Durham

Rev. Dr. Irwin, late of Mt. Forest Methodist church, has been appointed Professor of New Testament Language and Literature in Wesley College, Winnipeg, and will begin his work at the opening of the college. Dr. Irwin spent his boyhood days near Markdale, and about 25 years ago we heard him preach his trial sermon. He is highly educated, having obtained his B.A., B.D., from Victoria University.

Rev. Mr. Prudham had an experience on Saturday last which accounts for the honeyed words he put into his sermons on Sunday. On Saturday evening he was stung on the hand by a bumble-bee, and on Sunday morning it was swollen to double the size, the swelling extending to the elbow. On Sunday afternoon, when tying his horse in the shed at Zion, he was stung again, but this time it was on the other hand. Nature claimed her right and to give the preacher proper equilibrium and assist him in maintaining his perpendicularity he appeared in the pulpit here on Sunday night with both hands equally swollen, and was apparently one of the best balanced men that ever appeared before a Durham audience. We don't know what the preacher said when he was dealing with the business end of the bumble-bee, but we have a faint idea of the inspiration it would give to an ordinary newspaper man.—Chronicle.

Riverdale

Generally speaking, harvesting operations in this vicinity are completed.

Mr. W. Richardson and daughter, Miss Ella, are holidaying with friends in Toronto.

Miss Della Irwin of Cherry Grove was the guest of Miss Euphemia Stephenson on the first of the week.

Mr. Stanley Wiley and lady friend of Wodehouse visited friends here recently.

Mr. and Mrs. W. Irwin attended the Doherty-Irwin wedding at Blantyre.

Mr. J. Faulkner of Markdale is renewing acquaintances in this vicinity at present.

Mrs. D. Wright and family of Gore Bay are visiting Mr. and Mrs. B. Cutting.

Miss E. Lawson of Wodehouse was the guest of Miss Louie Wiley on the first of the week.

Mr. F. Cutting is engaged with Mr. C. Devitt of Rocklyn.

Miss a Hutchinson of Vandeleur was the guest of Mrs. L. Boales on the first of the week.

Mr. Joseph Ward, accompanied by his mother, left for the West on Tuesday.

Mr. G. Nesbitt had a very successful barn raising on Saturday.

Eighth Line, Osprey

Intended for Last Week

Sister Agnes and Sister Theda of the Benedictine Order of Nuns, Duluth, spent a few days recently with the former's mother, Mrs. Wm. Somers.

Mrs. Joe Fenwick and little daughter, have returned to the city.

Mr. and Mrs. Wm. Kerton and family of Markdale spent Sunday with Mr. and Mrs. H. Fenwick.

Miss Gladys and Master Joe Moison of Collingwood are visiting with Mrs. J. C. Madden.

We are glad to report that Miss Ethel Roberts is able to be around again, after being laid up for some time with a severe cold.

This Week's Items

Mrs. Inkster Sr., is visiting with Mrs. F. Spofford.

Mr. Wilfred Madden of Chicago is holidaying with friends here.

Mr. Walt. Carruthers is visiting with Mr. Harold Spofford.

Mr. and Mrs. Charles Fenwick and family spent Sunday with Mr. and Mrs. John Fenwick.

We are glad to report Mr. Coulthard able to be round again.

Master Harry Burk has returned to the city. The evening previous to his departure he gave a farewell party to a number of his young friends. All report having spent a very enjoyable time.

Mount Forest

Game Warden James Myers of Orchardville was in town to collect a fine of $5 off a party of fishermen whom he had detected the day previously with a number of undersized trout in their baskets.

An Egremont Indian lister came to town and got liquor at the Coyne house. He should have known better, because License Inspector Groves lost no time in having him explain himself before the police magistrate. As he could give no good and sufficient reason for breaking the law he was fined $10 and costs, and the fact that the bartender of the Coyne House didn't know that the purchaser was still on the prohibited list did not prevent the magistrate imposing a fine of $20 on the house.—Rep.

OYSTER INDUSTRY.

Canadian Beds Are Being Revived on Eastern Coast.

A vigorous effort is being made to revive the Canadian oyster industry in the Maritime Provinces.

An agreement has been reached between the Dominion Government and the Maritime Provinces regarding the title to shore fisheries in the latter, Mr. Frost says, and already the most famous and most productive areas, those of Prince Edward Island, have been surveyed and are now being leased for private oyster culture. Sites for these oyster beds are open to foreign as well as Canadian oyster companies, and Government instruction and assistance will be given to those who undertake to build up leased oyster beds.

The species of oyster found in eastern Canada is the same as that of the entire Atlantic coast of North America. The Canadian beds are confined almost wholly to the extreme southern shore of the Gulf of St. Lawrence. The Maritime oyster matures somewhat more slowly than that of the southern regions, requiring four to five years before being of best marketable size, while more southerly oysters require but three to four years. Its shell is comparatively heavy and rough, moreover, and with irregular laminations, which make it difficult to open. It is said to stand shipment and storage better than the more southern oyster.

The adverse conditions which have brought the oyster beds of these provinces to their present condition have been numerous.

The most influential factor in the destruction of the Maritime oyster beds, is authoritatively stated to have been the practice by farmers of dredging for so-called mussel mud, in reality oyster mud, for fertilizer. This material consists of a deposit of disintegrated mussel, clam and oyster shell, and contains many of the shells themselves, and even live crustacea. Under the belief that the shells constitute its most valuable portion the diggers have sought to operate where the shells were most numerous, often upon the very oyster beds themselves. The value of mussel mud as a fertilizer is problematical, since if used without copious animal or other nitrates its lime extract the nitrogen from the land disastrously. It is unquestionably a soil stimulant, however, and for many years the farmers disputed with the fishermen on the contention that the oyster industry was less important than the mud digging. In 1877 Governmental experts recommended that no mud be dredged within 60 yards of a living oyster bed, and in 1892 a regulation was put in force prohibiting digging within 200 yards of oyster beds. This restriction has now shown itself beneficial to the industry."

A good measure of success for Canadian oyster culture is foreshadowed not only by the experience of oyster farmers in the United States, France, England and Japan, but also by the experiments conducted here by the Dominion Government and by private enterprise. Capt. Ernest Kemp, the oyster expert of the Canadian Government, has built two large artificial oyster beds which, although dating but from the summers of 1910 and 1911, give every promise of being highly successful and productive. In 1910 an area of four acres in the outer portion of Richmond Bay was planted with 363 bushels of small oysters obtained from the bars off Ram and Curtain Islands in the same bay. This bed is at present in excellent condition. In 1911 another four-acre tract was prepared near Caribou Island, off Pictou County, in the Straits of Northumberland, and was planted with about twenty-five barrels of Richmond Bay oysters.

From the quantities of oysters formerly produced in island waters, however, it is evident that there must be sufficient food matter present there to support from six to eight times as large a yield as the current one, if the proper sites are chosen.

Houses Built Without Nails.

In Alberta there is a village of houses which have been constructed without nails. As a matter of fact, little or no hardware of any character has entered into their construction. There houses have been built by Ruthenian immigrants and their architecture is quite novel. Their first attempts at house-building are usually of the kind they had been accustomed to over in Europe, and their buildings are of the typical Ruthenian style—log, pitch-roofed, thatched and wide in the eaves. In many cases these buildings are put up without a dollar's worth of hardware. Even the door, an affair of slender twigs woven and laced together, swings on homemade hinges and is latched with a wooden hasp. The floors are of hewn logs, unnailed. The roof, as the favorite Russian roof always is, is a wonderful fabric of poles and crosswoven wheat straw, 10 inches thick, packed tight and solid, and laid with such care that it will shed the weather for twenty years.

James Murray, Oceanographer.

James Murray, an oceanographer of Glasgow, who has been selected by Vilhjalmur Stefansson to join the staff of his Canadian Arctic expedition, was an important member of Sir Ernest Shackleton's Antarctic expedition, and in selecting him Stefansson said he had in mind the importance of scientific comparison between the north and south polar regions.

His program of work on the Canadian expedition will include biology, miscroscopic investigation and oceanography, the latter including soundings, observations of tides and currents, and the study of the chemistry and temperature of the sea water.

He is also taking colors and drawing materials for use in case opportunity should arise for the exercise of his artistic gifts.

To Study Ice.

The Government marine survey is sending a party to James Bay to make a study of the ice movement in connection with the establishment of a port for the new Hudson Bay Railway.

Leland, son of Councillor James Thomson of Elderslie, had an experience that he does not wish to repeat. He was up on Bruce Peninsula buying cattle and to the men who were with him expressed himself as being anxious to see a rattlesnake. He was tramping through long grass on a marsh when he heard a rattling sound and a warning from one of his companions to jump. Lel obeyed with alacrity and was soon out of the rattler's reach. He had stepped over the snake which had been between his feet trying to put its fangs into his leg, but was prevented striking him by the long thick grass. The trio secured clubs and despatched the venomous reptile, which was four feet long and had five rattles.

OSPREY VOTER'S LIST 1913

Notice is hereby given that I have transmitted or delivered to the persons mentioned in Section 9 of the Ontario Voters' List Act the copies required to be so transmitted or delivered of the list made, pursuant to said Act, of all persons appearing by the last revised Assessment Roll of the said Municipality to be entitled to vote in the said Muncipality at elections for members of the Legislative Assembly and at Municipal elections; and that the said List was first posted up at my office at McIntyre on the 25th day of August, 1913, and remains there for inspection.

And I heredy call upon all voters to have any errors or omissions corrected according to law.

Dated the 26th day of August, 1913.
—THOS. COTT, Clerk.

Meaford High School

will re-open on
TUESDAY SEPT. 2, 1913

When classes will be formed to meet the needs of all students. This school prepares for Matriculation, Teachers' examinations (entrance into the Normal Schools and the Faculties of Education), Commercial Specialist and Commercial Diploma.

"NOTHING SUCCEEDS LIKE SUCCESS."

We would like all parents having children to educate to consider carefully the following points about this High School:—

1. BUILDING, grounds are unexcelled in the province; four and a half acres of ground with splendid athletic field; well ventialted class rooms; gymnasium; good board in private families; fees $10 a year.

2. THE SPLENDID WORK of this school has attracted to it large numbers of students from far and wide, and has caused its attendance to increase rapidly.

3. AN UP-TO-DATE Science Room, fully equipped, in which the Student performs HIS OWN experiments under the supervision of the teacher.

4. FULLY ORGANIZED Commercial Department in Book-keeping, Stenography, Type-writing, Business Law, English Branches, Etc., in the hands of a Specialist who is a Chartered Accountant; special attention given to writing and spelling. This Department is equipped with seven of the latest, up-to-date Underwood Typewriters. Each graduate receives a beautiful Diploma. Our graduates easily obtain positions.

RECORD OF THE SCHOOL FOR 1613

5. In 1913 this school passed 22 out of 25 candidates for entrance into the Normal Schools, 12 of those securing honor certificates; the whole class of matriculants, 15 obtaining full matriculation and two partial; 3 for honor Matriculation with 7 honors; 19 out of twenty-two in the Lower School examination, with two honors; 5 for entrance into the Faculties of Education with two honors, and the whole class of 8 for Commercial Diplomas with two honor certificates.

6. The High School Inspector in his report says: "No school in the Province is in a more flourishing condition. The spirit of the school is admirable and impresses a stranger at once as quite out of the common."

Send to the Principal for beautifully illustrated Announcement, mailed free on application.

A. A. Dundas, B. A., Principal. Homer Reid, Sec.-Treas.
