Brutes at Play.

From the Waverly Magazine.

In animals the faculty of amusement awakes very early. Our four-footed friends seems to be aware of this and make it a part of their parental duties to amuse their young. A ferret will play with her kittens, a cat with hers, a dog with her puppies. A mare will play with her foal, though the writer from whom we quote has never seen a cow try to amuse her calf, nor any birds their young. If their mothers does not amuse them the young ones invent games of their own. A flock of ewes and lambs were once observed in adjoining fields, separated by a fence with several gaps in it. "Follow my leader" was the game most in favor with this flock, the biggest lamb leading round the field and then jumping the gap, with all the others following in single file. Any lamb that took the leap unusually well would give two or three more enthusiastic jumps out of sheer exuberiant happiness when it reached the other side.

Fawns play at a sort of cross touch from one side to the other, the "touch" in each case being the nose. Little pigs are also great at combined play, which generally takes the form of races. Emulation seems part of their amusement, for their races seem always to have the winning of the first place for their object, and are quite different from those combined rushes for food or causeless stampedes in which little pigs are wont to indulge. Racing is an amusement natural to some animals, and being so taught by others, becomes one of their most exciting pastimes. Many horses, and all racing dogs, learn to be as keen at winning as school boys. Birds delight in the free and fanciful use of their wings. There is all the difference possible between the flight of birds for "business" or pleasure: and many kinds on fine days will soar to vast heights for pleasure alone.

Horses and their Weight.

Many even among those who frequently make use of horses, have little idea what an ordinary horse weighs, and would have hard work to guess whether a given animal, standing before their eyes, weighed 500 pounds or 1,500 pounds. Yet they would have no such difficulty with a man, and the Yankee Blade says they would probably be able to guess within 10 or 20 lbs. of his weight. The governments of Europe have long been purchasing and weighing horses for the military service, and transferring them from carriage and draught employment, to the various branches of the cavalry and artillery. The animals are ordinarily assigned according to weight. The French military authorities find that a light carriage or riding horse weighs from 850 to 900 lbs. Such horses as these are assigned to the light cavalry corps. The next grade above, which in civil life passes as a "coupe horse," of medium weight, ranges in weight up to 1,050 lbs. This horse goes to serve the purpose of drill for the cavalry belonging to the reserve military forces. Above these there are still two grades of heavy horses. The first are those used for ordinary draught purposes and are commonly found drawing the omnibusses of Paris. These weigh from 1,100 lbs. to nearly 1,500 lbs. The heaviest horses are the Clydesdales and Percherons, which are oxen in size and strength, and which weigh from 1,300, up to nearly 2,000 lbs. None of these Percherons of the heaviest weight are employed in the military service, but some of the lighter ones are used for draught and artillery purposes."

A New Rifle for Uncle Sam.

The United States military authorities have decided to abolish the old Springfield rifle which they have used for so long with good results; but, as they wish to keep in the race with modern armies, a newer and better arm is to be adopted. Although not officially announced as yet, there is every probability that the Krag-Jorgensen, the invention of Capt. Krag, superintendent of the royal manufactory of arms at Konigsberg, Norway, will be the rifle adopted. The magazine of the Krag-Jorgensen is of fixed type and is placed horizontally below and to the left of the receiver. It holds five cartridges, which are loaded from the right hand. Closing the cover brings the magazine spring in bearing against the cartridges, which are pushed around under the receiver until they enter it in succession through a cut at its left hand upper surface. A cut-off permits its use as a single loader, and the light metal charges for loading the magazine enable it to be replenished very quickly. The gun weighs nine pounds eight ounces, and is 30 calibre. The barrel is surrounded by an outer metal casing, so that it may be handled during rapid firing, and has a knife bayonet attached to this casing by an ingenious clasp. The gun is well and strongly made, and endured the severe test to which it was subjected successfully in every particular. The gun, if it be decided to adopt it, will be manufactured at the Springfield armory.

About Earache.

London Tid-Bits.

There are simple remedies for most common disorders requiring no skilled attention, and even experts are often willing to give away cures that anybody can manage. No doubt many people have thanked the man who published without a patent this easy relief for the earache.

"I am afraid I have greatly interfered with my own practice," said a celebrated aurist, "by giving the following advice to many of my friends:

"At the first symptoms of earache let the patient lie on the bed with the painful ear uppermost. Fold a thick towel and tuck it round the neck, then with a teaspoon fill the ear with warm water.

"Continue doing this for fifteen or twenty minutes. The water will fill the ear orifice and flow over on the towel. Afterwards turn over the head, let the water run out and plug the ear with warm glycerine and cotton.

"This may be done every hour until relief is obtained. It is an almost invariable cure, and has saved many cases of acute inflamation. The water should be quite warm, but not too hot."

The Metropolitan of Canada Dead.

FREDERICKTON, N. B., Sept. 9.—The Most Rev. John Medley, D. D., LL D., Bishop of Fredericton and Metropolitan of Canada, died this morning. He was 88 years of age.

[Dr. Medley was born in 1804. He was educated at Wadham College, Oxford, where he graduated B. A. in honors in 1826 and M. A. in 1830. He was for three years curate of Southleigh, Devon; for seven years incumbent of St. John's, Truro, Cornwall, and for seven years vicar of St. Thomas's, Exeter, and prebendary of that cathedral, and in 1845 was consecrated, first Bishop of Fredericton. His diocese included the entire Province of New Brunswick.]

The British taxpayers have abolished the hereditary office of grand falconer, and are about to lay their iconoclastic hands on the post of the master of the buckhounds. Times have changed since James I. was king.

The Dominion Illustrated Monthly.

A very bright and interesting number is the September issue of the Dominion Illustrated Monthly. It opens with an amusing story by Mrs. K. A. Chipman called 'A Visitation at Vernecne;' followed by the concluding article of Mr. Lemoine's series on 'Our Historic Waterways,' a subject replete with interest to all. Another valuable contribution to history is a paper by Dr. Douglas Brymner, the well known Dominion Archivist, entitled 'How France saved the thirteen colonies;' throwing light on a subject which has hitherto been entirely unknown. A most interesting article is that on 'Social Life in Halifax' by Mrs. M. Tremaine of that city. Miss Madge Robertson, the well-known editor of the 'Ladies Pictorial Weekly,' gives an amusing sketch of 'Canoeing for Women,' and Miss Ethel Longley gives an interesting *resume* of 'A Sojourn in Stuttgart;' the paper is profusely illustrated. Mr. Lindsey of Toronto continues his series of papers on 'Cricket in Canada.' A delightful story entitled 'A Summer in Canada' by Miss A. M. McLeod is begun, as is also the first paper of a new department entitled 'Talks with Girls' in which the subject of 'Reading' occupies special attention. The Supplement this month is a portrait of the late Hon. Jno. Robson, the well known Premier of British Columbia. The publishers, 'The Saiston Litho. and Publishing Co.,' of Montreal and Toronto, deserve great credit for their enterprise in giving so interesting and handsome a publication for the very low price asked, $1.50 per annum.

ITEMS.

A telegraph office at Bologna was wrecked by a bomb explosion on Sunday.

Dwight L. Moody, the evangelist, delivered his farewell address in Belfast on Friday.

The funeral of the late John G. Whittier took place at Amesbury, Mass., on Saturday.

At St. Paul, Minn., yesterday Nancy Hanks trotted a mile a regulation track in 2.07, beating the world's record.

The amount of Austria's purchases of gold since the adoption of the new currency reform law is $7,000,000.

The C. P. R. has given notice of its intention to withdraw from the Trans Continental Association on January 1.

The Frankfort Zeitung declares the credit asked for by the new military bill will far exceed one hundred million marks.

A Victoria, B. C., despatch says more hay and grain will come down from the Frazer river valley this year than ever before.

The whaleback Wetmore went ashore near Empire City, Oregon, lies hard aground, and there is little hope of saving her.

Minnie Merrick, a female lion tamer, was probably fatally injured by one of her pets at a circus at Winstom, N. C., Saturday.

A petition against the recent decision in the Chicoutimi election case has been filed by Mr. Savard, the defeated candidate.

Peaches are scarce in Western Ontario this year, the grape crop is comparatively light and apple crop is a total failure.

Mr. Morgan, the defeated Conservative candidate in Richelieu, has entered an appeal against the return of Mr. Bruneau, Liberal.

The mangled remains of John J. Thompson of New York, aged 22, were found on the M. C. R. track at Tilbury Centre on Saturday.

Brantford has granted exemption from taxation for ten years to the Farmers' Binder Twine and Agricultural Implement Company.

Westrope McDougall, the 14-year-old son of Hon. William McDougall, had his left arm shattered by a shot gun at Pice lake last week.

Eleven election petitions are pending, arising out of the recent English general elections. Of these nine are lodged against anti-Home Rulers.

The Government cases against Thos. McGreevy, N. K. Connolly, Arnoldi, Talbot and others will come up at the Assizes in Ottawa this week.

George Hopkins of Centralia committed suicide at Windsor by jumping in front of a G. T. R. express. The deed was due to despondency.

Rev. Dr. Pierson, of Philadelphia, has been accepted as the permanent successor of the late Rev. C. H. Spurgeon and will assume his duties Jan. 1, 1893.

The sealing schooner Sayward has arrived at Victoria, B. C., from Behring sea, and reports Russian cutters have seized three hunting boats containing nine men.

At a Catholic congress held at Mainz, Germany, a resolution was passed affirming that the restoration of the Pope to temporal power was an essential condition to the independence of the Holy See.

During the month of August the revenue derived from the tax on Chinese arriving at the port of Vancouver, B.C., was $3,350, being $395 less than that of Aug. 1891.

Thomas Rooney of Plymouth, Pa., having lost all his money and property on the result of the Sullivan-Corbett fight, committed suicide on Friday by taking poison.

It is said that Chancellor von Caprivi will introduce military bills early next year to raise 70,000,000 marks for the German army by increased taxation on beer and tobacco.

The merchants of Winnipeg are considering the question of reciprocal trade relations with China and Japan. It is thought they should be good markets for Canadian flour.

The trades congress at Glasgow has adopted a resolution declaring that an eight hour day should be made compulsory, except where a particular trade balloted to be exempt.

Two men were lately caught sketching the engines of the British flagship Blake at Quebec. The sketches were destroyed, and now visitors are not allowed in the engine rooms.

Rev. C. J. Snepp of Boston, formerly of Hamilton, who disappeared mysteriously from Niagara Falls on July 25, has been found at the general hospital in Buffalo, registered as A. J. Fenton.

Eight persons were killed outright and nearly 30 injured by a collision between a through freight and an express on the Fitchburg railroad at West Cambridge, Mass., on Saturday night. The crash was terrible and much destruction of property resulted.

The clerk in the French Navy Department convicted of conveying secrets relative to French defences to Capt. Borup of the United States army has been sentenced to twenty years' penal servitude, to be followed by twenty years' banishment from France.

While an agent of the State Bank at Durango, Mex., was conveying $10,000 in gold coin through the Sierra Madre mountains, accompanied by 50 mounted men, the party was attacked by brigands and all killed but one after a desperate fight.

The King and Queen of Italy and 4,000 guests attended a grand ball in the municipal palace at Genoa on Friday night in honor of the Columbus celebration. The crowd was so great that dancing was impossible. The spectacle was the most brilliant ever seen in Genoa.

The Montreal Witness, referring to Sir John Thompson's probable succession to the premiership, says the entrance of Clarke Wallace into the cabinet will, it seems, satisfy an element in the Conservative party which otherwise would not follow the lead of Sir John Thompson.

Leaks in cisterns can be repaired by applying to the seams a mixture of four parts of linseed oil, boiled with litharge, and eight parts of melted glue, mixed well together. In about two days after application, it will be found to have set so hard that water can again be admitted with safety.—Exchange.

Prof. Hoffkine, of the Pasteur institute, in Paris, who discovered anti-cholera vaccine, declares experiments on himself and Dr. Jawein, of St. Petersburg, and Dr. Tamamcher, of Tiflis, prove that the vaccine is without danger to health, and that it gives immunity from cholera six days after inoculation.

Experiments on a considerable scale are being made in the German army with aluminum as a means of lessening the weight which the men have to carry. This is the case, for instance, in the 1st Regiment of the Foot Guards, in which 10 men out of every company have received the various articles of their equipment either bound with or constructed of aluminum.

In Conception Convent, City of Mexico, a nun discovered an old document which stated that $3,000,000 in gold had been buried at the time of the war with the French under a certain house, which was formerly part of the convent. The priests ordered an excavation, but the Government stopped proceedings, unearthed the large sum and placed it in the Government coffers.

An idea of the rapidity and terrible certainty with which cholera travels is conveyed in the information that the pestilence originated in India, where it is indigenous, and carried by Mahometan pilgrims into Central Asia along the line of route to the holy city of Meshed, in Eastern Persia, was first reported in Afghanstan and Turkestan last spring. It entered Russia at the port of Baku; on the Caspian Sea.

TEMPERANCE IN CHARLOTTETOWN.—In the progress of the Prohibition Commission it was elicted from E. J. Hodgson, Master of the Rolls, that "extreme temperance people and the lowest kind of rum sellers had united to vote for the Scott Act!" It was time for the temperance people to say *non tali auxilio*, and return to even *free* rum selling. That ensures open competition in good liquor—not the reverse.—Canadian Churchman.

TEMPERANCE REFORM.—The Guardian in a strong editorial, recommends the Bishop of Chester's proposal to the Church of England Temperance Society, as the only society which professes not to consider total abstinence the only panacea for the ills of intemperance. The proposal is like the Gottenberg system (where it reduced drunkenness 50 per cent.) of Norway and Sweden (Government management), and somewhat like Dr. Reinsford's idea.

"A healthy body which is capable of itself putting a check on the development of morbid micro-organisms is the *best means of combatting* them—sanitary measures which *prevent* the very appearance of morbid germs are the surest means against the possibilities and risk of infection." Krapotkin goes on to show that the healthy body possesses natural guards ("*Alexins, sozins or phylaxins*") which attack and destroy disease germs as soon as they appear.

Travellers say the most costly railway station in the world will be the Waverly station, which is the Edinburgh terminus of the North British company for in the company's negotiations with the municipal authorities it was stated that the immediate approaches, station, etc., would cost at least £1,000,000. The finest station in the world at present is that of the Indian Peninsular railroad in Bombay, which cost in our money $1,500,000 and took 10 years to build. The finest in Europe is to be the new central station at Frankfort-on-the-Main in Saxony.

Among the precautions that are taken by the people of the South during the prevalence of a yellow fever epidemic is the wearing of small buckskin bags containing gum camphor. These are suspended from the neck in such a manner that they rest against the skin over the chest. A bit of camphor carried in the mouth while one is in a sick room is also sometimes used by nurses and physicians. Sulphur likewise encased in bags, carried in the pocket or sprinkled in the stockings, has frequently been used in cholera, diphtheria and other epidemics. The consciousness that one has a possible preventive of contagion on his person is calculated to allay apprehension, which in itself occasionally provokes an attack of the disease.

Guinness's stout holds the place as a favorite beverage. At the ordinary meeting recently held at the Cannon Street Hotel the report stated that the net profit for the financial year, after making provision for bad debts and including dividends on investments and interest on loans, amounts to £685,609 17s. 5d. This, together with £68,427 3s. 10d. carried forward from the last account, makes a total of $754,037, 1s. 1d. The directors propose to add £100,000 to the reserve fund and £80,000 to the depreciation fund, and, subject to the approval of the general meeting, to pay to the ordinary stockholders a final dividend of 9 per cent. for the half-year, making with the interim dividend of 6 per cent. paid March 1 last, a total dividend for the year ended June 30, 1892, of 15 per cent. free of income tax. These payments will absorb £855,000, thus leaving a sum of £40,973 15s. 7d. to be carried forward to the next account.

It is a somewhat remarkable fact that, though steel is intermediate in chemical composition between wrought iron and cast iron, containing more carbon than the one and less than the other, its properties are quite different from either of them; it may be made to resemble either of them alternately, but it is principally used in a third condition and in its capacity to assume which the great value of steel consists. Briefly, annealed steel has nearly all the properties of lead, being very soft and mallable: hardened steel has nearly all the properties of glass, being very hard and brittle; tempered steel has most of the properties of whalebone, being hard but at the same time elastic. The chemical change which takes place during these processes has not yet been discovered. Again, it is a remarkable fact that the specific gravity of hardened steel is less than that of the unhardened, another singular point being that steel of course expands with heat, and when it is allowed to cool slowly regains its original size; but if it be cooled suddenly, the only way in which it can be hardened, although it contracts very much, it does not quite reach the small size of the unhardened state.

Electric Vehicles.

One of the commonest remarks heard nowadays is that electricity is now in its infancy. When it has reached its full growth we will see many wonders performed by it, no doubt, one of which will be the propulsion of all kinds of street vehicles by it. Just now Chicago is experimenting with an electrical road carriage. Of it the New York Electricity says:

"That vehicle is now astonishing the natives by exhibiting its motive capacities on the streets of Chicago. It is a three-seated affair, and weighs complete with storage battery 5,500 pounds. The cells, of which there are twenty-four, are arranged under the seats, in series of eight which are coupled in series, multiple series, or in multiple, according to the requirements. The motor, which is beneath the carriage, is rated at 2½ h. p., and is considered too light for the service. The owners, the American Battery Company, intend to shortly replace this with a 4½ h. p. motor. The greatest speed at present is about seven miles an hour, and this it makes with a consumption of about 40 ampers."

Suggestion for a Summer Trip.

If you wish to take the trip of a lifetime, purchase the low rate excursion tickets sold by all principal lines in the United States and Canada via the Northern Pacific Railroad to Yellowstone National Park, Pacific coast and Alaska.

The trip is made with the highest degree of comfort in the elegant vestibuled trains of the Northern Pacific Railroad, which carry dining cars and luxurious Pullman sleeping cars from Chicago, St. Paul and Minneapolis to Montana and the Pacific coast, without change, and special Pullman sleepers from St. Paul and Minneapolis to Yellowstone Park.

The senery *en route* is the most magnificent to be found in the seven states through which the road passes. Beautiful mountains, rivers, valleys, lakes and plains follow each other in succession to delight the tourist, who will also find interestin the agricultural, mining, lumbering, industrial and other interests associated with the development of the great Northwest.

For Over Fifty Years

MRS. WINSLOW'S SOOTHING SYRUP has been used by millions of mothers for their children while teething. It disturbed at night and broken of your rest by a sick child suffering and crying with pain in Cutting Teeth send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures Diarrhœa, regulates the Stomach and Bowels, cures Wind Colic, softens the Gums, reduces Inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price twenty-five cents a bottle. Be sure and ask for MRS. WINSLOW'S SOOTHING SYRUP

Will Iron Rust Cause Fire?

A good authority says it will, and that when the oxide of iron comes in contact with wood away from the atmosphere the oxygen that was in the iron leaves it and what remains crumbles into small particles of metal with such an affinity for oxygen that as soon as exposed to the atmosphere it becomes red hot, capable of igniting wood very readily. This furnishes a good reason for keeping a lookout for rusty metal that scales off and drops from pipes and other metallic substances employed in mills. Particularly should out-of-the-way and dark and dark corners be frequently and carefully cleaned.—Canadian Lumberman.

A Plea for Onions.

It seems a shame that a vegetable so healthful as onions should be so generally disliked. Any physician will tell you that a dish of onions will be a whole some addition to the vegetable diet, will be beneficial to the nerves and will often help to ward off diseases. When a liking for them is not natural it should certainly be acquired; the most disagreeable feature about them, to those who are not fond of them, is the odor; and one should be very carefully in preparing the dish to have this noticed as little as possible.

By holding the hands and knife under water while clearing them you will avoid the unpleasantness in eyes and nostrils.

An Awful Warning.

Atlanta Constitution.

He didn't read the papers for they
hadn't any news—
At least they didn't coincide with his
especial views—
And, when he came to town one day
with criticism ripe,
He climbed to an electric lamp to light
his ancient pipe.
He hadn't read the papers—but he
knew just what was best;
He simply touched the wire, and the
fluid did the rest.

The One Who Remembers.

Exchange.

Old Flink—I doubt if one man out of twenty can recall to memory the language he used in proposing.

Young Stewpid—Probably not. But the girl can. Mine did. When the breach of promise suit came up she was able to repeat my proposal word for word.

Rev. Canon Read, D.D., died at Grimsby on Wednesday, the 17th inst. His funeral took place on Saturday, when 30 clergymen, with the bishop of the diocese, were present. Having been rector for 25 years, and been foremost in all religious and philanthropic work, the deceased had such a strong hold on the community that his funeral was the largest that has ever taken place in the vicinity of Grimsby. The rev. doctor will be very much missed in his late field of toil. He had reached the ripe age of 76 years.

The Bond Nuisance.

Of the Lubon edical Company is now at Toronto, Canada, and may be consulted either in person or by letter on all chronic diseases peculiar to man. Men, young, old, or middleaged, who find themselves nervous, weak and exhausted, who are broken down from excess or overwork, resulting in many of the following symptoms: Mental depression, premature old age, loss of vitality, loss of memory, bad dreams, dimness of sight, palpitation of the heart, emissions, lack of energy, pain in the kidneys, headache, pimples on the face or body, itching or peculiar sensation about the scrotum, wasting of the organs, dizziness, specks before the eyes, twitching of the muscles, eye lids and elsewhere, bashfulness, deposits in the urine, loss of will power, tenderness of the scalp and spine, weak and flabby nucles, desire to sleep, failure to be rested by sleep, constipation, dullness of hearing, loss of voice, desire for solitude, excitability of temper, sunken eyes surrounded with LEADEN CIRCLE, oily looking skin, etc., are all symptoms of nervous debility that lead to insanity and death if not cured. The spring of vital force having lost its tension every function wanes in consequence. Those who through abuse they have committed in ignorance may be permanently cured. Send your address for book on all diseases peculiar to man. Book sent free sealed. Heart disease, the symptoms of which are faint spells, purple lips, numbness, palpitation, skip beats, hot flushes, rush of blood to the head, dull pain in the heart with beats strong, rapid and irregular, the second heart beat quicker than the first, pain about the breast bone, etc., can positively be cured. No cure, no pay. Send for book. Address M. V. LUBON, 24 Macdonell Ave., Toronto, Ont.
