

**M. E. DICKERSON TO BUILD  
25-APARTMENT BLOCK AT  
NORTH BAY—LINDSAY LABOR**

One of the most modern and up-to-date apartment houses to be erected within the next few months will be the North Bay Arms, and the General Contractor will be M. E. Dickerson of the M. E. Dickerson Construction Company Limited, North Bay.

The new apartment block, which will be 65 feet along the front, will have a depth of 124 feet. It will be located at the corner of Fisher and Wellington Sts.

It is understood that it will be the first apartment house in Canada to have the new heating system known as Radiant Heating, with the concealed pipes running like huge coils under the floors, the walls and above the ceilings.

The building will be built of faced brick, backed with structural tile, with steel window casements.

The cost of the new apartment is estimated at \$70,000 and the plans have been drawn by Mr. John T. Allan, architect, 12 William St. N., Lindsay.

Mr. Dickerson states that he will be the general contractor and that he will use Lindsay labour.
