# MARKDALE STANDARD

VOL. 33 — MARKDALE, ONT., THURSDAY, JUNE 19, 1913. — WHOLE NO. 1697

"I am an old man—and many of my troubles never happened."—ELBERT HUBBARD

THE white hair and wrinkled faces of our busy men and women tell of doubt, fear and anxiety—more than disease or age. Worry plays havoc with the nervous system—so that digestion is ruined and sleep banished. What oil is to the friction of the delicate parts of an engine—

DR. PIERCE'S

**Golden Medical Discovery**

is to the delicate organs of the body. It's a tonic and body builder—because it stimulates the liver to vigorous action, assists the stomach to assimilate food—thus enriching the blood, and the nerves and heart in turn are fed on pure rich blood. Neuralgia "is the cry of starved nerves for food." For forty years "Golden Medical Discovery" in liquid form has given great satisfaction as a tonic and blood maker.

*Now it can be obtained in tablet form—from dealers in medicine or send 50 one-cent stamps for trial box. Write R. V. Pierce, Buffalo.*

DR. PIERCE'S PLEASANT PELLETS Relieve constipation, regulate the liver, and bowels. Easy to take as candy.

## THE NEWS IN A PARAGRAPH

HAPPENINGS FROM ALL OVER THE GLOBE IN A NUTSHELL.

Canada, the Empire and the World in General Before You Fully Discussed.

[illegible]

That two hundred girls are lured away from Toronto yearly was a statement made at a meeting of the American Synod.

Prof. Nathaniel Henry Alcock, professor of physiology at McGill University since 1911, died on Thursday at the age of 42.

Ald Melvini Moyer of St. Catharines died as the result of a nervous collapse after several operations necessitated by a fall a year ago.

The New York State Bankers' Association, meeting at Ottawa, extolled the century of peace and sent greetings to King George and the Duke of Connaught.

Major-General Mackenzie, who resigned his position as Chief-of-Staff a short time ago, has left for England.

A fourteen-months-old child, daughter of Thos. Ball, near Cha-[illegible] Grum, ate, it is believed, strychnine tablets, and died in four hours.

J. M. Davidson, C.P.R. agent at Midwaye, P.Q., was seriously injured, and his wife died afterwards from shock, as the result of unexpectedly meeting an engine while on a motor speeder. Their infant child escaped with little injury.

### Great Britain.

A big majority was shown for the Unionists in the Wandsworth bye-election.

The funeral of Miss Emily Davison, the militant suffragist, was held in her native town.

Lieut. Kennedy of the British airship corps was killed when an airship dropped.

Mr. Lloyd-George and Sir Rufus Isaacs were execrated at the Merconi wireless charges.

### General.

Big efforts have been accomplished in the Congo Free State.

The Supreme Court of the United States upheld the State railroad laws in many States.

The British Consul at Berlin says that Germany is hoarding her gold supply.

The entire crew of a Spanish warship was almost annihilated by the Moors.

Spain and France are confronted with an increasingly serious situation in Morocco.

## VICIOUS DOG HAD RABIES.

**Children Sent From Port Robinson to Toronto for Treatment.**

A despatch from Port Robinson says: A dog which attacked three children here was suffering from rabies, according to a report received from Toronto, where the animal's head was sent for examination. The children have been sent to Toronto to undergo the Pasteur treatment.

## SOUGHT DEATH TOGETHER.

**Young Swedish Man and Woman Jumped Off Bridge.**

A despatch from Three Rivers, Que., says: A young man and a young girl, both Swedes, jumped off the Wayagamack Island bridge into the St. Maurice River on Saturday night and were both drowned.

Na-Dru-Co Laxatives accomplish their purpose with maximum efficiency and minimum discomfort. Increasing doses are not needed. 25c. a box at your Druggist's. 174 National Drug and Chemical Co. of Canada, Limited.

Free 50c Package of . . . Medicine

For all Diseases of the Kidney and Bladder

Rheumatism, Bed Wetting, Inability of Young or Old to Control their Water

Write us today, giving a full history of your case, your age, occupation, etc., and we will send you some good honest advice, and a 50c package of Rowan's Pastilles absolutely Free.

What they will do for you. They will cure your backache, strengthen your kidneys, correct urinary irregularities, in young or old, build up the worn out tissues, and eliminate the excess of uric acid that causes rheumatism and skin diseases. Prevents Bright's Disease and Diabetes, and restore health and strength. Address

## OUR LETTER FROM TORONTO

WHAT IS UPPERMOST IN THE MINDS OF THE CITIZENS JUST NOW.

**New Citizens Are Flocking In—Affairs at the University—Toronto's Great New Hospital.**

Never before has there been such an influx of immigration from the British Isles into this province as during the present season. As the distributing centre, Toronto gets first choice of these fresh citizens. Often in a stroll along the street, one would judge from the snatches of conversation picked up from passers by that one was walking on a London or Birmingham thoroughfare rather than Canadian.

The crowds in the local immigration offices are eloquent of the great migration. Figures tell the tale officially. During the first ten months of the present fiscal year, the total immigration into Canada amounted to 343,583, a number equal almost to the immigration of the entire previous year. Of this number 139,09[illegible] were from the British Isles and 53,939 from the United States. But the most significant thing about the figures is the fact that almost the entire British immigration, which is so large as to give the people of Britain serious concern, appears to be coming to the Province of Ontario. According to the figures no less than 1[illegible] British immigrants came to Ontario during the ten months period. The West is getting the Americans and other foreigners.

**Only Farm Help Wanted.**

It would be thought that [illegible] ought to be doing something to relieve the "farm help" problem, but it is not certain that this is the case. Many of them were evidently only in Toronto to rest themselves, or they came to Toronto rather than go on the farm. A [illegible] hand sign is placed to the men on the platform, [illegible] hands for farm work, [illegible] for domestic servants [illegible] the hands. In spite of [illegible] know of many young men who [illegible] on the farm. One nearby farmer tells a story of the other day taking home an immigrant. Early in the evening he showed him to his room and a few moments heard the thud of boots as [illegible] on the floor outside the new arrival's door. The new hired man was putting his boots outside to be cleaned.

Another who was engaged to a farmer for a position was asked if he could milk. "Oh aye, bracken," was his response. I once milked a goat."

No mere adaptable are some of the women. One who took a place as a domestic in a home where there were hot and cold water taps and all other conveniences was found by her mistress an hour after dinner sitting in the kitchen beside a dish pan full of dishes. On being asked why she did not go ahead with her dishwashing she said that the water from the hot water tap had been too hot and she was waiting for it to cool.

The sobriety of Canada bothers others. An employer who had engaged a number of Englishmen on some construction work was scandalized on going up to the top of the building one day recently, to find that the new laborers had laid down their tools and were enjoying half a dozen bottles of beer.

But these are exceptional cases. On the whole the new influx constitutes a great addition to the wealth of the nation.

**Politics in University.**

Something of a rumpus has been stirred up in University circles by the charge made at the annual meeting of the Alumni Association by Mr. Gordon Waldron to the effect that an insidious effort is being made to introduce imperialism into the University. Mr. Waldron did not go further in support of his charge than to say that a distinct tendency was observable to introduce Oxford graduates to the staff. But he declared that in University College, which is the bailiwick of Dr. Maurice Hutton, there were ten Oxford men. In the whole institution there were no less than 25, none of whom had been appointed during the past year. As to whether these men were conducting any political propaganda and if so by what methods, Mr. Waldron did not say.

Mr. Waldron's charge is in the character of a counter attack to those who have been criticizing the University because of the recent organization there of a Young Men's Liberal Club. It is known, too, that there is a considerable clique of thorough-paced Nationalists in the student body. Some two of three years ago invitations were extended to Mr. Bourassa and Mr. Lavergne, the prominent Nationalist leaders. It is now said that this Nationalism had as its basis a certain resentment of the ultra Imperialism of certain members of the staff.

**Prof. Hutton and Mr. Waldron.**

At all events there seems little doubt that political feeling is running higher at the University now than it has for many years. It is perhaps only a reflection of increased political partisanship throughout the country, or it may indicate that the student body is taking a more active interest in political affairs. Professor Hutton is a very distinguished scholar with strong militarist ideas. It was he who at the recent annual dinner of the Canadian Press Association scarificed the press and drew fire from the representatives of the newspapers who responded.

Mr. Gordon Waldron is a lawyer with considerable force of character, though often thought to be extreme in his views. He spent many years in Central America, but recently has been practicing law and journalism through the Weekly Sun in this city.

**Toronto's New Hospital.**

Toronto's splendid new General Hospital, formally opened on June 19, is said by experts to represent the last word in hospital construction on the American continent. Many famous hospitals in other cities have been kept up to date by alterations and additions, but the local hospital as it exists to-day has the advantage of being planned as a whole and therefore is a model of completeness and efficiency. At least such is the claim of those who are responsible for it. Some idea of its size is indicated by the fact that in all the large centres of population in America there are only two hospitals which are larger than Toronto's new institution. One of these is in Boston and one in New York. A famous European surgeon who a few weeks ago looked over the new buildings declared as his parting word, "No man can say he has seen the hospitals of America until he has seen this one of yours in Toronto."

The institution as it stands has cost the enormous sum of $3,400,000. Of this amount practically one million dollars has yet to be raised, despite large donations from the Provincial Government, through the University, from the city and from private subscriptions. The institution has accommodation for 670 patients, which may not seem a large number in view of the amount of money that has been expended, but it has to be remembered that a good deal of the money has been spent for laboratories and other experimental equipment, a feature which goes a long way to give the institution standing. 500 nurses and house surgeons will be required as a staff, and there will be required as a staff, and there ployees.

**A Five Hours' Walk.**

To illustrate the area covered by the buildings, it may be mentioned that to make a complete tour of the various departments taking only a casual survey, requires at least five hours brisk walking. In the rear and completely screened from view are immense gardens which compare creditably in size with many of the city parks. Here hedges and shrubs have been planted and those with a number of fine old trees which have been preserved, will add greatly to the attractiveness of the surroundings. Tennis courts have been provided for the use of the nurses.

In planning the buildings the architects aimed to secure a maximum of sun light. A novel system of ventilation has been installed. The commonly accepted idea of ventilation is to open the windows and doors and let in fresh air. In a congested and grimy centre of population such as that in which the new hospital is located, this system might be unpleasant and in many cases positively dangerous. With this in mind the windows are not to be opened in the new hospital. Fresh air will be supplied by a powerful system of fans in the subbasements of each section, fresh air will be constantly supplied, and to insure purity, it will be drawn through a curtain of falling water, something like a shower bath. In this way the air will be literally washed and dust and impurities extracted by the water curtain.

**Can Accommodate 50 Victims.**

The emergency wing is particularly well equipped. "We have accommodation for the victims of any big accident which might injure as many as fifty or sixty people," said one of the officials. "But of course we certainly hope that such will never occur."

The group of buildings are distinctive in appearance, being constructed of a high class brick known as face no brick. It is said this brick cost the hospital $[illegible] a thousand as compared with $6 and $8 a thousand paid for the ordinary pressed brick. The action of the trustees in the matter is defended on the ground that the ordinary pressed brick would have made the institution look like a group of factories. It was held at one time to have used stone, but this was found to be too expensive and the veneers brick is said to have equal durability.

## INSTANTLY KILLED.

**Sarnia Man Electrocuted While Moving a House.**

A despatch from Sarnia says: [illegible] shortly before 11 o'clock on Thursday morning death came with terrible suddenness to Geo. J. Lebourville, a young married man employed by Alex Fowler, contractor and house mover. Mr. Lebourville was engaged in moving a house on Davis Street. The house came in contact with the wires of the Electric Light Co., and the young man Lebourville went up on top of the house to raise the wires. He took hold of one of the wires to lift it up, when 2,300 volts of electricity passed through his body and he was instantly electrocuted.

## ONE KILLED, THREE HURT.

**Four-Story Building at Vancouver Gives Way.**

A despatch from Vancouver, B. C., says: Harry Anderson, carpenter, was instantly killed and five others were badly injured here on Friday morning when a four-story concrete building in course of construction at the corner of Main and Pender streets east, collapsed, burying the men under tons of building material. A. Robinson, Tom Evans and A. Berle were so seriously injured that their recovery is doubtful.

## CIRCUS CAMP FOLLOWERS.

**Well-Known Crooks Believed Captured at London, Ont.**

A despatch from London, Ont., says: Numerous complaints of operations of pickpockets and house thieves, supposed to be following the Barnum & Bailey show, which played here on Thursday, were made in the afternoon and the evening, and six suspects were picked up by detectives. All are said to be well-known crooks, and gave names of various American cities as their addresses.

Special Notice,

BETTER THAN SPANKING.

Spanking does not cure children of bed-wetting. There is a constitutional cause of this trouble. Mrs. M. Summers, Box 849 Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

## HUDSON BAY RAILWAY.

**On Twenty Miles the Grading Has Been Completed.**

A despatch from Ottawa says: A report received on Wednesday at the railway department indicates substantial progress on the Hudson Bay Railway. On twenty miles the grading has been completed and temporary rails are being laid. This will facilitate greatly the forwarding of supplies. The bridge over the Saskatchewan at Le Pas has just been completed at a cost of $300,000 and is one of the big features of the undertaking. By Fall rails will be down permanently on half the line. During the Summer the work will be rushed on the Hudson Bay terminals.

## EARTHQUAKE FATALITIES.

**Many Killed During the Renewed Disturbances.**

A despatch from Sofia says: The earthquake shocks of Saturday were renewed on Sunday in many parts of Bulgaria. Two violent shocks occurred in the morning at Grabovia, where much damage was done. The seismic disturbances at Tirnova continued throughout Saturday, and the trembling of the earth had not ceased Sunday morning. At that place many people were killed and churches and public and private buildings were seriously damaged. Thousands are homeless and destitute.

## THE SUNDAY SCHOOL LESSON

INTERNATIONAL LESSON, JUNE 22.

**Lesson XII. The Blinding Effect of Sin. Amos 6. 1-8. Golden Text, Amos 5. 14.**

Verse 1. Woe—The Hebrew word is an interjection indicating distress, which in its present context is uttered in the spirit of warning.

At ease—Indifferent and careless.

Zion—Jerusalem, the capital of the southern kingdom.

The mountain of Samaria—The plateau stronghold and capital of the northern kingdom.

Which is named a notable—Literally, the notable men occupying positions of leadership in the nation.

2. Calneh—Probably a Syrian city and possibly the [illegible] which in Isa. 10. 9 is called Calno. Ava gilder Babylonian city called [illegible] which is mentioned in Genesis 10. 10 [illegible] Hamath—Another Syrian city here referred to in [illegible]

1. Stretch themselves—Be at ease and luxury.

The midst of the stall—The fattest portion of the herd reserved for lambs. To eat the young and fed—Of the choicest flock was its [illegible] of a luxury.

5. The signs of indolence, self-indulgence, and disregard for serious responsibilities are here multiplied. They invented songs, improvised for purposes of amusement, sung to the accompaniment of all manner of instruments of music.

6. Drink wine in bowls—To excess, out of costly vessels used ordinarily in connection with divine service. (Compare Zech. 9. 15; 14. 20.)

The chief oils—Those that are the most prized and expensive. All this seemed like shameful extravagance to the frugal shepherd and prophet accustomed to simple habits of life and industry.

Are not grieved for—Do not worry about the affliction of Joseph. Ephraim and Manasseh, the provinces named after the sons of Joseph, comprised the heart of the northern kingdom, and seemed at this time at the height of prosperity. But although unnoticed by the eyes blinded by extravagance and luxury, a cloud was already gathering on the horizon, and the day of dire affliction was already impending.

7. Go captive—In 721, only a few years after the prophet had uttered his warning, Tiglath-Pileser invaded Gilead and Galilee, carrying the foremost of the inhabitants into captivity.

8. The Lord Jehovah—An unusual combination, used, perhaps, for emphasis.

The excellency—Or, pride. Either [illegible] in Hos. 5. 5 and elsewhere, the inglorious temper of the people, or the things of which they with their distorted vision of things were proud.

Jacob—Referring, as at 1, to the southern kingdom and to its capital, Jerusalem. Another possible explanation of the phrase, the excellency of Jacob, is to regard the expression as a whole as referring to the capital city, Jerusalem, the palaces and generally speaking of pride and luxury of which are an abomination unto Jehovah.

I—Deliver up the city with all that is therein—The northern capital, Samaria, was taken and its citizens exiled in 721. The southern kingdom survived until 587, when Jerusalem was destroyed and its citizens carried into captivity.

Tourist—"But people said the lions are distressfully small." Lady Behind the Counter—"But then the train stops here only one minute."

PRACTICALLY GIVEN UP TO DIE

"Fruit-a-tives" Cured Kidneys and Bladder

WILLIAMSTOWN, ONT., JULY 27th, 1910.

"I have much pleasure in testifying to the almost marvellous benefit I have derived from taking "Fruit-a-tives". I was a lifelong sufferer from Chronic Constipation, and the only medicine I ever secured to do me any real good was "Fruit-a-tives". This medicine cured me when everything else failed. Also, last spring, I had a severe attack of Bladder Trouble coupled with Kidney Trouble, and "Fruit-a-tives" cured these complaints for me, when the physicians attending me had practically given me up.

I am now over eighty years of age and I can strongly recommend "Fruit-a-tives" for Chronic Constipation and Bladder and Kidney Troubles"

JAMES DINGWALL.

"Fruit-a-tives" is the only medicine in the world made of fruit juices—and is the greatest kidney, bladder and liver medicine ever put on the market.

50c a box, 6 for $2.50 trial size, 25c. At dealers or sent post paid on receipt of price by Fruit-a-tives Limited, Ottawa.

SOWING HIS WILD OATS

REAPING A HARVEST OF SORROW

How many young men can look back on their early life and regret their misdeeds. "Sowing their wild oats" in various ways. Excesses, violation of nature's laws, "wine, women and song"—all have their victims. You have reformed but what about the seed you have sown—what about the harvest? Don't trust to luck. If you are at present within the clutches of any evil habit which is sapping your life by degrees; if you are suffering from the results of past indiscretions; if your blood has been tainted from any private disease and you dare not marry; if you are married and live in dread of symptoms breaking out and exposing your past; if you are suffering as the result of a misspent life—DRS. K. & K. ARE YOUR REFUGE. Lay your case before them confidentially and they will help you honestly if you are curable.

YOU CAN PAY WHEN CURED

We Treat and Cure VARICOSE VEINS, NERVOUS DEBILITY, BLOOD and URINARY COMPLAINTS, KIDNEY and BLADDER Diseases and all Diseases Peculiar to Men.

CONSULTATION FREE. Books Free on Diseases of Men. If unable to call, write for a Question Blank for HOME TREATMENT.
