TO THE

Independent Electors,

OF THE

County of Peel

GENTLEMEN,

Having been unanimously nominated by a large and influential meeting of the Electors of this County, for the House of Commons of the Dominion of Canada. I have much pleasure in presenting myself as a candidate for your suffrages.

In coming forward I wish all parties distinctly to understand my position; I am not a professional politician, but present myself simply as a Canadian Manufacturer. I have a heavy stake in the country, and my own and family's means being all invested in commercial enterprize in the Dominion, am consequently dependent on its prosperity.

The passage of the Act of Confederation, uniting four of the British American Provinces, calls for the exercise of a spirit of earnest patriotism, in order that the country may realize the advantages from this great measure, which have been promised by its promoters, and which there is every reason to believe will result from it, with economy, in the hands of good and honest statesmen.

The General Government of the New Dominion has committed to it the power of dealing with all the larger questions of Trade and Commerce, Currency, Postal System, Defence, Public Works of Inter Provincial character, Immigration and such other questions as affect the general interests of the whole Dominion. Should I be chosen as your representative I should advocate

A revision of the Tariff in such a way as to relieve from taxation as much as possible the necessaries of life, which enter into the consumption of the whole population.

A uniform Currency for the whole Dominion.

The reduction of Postage on Letters to a uniform rate of Three Cents, and the abolition of Postage on Newspapers.

The enlargement of the St. Lawrence Canals, so soon as the finances of the Dominion will permit, and the construction of the Intercolonial Railway by means of a subsidy to an independent Company rather than as a Government Work.

The opening up of the North west, and the immediate establishment there of a strong system of Government, calculated to promote the settlement of that magnificent country, and to ensure the safety and contentment of the Settlers.

The adoption of such measures as may be necessary to bring into Confederation the other Portions of the British American Possessions, so that the whole of these Colonies may be united under one Government and a great and powerful British American Confederacy be thus built up.

The promotion of Immigration to the country by the adoption of measures calculated to attract the Emigrant and Capitalist from the Old World to settle amongst us.

The organization of the Departmental System of the Government on an economical and efficient basis, and the passage of such measures as will prevent any Administration from expending money without the previous consent of Parliament.

Recognizing the great services of our Volunteers and the alacrity with which they responded to the call of duty in the hour of public danger it will be my pleasant care to see that any reforms desired by them are carried out, and that all necessary steps be taken to give permanency and efficiency to the patriotic volunteer movement, in which I have always felt the warmest interest.

Should you have such confidence in me as to place me at the head of the Polls at the coming contest you may always rely upon my best energy being devoted to promote the interests of the Dominion of Canada.

I have the honor to be,
Gentlemen,
Your obedient servant,
ROBERT BARBER.

Streetsville, 29th July, 1867.

Fall Assizes.

COUNTY OF HALTON, To WIT } NOTICE is hereby given that the COURT of OYER, and TERMINER and GENERAL JAIL DELIVERY, and ASSIZES and NISI PRIUS, for the said County of Halton, will be holden at the

COURT HOUSE,

IN THE

Town of Milton,

ON

WEDNESDAY, THE 25TH SEPTEMBER

TO THE

INDEPENDENT ELECTORS,

OF THE

COUNTY OF HALTON!

GENTLEMEN:

Having received the unsolicited and unanimous nomination of the Reform Convention of this important County, as Candidate for the Legislature of Ontario, I must express the deep sense I entertain of the honor thus conferred upon me. In entering Parliament I have no private ends to serve, and no personal objects to attain. Had I consulted my own business interests, I certainly would never seek to enter into political life, but as you have done me the honor to nominate me as your Candidate, I trust that if elected you will find that your decision and confidence have not been misplaced.

Having resided in the County for over forty years, I am acquainted with the struggles of the early settlers, as well as the requirements of the progressive state of the County, and flatter myself that I know somewhat of the wants and desires of its inhabitants.

My political opinions are what they always have been; I belong to the old fashioned Reformers, and hold the distinctive features of that party. The following are some of the cardinal articles of my political creed.

Equal Civil and Religious liberties to all classes of Her Majesty's subjects, irrespective of origin, creed or color, equal privileges to all religious denominations, no Parliamentary interference in matters of religion, no grants to denominational colleges, responsible government, the settlement of the wild lands of the Crown by free grants to actual settlers, the most rigid economy in the public expenditure, consistent with the due administration of the public departments no spending of the public money without the sanction of Parliament.

Being strongly in favor of maintaining the Union, and especially that feature of it which gives us control over our own Local affairs, I will not pursue, as your representative, a course that would in any way endanger the Federal principle contained in the Union.

I am a Loyal British subject, no Annexationist, and an honest Reformer.

Should you have that confidence in me as to return me at the approaching election, you may always rely upon my best energies being devoted to promote the interests of this County and the Province of Ontario.

I have the honor to be
Gentlemen,
Your obedient servant,
WM. BARBER.

Home Dale, Streetsville, July 29th, '67.

Holloway's WORM LOZENGES

ARE a certain and safe remedy for worms in children and adults. It is a well known and melancholy fact that one fifth can be of death among children is from worms alone it cannot be too deeply impressed upon the minds of parents the necessity of closely watching their children. By so doing and understanding the symptoms and true cause of the disease, thousands of children might be saved from early graves.—SYMPTOMS OF WORMS—The following are a few of the very numerous symptoms and disease which are caused by Worms, deranged appetite, emaciated extremities, offensive breath, frequent picking at the nose grinding of the teeth during sleep, and sometimes convulsive fits, pain in the head and stomach, unquiet sleep, faintings, trembling, coughs, indigestion, low spirits, frightful dreams, and a gradual wasting away of flesh. They are palatable and self administered to the child—drive out the worms thoroughly without pain and completely cleanse the stomach—thereby doing away with the necessity of administering Castor oil or other unpleasant cathartics.—Each box contains the fac simile signature of Northop & Lyman, Newcastle, C W., who are the sole proprietors. N. B. Ask for Holloway's Worm Lozenges, and take no other. Sold by all Druggists in Canada and medicine dealers everywhere. 27

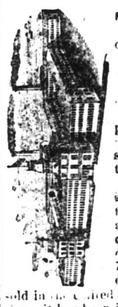
A CARD FROM

THE AMERICAN WATCH COMPANY

OF

WALTHAM, MASS.



THIS COMPANY beg leave to inform the citizens of the new dominion of Canada that they have made arrangements to introduce their celebrated Watches to their notice. They are prepared to prove that their watches are made upon a better system than any others in the world.

They commenced operations in 1850, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs over 700 operatives. They produce half of all the watches sold in the United States. Up to the present time, it has been impossible for them to do more than supply the constantly increasing home demand; but recent additions to their works have enabled them to turn their attention to other markets.

The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand. In them all those mysterious and infinitesimal organs which when put together create the watch, are the result of slow and toilsome manual processes, and the result is of necessity a lack of uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative must vary. But it is a fact that, except watches of the higher grades, European watches of the higher grades, European watches are the product of the cheapest labor of Switzerland, and the result is the worthless Anchor, Lever and so called Patent Lever—which soon cost more in attempted repairs, than the original price. Common workmen boys and women, buy the rough movements of these watches from various [illegible] and put them together, and [illegible] the nearest watch merchant, [illegible] and engraved them with any name that may be ordered—whether [illegible] Paris, Geneva or whatever and [illegible] man who the [illegible] "Tobias of Liverpool," (whose only fault that he can never regulate it to lose good time), is really [illegible] or swiss machine.

HOW AMERICAN WATCHES ARE MADE

The American Waltham Watches are by no such uncertain process [illegible] such incompetent workmen. All their operations, from the reception of the raw materials—the brass, the steel, the silver, the gold and the precious stones, to the completion of the Watch, are carried on under one roof, and under one skillful and competent direction. But the great distinguishing feature of their Watches is the fact that their several parts are all made by the finest the most perfect and delicate machinery ever brought to the aid of human industry. Every one of the more than [illegible] hundred parts of every watch is made by a machine that infallibly reproduces every [illegible] with the most [illegible] accuracy. It was only necessary to make one [illegible] of any article, and then to adjust the hundred machines necessary to replace in every part of that watch, and [illegible] for every succeeding watch must be like it. If any part of any American Waltham Watch should be lost or injured, the owner has only to address the Company, stating the number of the watch and the part wanted, whether it be a pinion, jewel or cap nut, and by return mail he will receive the desired article, which any watchmaker would adjust to its position.

The Company respectfully submit their watches ON THEIR MERITS only. They have fully succeeded in overcoming popular prejudice in the States in favor of European watches, and expect a thorough examination and fair trial for their manufactures everywhere. They claim to make

A Better Article for the Money

by their improved mechanical processes than can be made under the old-fashioned handicraft system. They manufacture watches of every grade, from a good, low-priced, and substantial article, in solid silver hunting cases, especially adapted to the wants of the farmer and lumberman, to the finest chronometer for the navigator, and also ladies' watches in plain gold or the finest enameled and jeweled cases; but the indispensable requisite of all their watches is that they shall be GOOD TIMEKEEPERS. It should be remembered that except their single lowest grade named "Home Watch Company, Boston," ALL WATCHES made by them

ARE FULLY WARRANTED

by a special certificate given to the purchaser of every watch by the seller, and this warrantee is good at all times against the Company or its agents.
