WHAT EVERY ONE SAYS MUST BE TRUE.

All unite in praise of Dr. Fowler's Extract of Wild Strawberry who has tried its efficacy in curing Cholera Morbus, Cramps, Dysentery, Nausia, and Stomach and Bowel Complaints, generally in children or adults. Every person should keep a supply on hand.

We notice one of those beautiful shade trees in front of Mr. Edward Davis' residence has been broken down, and we understand the parties are known who did it. The law is very strict, and the punishment severe for such work. We would like to see it put in force. The trees are certainly being no person any harm, while they add very much to the appearance of the place.

SOOTHING SYRUPS SUPERCEDED.

Dr. Fowler's Extract of Wild Strawberry is the best remedy for infants teething, it is safe, pleasant and reliable, and cures promptly all forms of Bowel Complaints. For Canadian Cholera or Cholic and Dysentery of either children or adults there is no better remedy.

The Sabbath School Anniversary of the Methodist Church came off on the 11th inst. The weather being favorable there was a fair turn out, yet not as many present as there should be on such occasions. There was good order throughout, and the dialogues and singing were got through with in a creditable manner. Rev. Mr. A. B. DeMill, President of Oshawa Female College, gave a short address, after which the entertainment was brought to a close.

The Ladies are invited to inspect the new Omba Ribbons, Plushes, Plush Hats, and Lace Novelties opening at McFARLAND'S.

C. W. Speers bought 20 head of cattle at the fair held in Flesherton on Monday last, and drove them to Markdale to be shipped. How is it that our enterprising village has not secured for itself the privilege of holding a monthly Cattle Fair. It is easy of access from all parts of the County, and no place enjoys better facilities for shipping. We hope this matter will be attended to at once, and measures taken to secure the establishment of such fairs at once.

WOULD NOT BE WITHOUT IT

One who has fairly tested Dr. Fowler's Extract of Wild Strawberry, though prejudiced against proprietory medicines in general, writes—"I would not rest over night without this reliable remedy for sudden attacks of Cholic, Cramps and Cholera Morbus so prevalent in the summer season. I keep a bottle ready at hand."

The Bazaar and Concert held by the Ladies' Aid Association of the Presbyterian Church, Flesherton, on Fair Day, was a decided success. The greater portion of the fancy and useful articles at the Bazaar were disposed of, and a good dinner was served up for 15c each. We understand the Concert was well attended. The proceeds of the whole amounted to the handsome sum of $[illegible].

A SAFE REMEDY.

Many medicines check too suddenly attacks of Bowel Complaints, inducing dangerous inflammation, Dr. Fowler's Extract of Wild Strawberry, cleanses, strengthens and heals the diseased and weakened mucuous surfaces of the Stomach and Bowels, and safely cures every form of Summer Complaints.

Now that the fall shows are past for this year, would it not be a good move to take steps towards purchasing a piece of land for a show ground. The fair has perhaps reached its best until something is done in the above direction. We have no doubt that if there was a piece of land purchased, properly fenced and a hall built, that the extra receipts at the gate would in a few years pay for the whole. Would it not be wise to have a meeting called of members of the society and others interested for the purpose of considering the matter. Let us hear your views on the matter.

With the steady march of improvement in science and mechanics, medicine has kept even pace. It now gives us remedies in a perfection of form and composition that the crudities of earlier medical science never approached. Among the most effective of medicines are Dr. J. C. Ayer's Pills—beautiful, sugar-coated, glistening globules—universally known and used as a reliable family physic. These pills possess great efficacy as a preventive of, or cure for the diseases incident to this section of the country; especially diseases of the stomach, liver and bowels, which often result in dangerous fever. They also give vigor to the circulation, remove constipation, create an appetite, and aid digestion, there by promoting health. Their ingredients are entirely vegetable, and they are a safe remedy in the hands of the most inexperienced.—*Macon, Ga., Telegraph & Messenger.*

WE are pleased to notice in a late issue of the *Presbyterian* the evidently great success which has attended the labors of a student of our acquaintance, Mr. W. H. W. Boyle, who has been engaged during the summer supplying the pulpit of an absent minister at London. Mr. Boyle, while pursuing honor courses in Toronto University in both mental and moral science and Oriental languages, has been in the pulpit almost every Sabbath during his vacations of the past three years. Under such heavy and continued stress his health seems to be excellent, and our young friend goes back to college in the course of a week, followed by the good wishes of the community at large, for his future usefulness in the noble work to which he has been called. We may add that on his departure from London to take the Classes formed by deputations from two Bible classes, which he conducted during the summer, and presented with the handsome sum of $68, accompanied by two feeling addresses, expressive, says the above-named journal, of their appreciation of his deep zeal and earnestness in presenting the truths of God's word. —Con.

DUNDALK.

(From the Herald.)

SINCE our last issue of the *Herald* the weather has put on a fall appearance, and is giving a gentle warning to prepare for winter.

Our grain warehouses are overstocked, and our grain buyers are complaining for want of cars to ship their grain.

W. H. Peterson's new Woollen factory is in progress, under management of John Marshall.

Several of our villagers are complaining of light bread—we always like light bread, but make it a little heavier.

Our village school house requires some repairs before the winter sets in. We would like to see a porch put in front of each door, and some banking done as it would make the school more comfortable. Let our town fathers see to this at once.

We are surprised that a few of our farmers refuse to take the *Herald*, which gives all the latest news about their village, when we consider the fact that the *Herald* is the largest and cheapest local paper in the county, being only $1 to Jan. 1883.

Alex. McCannell has just completed a very neat dwelling for Mrs. Stewart, on Owen Sound street.

There is an apple tree in the Township of Melanchton in full bloom. Last week ripe strawberries, this week apple blossoms—what county can beat this.

The Fruit Festival and popular Entertainment, under the auspices of the young Ladies of the Presbyterian Church, Dundalk, in aid of the Organ Fund, which was held on Friday evening in the Orange Hall, was a decided success, the Hall being filled, and all persons present seemed heartily to enjoy themselves. Great credit is due to Miss. L. Graham and Miss. C. Philips for their persevering exertion in getting up the entertainment and being the first in taken steps in having the debt on the Organ paid. The following is the Programme of the evening:—Duet, Mr and Mrs Ketchum; Reading, Mr. Deans; Solo, Miss C. Philips; Recitation, Mr Brown; Duet, Miss Rundle and Miss Philips; Reading Mr Deans; Duet, Miss Graham and Miss Rundle; Reading, J J Combie; Duet, Miss Philips and Mr W Rendle; Recitation, Mr Brown; Solo, Mrs Ketchum; (Encore) Solo, Mrs Ketchum; Reading, Mr C Graham.

A FINANCIAL STORM FEARED.—"Storm signals are being hoisted in the city," says the *Spectator*, "with respect to America. The New York exchange still makes remittance profitable, and and the Bank of France, loaded with silver which it cannot sell, is unwilling to part with gold to anybody. The demand from America, the demand from France, and the demand from anxious bankers, therefore, fall upon the Bank of England. Altogether the rate of discount has been put up to five per cent. All stock exchange values are falling, and if anything gives way, or if the mad speculation in Paris is checked, there may be a bad quarter of an hour in the city, and money may be at eight per cent. before long. Trade is good and the revenue flourishing, but very good stock has been forced up to the extreme point at which investors will bid with money cheap, while in Paris people are buying shares especially bank shares, at prices as ridiculous as those of Mississippi stock. That cannot last, especially with the panic about Egypt hanging over the markets, and the French Government moving eighty thousand men in a serious campaign. We profess to know no secrets, but the signs of trouble increase."

FLESHERTON.

From a Correspondent.

I miss the Flesherton correspondence to the STANDARD the past two weeks; and as your own correspondent has become the chief of the scribes, I thought might be permitted to fill his place in the meantime.

The Richardson block adds very much to the appearance of the business portion of the village. It contains three shops two of, which are already occupied, one by Mr. Gorden, the other by Mr. Doll; the third when finished will be occupied by the Wm. Lucas Banking Co.

A well is required in the show grounds, that people can pump and drink Adam's ale if they like.

Mr. M. Aikitt, of Eugenia, is putting a 35 inch level wheel into his grist mill, and has overhauled the basement and built a new bulk head.

There are large quantities of potatoes going to the Station. Mr. Robertson has bought over three thousand bushels at 35cts, but to-day they went up another 5cts; one man sold $245.00 worth. Mr. Joseph Richardson, of Proton, dug near 1000 bushels off of 3½ acres.

Mr. Wm. Taylor has purchased a fine heavy draught team and is teaming grain for Mr. R. J. Sproule, who is said to be buying very largely this season.

We read of Burdock Bitters and Morez Bitters, but nothing keeps up the spirits like pouring a little Brandy down. We seen one old farmer take two finger lengths down and skip like a deer, an cuff another in double-quick time.

The station is not behind this week; it can boast of at least the most tremendous dog fight, two on one, and very systematic ejaculations from some of the men.

The steel rails are laid along the track to Flesherton Station. I expect that they will be spiked down before this comes to your readers.

To the Editor of the Herald.

SIR,—Having finished my harvest and commenced selling my grain, I drove to Dundalk with my first load last Saturday and found prices first class and everything satisfactory, so far as the market was concerned. But as I travelled side road 200, Township of Artemesia, I was led to ask myself, what is our council doing with our money that this road should be in such a shameful condition? I find in one place a complete trap for horses, (I expect this is where Nixon' horse was injured last winter). I also see the bridge near the gravel road is patched up with cedar rails thrown loosely on, instead of some sound timbers securely fastened, the guards are off the bridge and the whole structure is in a very shaky condition. Now, I would like to know if this road is allowed to remain in such a condition for the purpose of turning the people of this neighbourhood from their regular market, or through ignorance on the part of our council. In either case we are now satisfied that the only way the interests of this part of the township are to be protected is by a change at next election. Gentlemen, wake up and attend to your duty, and save yourselves trouble as well.

REMINISCENCES OF A TRIP FROM OWEN SOUND TO SAULT STE MARIE.

(Continued from last week.)

RYDAL BANK, Sept. 19th, 1881.

Twelve miles sailing to the west from Thessalon brings Bruce Mines, formerly a mining village of great importance, and I will give your readers what I know in regard to it. In the year 1864 Col. Banking explored the North Shore from French River to Sault Ste. Marie, at this place he found a promising vein of copper right near the shore. He began blasting, and in the fall of the next year he shipped the first load of copper in the steamer *Cathcart*. Shortly after it came in possession of the Bruce Land and Mining Company formed of capitalists in London, England, who showed great enterprise, and secured a tract of land four miles square. They sunk shafts, built a lot of dwellings for men employed, and built a very large house. The engine was enormous. This engine is one of the best in America, it run machinery half a mile distant. Engineers will have an idea of its build, when the walking beam weighed thirty-five tons. The men employed was a village of themselves They built Schools, Churches, supported hotels, stores, and many good and evil institutions. In a few years the company started the Wellington mines a quarter of a mile to the west, also along the shore. Here the same course of events followed. For a few years the company shipped the ore direct to Swansea in Wales, without any unloading on the way. Times were good. Common laborers got $25 a month and found. The Company cleared a fine farm to raise provender and the employees cleared small pieces on company's land for themselves. The soil is good without a stone with occassionally a rock knoll. Then the company determined to smelt the copper here, and to this purpose built a tremendous house at "Wellington mines." I cannot even faintly describe it. It cost a great sum. The chimney is one hundred and ninety feet high and twelve feet square at the base. The building of this house was one of the many events, which eventually stopped the works. Copper got down in price. One winter the miners were working by "tribute" or shares, and neglected to properly timber the tunnel. They had the whole winter's ore very near the opening. One Saturday after the men had got on surface, suddenly the shaft caved in, and enveloped the winter's work. When news of this reached England, the company gave orders for suspension. The men left their tools in the place where they worked, the clerks left the half written sheets on the desks, the pens were never wiped to this day. One man was left in charge of the whole affair, but the fields have gone common. I cannot do better in describing the present looks of the place, than by quoting the words of the renown "Perrybingle." He calls it a grave yard of human hopes, and capital, and energy.

LOUIS N. THIBAUDEAU.

MARKDALE, Oct. 10th, 1881.

To the Editor.

SIR,—Mr. David Stinson, of Artemesia, has grew a pair of potatoes of which the daddy weighed 2 lbs. 10 oz., and the other, call it what you like, weighed two pounds and a half. This is a candid fact, for it takes thirteen to pick up after one digger, and before he started to dig them they were continually yelling at one another to be over, but those two grew near the outer edge of the patch, so, therefore, they were not crowded so much and got a little better chance to grow.

A WRETCHED SCORE.

A score of years is a long time to look back upon, but when attended with continual suffering, it seems almost a century; and all this pain could have been avoided if, when your liver commenced to trouble you, if you had taken Burdock Blood Bitters. Price $1.00, trial size 10 cents.

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all disease resulting from impure blood. It cures Scrofula and all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.
