Co-operation, Please

It is essential that more care be given cream during the hot weather.
Here are several hints which will help you and help us to maintain our high standard of quality butter:

1. Cool cream as rapidly as possible after separating. This can be done by placing the cream container in a vessel of cold water in the basement.
2. Send cream in by trurk or deliver at least twice a week.
3. Keep all dairy utensils in best possible sanitary condition.
