless nights, changeable moods, premature decay, bone pains, hair loose, etc.

This is the condition our New Method Treatment is GUARANTEED TO CURE

We have treated Diseases of Men for almost a lifetime and do not have to experiment. Consult us **FREE OF CHARGE** and we will tell you whether you are curable or not.

We guarantee curable cases of NERVOUS DEBILITY, VARICOSE VEINS, BLOOD AND SKIN DISEASES, GLEET, BLADDER URINARY AND KIDNEY COMPLAINTS

Free Booklet on Diseases of Men. If unable to call write for QUESTION LIST FOR HOME TREATMENT

Results of Co-Operative Experiments With Autumn Sown Crops.

Four hundred and ten farmers throughout Ontario conducted experiments with autumn sown crops during the past year. Reports have been received from thirty-six of the counties of the Province. Those counties which furnished the greatest number of good reports of successfully conducted experiments were Middlesex, Huron, Brant, Norfolk and Muskoka. The experiments deserve great credit for the good work which they have done, not only for themselves but for the farmers generally. Average results of the carefully conducted co-operative experiments with autumn sown crops are here presented in a very concise form.

Winter Wheat. Four varieties of winter wheat were distributed last autumn to those farmers who wished to test some of the leading varieties on their own farms. The average yields per acre of straw and of grain are as follows: Imperial Amber, 1.4 tons, 24.1 bus.; Abundance, 1 3 tons, 23.9 bus.; Bulgarian, 1.2 tons, 21.9 bus.; and Nigger, 1 4 tons, 21.9 bus.

The Imperial Amber gave the greatest yield per acre in the co-operative experiments throughout Ontario in 1907 and in 1907 and in 1908, as well as in 1909. It also came first in popularity with the experiments in each of these years. The Imperial Amber will again be distributed throughout Ontario this autumn as one of the varieties for co-operative experiments. We distributed the Dawson's Golden Chaff for co-operative experiments throughout Ontario in each of twelve years, but not within the last three years. According to extensive inquiries which we have made this year, the Dawson's Golden Chaff is still the most popular and the most extensively grown variety of winter wheat in the province.

Winter Rye. The agerage yield of grain per acre of each of three varieties of winter rye, distributed in the autumn of 1908, is as follows: Mammoth White, 28.1; Common, 25.1; and Washington, 19.6. In the experiments throughout Ontario, the Mammoth White surpassed the Common rye by an average of 5 bus. per acre in 1907, 5.4 bushels per acre in 1908, and 6 bushels per acre in 1909.

Fertilizers with Winter Wheat. In the co operative experiments with different fertilizers applied to winter wheat, the average yields of grain per acre for five years are as follows: Mixed Fertilizer, 25.2 bus.; Nitrate of Soda, 23.8 bus., Muriate of Potash, 22.9 bus.; and Superphosphate, 22.7 bus. The unfertilized land gave an average of 19.9 bus. per acre. The Superphosphate was applied at the rate of 320 pounds and the Muriate of Potash and Nitrate of Soda each 160 pound per acre. The mixed fertilizer consisted of one-third of the quantity of each of the other three fertilizers here mentioned. The usual cost of the fertilizers as used in this experiment is between four and five dollars per acre.

Fodder Crops. In each of six years, the seed of Hairy Vetches and of Winter Rye has been distributed throughout Ontario for co-operative experiments in testing these crops for fodder purposes. In the average of six years' experiments the Hairy Vetches produced slightly the largest yield of green fodder per acre, but in 1900 the largest yield was produced by the Winter Rye.

Distribution of Material for Experiments in 1909

As long as the supply lasts, material will be distributed free of charge in the order in which the applications are received from Ontario farmers wishing to experiment and to report the results of any one of the following tests: 1, three varieties of Winter Wheat; 2, two varieties of Winter Rye; 3, five Fertilizers with Winter Wheat; 4, Autumn and Spring applications of Nitrate of Soda and common Salt with Winter Wheat; 5, Winter Emmer and Winter Barley; 6, Hairy Vetches and Winter Rye as fodder crops. The size of each plot is to be one rod wide by two rods long. Material for numbers 3 and 4 will be sent by express and that for the others by mail.

O. A. C., Guelph, Ont., Aug. 18th, 1909.

C. A. ZAVITZ.

John Morrow, an emigrant employed by George and James Duke of Mono Mills, lit off the other day with a valuable horse, saddle and bridle. On Friday morning they drove into a farm house in Trafalgar to make the usual enquiries and were surprised to find their man sitting at breakfast. His coat and hat were hanging on a hook near the table. As soon as he saw them he sprang from the table and took from his pocket a loaded revolver, at the same time declaring that he would shoot either or both of them if they molested him. He did not try to escape and after some conversation they persuaded him that his wisest course was to give himself up and be taken back to Orangeville with the promise that they would not be too hard on him. They all got into the buggy and started on the return trip. On going up the Caledon mountain, Murray jumped out of the rig, and, it is charged, drew a revolver and swore that he would go no further. His captors were armed, but were unwilling to risk bloodshed, and the prisoner got away.

Dundalk.

We notice by the Arcola, Sask., paper that Dr. Reg. Grier, who first located at Kisbey has moved to Arcola, a larger centre. He has met with considerable success in surgery and his services are in large demand. We are pleased to note the success of a former Dundalk boy.

Dundalk school board has engaged Miss Dahl of Dutton as principal, at a salary of $650 per annum. Miss Dahl holds a first class professional certificate. Miss Draper of Arthur has been engaged at a salary of $400 for the primary department.

The butcher business conducted for over 27 years by W. T. Rundle was sold last week to Joseph J. Smith of Shelburne. In disposing of the business Mr. Rundle does not contemplate leaving town, at least for the present, but will become a wholesale dealer in meat, shipping to Toronto chiefly.

The well at the electric power house has the habit of going dry about this season every year, so the village council decided to drill deeper with the hope of striking a better spring. A Markdale outfit is at work since last Thursday and fair progress is being made. The light shines only when water is drawn in by tank to the boiler, so villagers are some nights brought back to the olden times when the tallow dip was the best going and when the electricians' dreams were laughed at.—Herald.

The longer man inhabits the earth, the more of its products does he discover to be edible. One of the latest things to be made into a food is alfalfa. A club of young college men has been making practical tests of the palatability of that grass, and has pronounced it excellent, as cattle already know it to be.

Electrification of the Grand Trunk Pacific Railway from the St. Lawrence River to Monckton is being considered. A water-power site capable of generating upward of 100,000 horse-power, greatly in excess of the requirements, has been selected at Grand Falls on the St. John River, nearly equidistant from the two points between which electrification is proposed.

THE OWEN SOUND

Collegiate - Institute.

RE OPENING

Tuesday, September 7th, 1909

The Owen Sound Collegiate Institute will reopen for the Fall Term on Tuesday, Sept. 7th, at 9 a. m., when pupils will be enrolled and classified and classes organized for the General Course; the Commercial Course for all grades of Teachers' Certificates; for pass and honor Matriculation, and for entrance into all the learned professions.

STAFF AND EQUIPMENT—The staff consists of thirteen teachers, ALL SPECIALISTS and men of the highest professional standing. The equipment is thoroughly modern and among the best in Ontario.

MANUAL TRAINING AND HOUSEHOLD SCIENCE

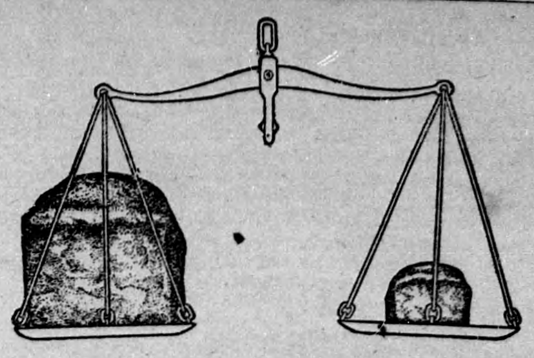
Rooms have been thoroughly equipped, and the students of the lower forms receive instructions in the important departments.

COMMERCIAL COURSE—To meet the demand for a better commercial education, the Board has thoroughly equipped a Commercial department, and instruction is given in the several subjects required for a good business education, including practice in Shorthand and Typewriting. The student who successfully completes this course is granted a diploma by the Collegiate Institute Board.

TERMS—Town pupils, $8.00 to $12.00 per year; all others $10.00 per year.

For annual Announcement or other information, apply to

THOS. MURRAY, Principal,
Jno. RUTHERFORD, Sec'y-Treas.



The light bread or the leaden loaf is a matter of *choice*—not luck. Choice of method—choice of yeast—but, above all, the choice of the *flour*.

Royal Household Flour

is made from the finest, selected Manitoba wheat, which contains more gluten (that quality which makes bread light) than any other wheat.

It is milled under the most sanitary conditions,—there is no other flour in Canada upon which so much is spent to insure its perfect quality.

Ask your grocer for Ogilvie's Royal Household—the flour that makes light bread and perfect pastry.

Ogilvie Flour Mills Co., Limited, Montreal. 15

Jas. Pattison, Ceylon, Ont.

General Merchant.
