are for the sole purpose of guiding prospective investors, and, if possible, of saving them from losing money through placing it in "wild-cat" enterprises. The impartial and reliable character of the information may be relied upon. The writer of these articles and the publisher of this paper have no interests to serve in connection with this matter other than those of the reader.

(By "Investor")

After bank stocks the Canadian investor has a long list to choose from. So far, in the country's history, the well managed trust companies' and loan companies' shares have been entirely satisfactory—far more so than bank shares—and very profitable; though sometimes of rather narrow market. But the danger of making the mistake and buying shares in some of the ill-managed or new companies is great enough to make it scarcely wise to give these a prominent place.

Public utility companies' shares were at one time prime favorites with the Canadian investor; but the competition of the Hydro-Electric Commission of Ontario has put these stocks out of favor. And, indeed, an investor was unfortunate who held shares in the smaller companies, such as the London Electric, in which competition by the government has wiped out about 90 per cent. of the shares' value. Before the Hydro-Electric entered London the stock of the London Electric Company sold as high as 134, in 1899, and 97 in 1904. Since then it has sold around 15, and it is doubtful if one could get much more for it. I know one widow unfortunate enough to have 25 shares, which cost her about $3,000.00, now worth but little more than $350. No doubt the march of progress justifies this; but we

"My little son had a very severe cold. I was recomended to try Chamberlain's Cough Remedy, and before a small bottle was finished he was as well as ever," writes Mrs. H. Silks, 29 Dowling Street, Sydney, Australia. This remedy is for sale by all dealers.

Considerable loss has been sustained by private parties by fencing being swept away and debris being deposited on their fields. In some cases considerable real estate has changed hands without consideration or conveyancer's services, and some has changed from one concession to another. Ditches, culverts and bridges were little respected by the ice-crammed, frantic torrents.
