CREAM
Cream production is good as we are approaching the time of year when cream production starts to go back. We advise you to start feeding the cows extra, as butterfat is going to be a good price during the fall and winter months.
EGGS
Eggs are now a good price, but declining in quality due to warm weather. Cutting down on the grazing period, more frequent colllection of eggs and rapid cooling of same is, in our opinion, the best solution for a better grade.
POULTRY
We are in the market for poultry at all times and can pay good market prices.
For your convenience the Creamery will be open Wednesday and Saturday evenings testtng cream unutil 10 o'clock.
