

WHAT'S NEW... 10 June 1964

To the disappointment of hundreds it appears that Victoria Park is to be shorn of its recreational facilities, the softball diamond. This is doubtful progress.

A new idea has come to light. It is understood that the Chamber of Commerce desires larger quarters and that the present well situated building and widely known location is to be moved to Victoria Park. What is to take place at the park? It is said the old bandstand is to come down and the C. and C. building is proposed to take its place. In such a case, why not erect a bandshell at the north end of the park? Lindsay should have some bandshell from which bands could perform and Lindsay needs an outdoor stand for public gatherings and public speaking.

H

At a meeting of the Lindsay Ministerial Association this week Rev. O. G. Locke, a member of the Kiwanis Club submitted a Directory of Church Services in Lindsay during July and August. Members of the Association heartily endorsed the idea and these posters will be displayed in the summer lodges, inns, hotels, and garages around the area to benefit visitors over these two vacation months.

James Lewis of Halifax, N.S. was a guest of his mother, Mrs. Harry Lewis, Russell Street East. Many friends will be interested in hearing that he has received a fine promotion in the Zeller firm with his appointment as Manager of the store in Peterboro. He was

Manager of an east coast city Zeller's for some time. Among the guests at the Peterboro luncheon last Friday night was Norman Ranson, Manager of the Chatham store and Mrs. Ranson.

Town Engineer, Eric Booth, has been holding interviews with residents of Cambridge Street South regarding their objection to the proposed action of removing boulevards, sidewalks and trees in the area and widening the street to expedite traffic. Residents claim that the sidewalks, which are in dire need of repairs, should be taken up and rebuilt 18 inches to the east and 18 inches to the west, thus allowing for another 36 inches of width, plus the two boulevards. Then the beautiful shade trees could be saved.
