Creamery News

A new cream season is at hand Production is very satisfactory — considerably exceeding last year's make. As usual we are giving the cream producer the BEST possible possible service and the GREATEST possible returns.

Eggs

Recently a considerable decline in the grade of eggs has been noticeable — due to the warmer weather and to much grass being available to the laying hens. Cutting down on the daily grazing period of the hens, more frequent collections of eggs and rapid cooling of same is, in our opinion, the best solution for a better grade.

For your convenience, the Creamery will be open Wednesday and Saturday evenings ten o'clock.

The Cornish Brief demonstrates

MR. DREW UNWISE TO BEGIN TINKERING WITH EDUCATION

Writing to the Globe and Mail, Prof. Cornish says, "He (Mr. Drew) would be very unwise to begin tinkering with the system until the Commission reports." It would be more correct to say, Mr. Drew **WAS** very unwise to begin tinkering with the Educational System at all, either before the Commission was appointed or since.

Mr. Drew appointed himself Minister of Education in 1943 and started "tinkering" with School Grants, compulsory "Religious Instruction," and under-cover salary boosts for teacher-nuns from the start, not waiting for the Commission to report and not giving the general public a chance to become acquainted with the implications of his new Separate School Policy.

Mr. Drew's Regulation 12, of December, 1944

provides for payment of

UP TO 95%

of Separate School Costs out of Public Funds

"The method of distribution of the Legislative Grant to rural Public and Separate Schools, **INTRODUCED IN 1945, makes** the lowness of assessment per classroom the whole determining factor."—Cornish Brief, Page 17.

"The consequence of these methods is that the lower the assessment and, consequently, the poorer the school, the larger the Grant. Indeed, in many of the very poorest schools, the Legislative Grant covers **FROM 90 to 95 PER CENT.** of the total Current and Capital Expenditure."—Cornish Brief, Page 17.

"All that was required was **FIVE** (Roman Catholic) heads of families, in a school section, in contrast with a Public School Section which must contain **FIFTY** children in order to form a Public School. These **FIVE** heads of families can carve out their Separate School organization anywhere. . . . These **FIVE INDIVIDUALS** do not require the consent or even the knowledge of the Public School Board, Township Council or Minister of Education.

"Now that the necessity of having to support such schools when formed has been practically removed, there is **BOUND TO BE A MUSHROOM GROWTH** of these exotics, and the Roman Catholics have already an extensive campaign under way. The poorer the schools are going to be, the more attractive is the demand for building; if they can keep the assessment low enough, the Legislative Grant will look after **FROM 90 to 95 PER CENT.** of the cost and only five to ten per cent. will have to be collected by local taxation. These foundlings, as soon as born, can be laid on the door-step of a **GENEROUS DEPARTMEN OF EDUCATION.**"—Cornish Brief, Page 19.

"We are strongly opposed to the continuation of the power on the part of Roman Catholics to form schools, which are feeble and would be poverty-stricken if they were not supported **UP TO 90 or 95 PER CENT.** from government funds."—Cornish Brief, Page 12.

We Will Gladly Send You Plans of How to Help Combat the Betrayal of Ontario's Public Schools
