Don't forget that we do cleaning, pressing and repairing. Our prices are right and our workmanship is the very best.

S. J. BOWLER

Sole Agent for the Hobberlin Tailoring.

The Poultry Raiser's Opportunity

From present indications Great Britain will require all the eggs and poultry Canada can produce during 1916. Last year as a result of greatly increased production, Canada was able to ship to Great Britain the largest quantity of eggs exported since 1902, and at the same time reduced her imports for home consumption by nearly a million dozen.

Canadian eggs have found favo ur on the British market, and the prospects are that, providing they are available, much larger quantities will be shipped this year. The unusually high prices prevailing at the present time are largely due to this anticipated export demand.

Prices for poultry are also high, and will likely continue so for the rest of the season. Last fall and winter all the surplus Canadian poultry was exported at highly profitable prices. Between 50 and 60 cars of live poultry were shipped from Western Ontario to the Eastern States alone, and in the Maritime provinces, particularly in Prince Edward Island, the export demand for canned poultry has greatly enhanced prices to producers.

Although some uneasiness has existed on the part of the trade as regards transportation facilities in view of the high frieght rates and the shortage of boats, it is now reasonably certain that an even greater demand for Canadian poultry and eggs will occur this year. It is important, therefore, that every poulty producer takes steps to profit thereby, by hatching as many chickens as possible this spring.

Now is the time, by hatching early, by hatching everything possible in the mon h of May, to guard against the marketing of so much small, undersized, poorly finished poultry, which annually becomes a drug on the market in the fall of the year. Again it is only by hatching now, and giving the chickens every possible chance to thrive and grow, that a maximum supply of eggs can be obtained in the winter time.

Given their proportionate amount of attention, the growing of poultry brings quick and profitable returns to the farmer. With the increasing cost of meats, milk, butter, etc, there is a constantly increasing demand for poultry and eggs. The labour pro blem is not critical, as the boys and girls on the farm can readily take care of the poultry. The cost of feed is nominal, prices for poultry and eggs are high,—the highest in fact, for many years. It is obvious, therefore, that Canadians have a patriotic, as well as an economic duty to perform in making the year 1916 the banner year for Poultry Production in Canada.

FARMERS

Consider *Purity* in *Paint* in *Preference* to Price.

You wouldn't pay the regular price for Sugar that analyzed 10% of sand. You wouldn't pay "all wool" prices for cotton-and-wool clothing. Why should you pay your good money for impure Paint, when you can get

MARTIN-SENOUR "100% PURE" PAINT

We guarantee Martin-Senour "100% Pure" Paint (except a few dark shades that cannot be prepared from pure Lead and Zinc alone) to be *100% pure* White Lead, pure Oxide of Zinc, pure Linseed Oil, pure Colors and Turpentine Dryer; and to be entirely free from adulteration or substitution; and sold subject to chemical analysis.

Every experienced Painter knows that the above formula is right. It is the standard of the paint world.

You get absolute purity — extreme fineness — uniform quality—when you insist on "100% Pure" Paint.

SENOUR'S FLOOR PAINT The old reliable.
RED SCHOOL HOUSE PAINT for the barn and sheds.
MARTIN-SENOUR WAGON and IMPLEMENT PAINT for wagons, tools, etc.

Write direct to the Martin-Senour Co., Limited, Montreal, for their 1916 Booklet, "Town and Country Homes", showing many new color schemes and giving valuable paint information. 75R

F. G. KARSTEDT, FLESHERTON, Ont.

MARTIN-SENOUR PAINT & VARNISHES — MARTIN-SENOUR SPIC SPAN FINISHES

Our SOUTHERN COUSINS

BEING 1,200 miles from Australia—her nearest relative—New Zealand is probably the most isolated civilized region in the world, and for the reason that most of those who live there are of the same race as ourselves, we should be especially interested in this beautiful country and her people. New Zealand is made up of a group of islands, comprising in all about 104,751 square miles. The coast lines are very flat generally, and the total circumference of the three main islands is 4,330 miles. The interior of New Zealand is interspersed with hills, valleys and plains, all of remarkable beauty. It has been said that both the scenery and climate of those fair lands resemble those of Italy and Sicily. There is always ample rain but never superabundance of it; azure is the favorite color worn by the sky, and the islands are like emerald and golden gems set in the silver form of the Pacific.

New Zealand is a productive country; the finest sheep and cattle are reared on the rich pastures, and oats, barley and maize are grown in abundance. Along the hillsides there are rich forests, and tracts of elevated ground that are too rocky to produce vegetation that is of commercial value never fail to grow plants that are delightful to the sight of man; no less than 140 species of wild fern are to be found in New Zealand, and many of these are 40 feet in height. There are volcanoes on some of the mountains, and adown the sides of others noisy rivers take their rapid courses. Parrots chatter merrily on the tree tops, and pigeons coo in the recesses of the woods. These are practically the only native birds. Native animals are also few, but European birds and animals, and even fish, have been introduced with success. Gold, coal, copper and sulphur are the chief of the New Zealand minerals. Gold was first discovered in 1853, and since that time something like $350,000,000 worth was found. Auckland is the principal gold mining area. The Canadian Australasian Line has a regular service of fine passenger steamers between Auckland City and Vancouver.

At present the population of New Zealand is something like 1,000,000 people, and nearly all are of British extraction. Still there are 45,000 colored folks. The early inhabitants of the country were the Maori tribe; they came there in their war canoes in the fourteenth century. In 1642 the islands were discovered by Abel Janson, a Dutch sailor, and Captain Cooke visited the place in 1769. It appears that when the famous captain returned to England he gave the English people a wrong impression of the place; he reported that the islands did not seem to be of much value, also that the Maori people would be a formidable race to attempt to conquer. Anyway, for 70 years after Captain Cooke's visit the British Government did not think it worth the trouble to annex the present proud possession. It was in 1840 that the Union Jack was first hoisted on the shores. At that time the Maori folks numbered 65,000. The decline in the race since then is due to disease and to war, for both have played a big part in the history of the Maoris. Before the British came these people warred amongst themselves, and later they warred against the British. Up to 1770 they knew nothing about pottery or metal, and until that period their battle instruments were their fists, clubs and stones—they were even unaware of the existence of bows and arrows. For themselves this was all the better, for immediately after the introduction of guns and swords amongst them fully one-fourth of them became no more. As time progressed those of the Maoris who were left progressed also, and between 1830 and 1840 many of them became Christian. Now the Maori children go to school side by side with children of our Southern cousins. Maori representatives take their part in the government of their country. Some of the Maori people are skilled at wood-carving and dyeing; they are an imaginative race, and have delightful poetry and tales to recite and tell. Their homes are pretty and their home life simple.

New Zealand has many things in common with Canada; she is a new country rapidly developing; she is rich; she is patriotic; she has sent thousands of brave soldiers to fight for the Empire in this great war. In New Zealand there are more men than women, and it is quite likely that after the war she will be a resort for some of the superfluous ladies of the Old Country, who, unable to have the opportunity of blessing some man at home, will seek the chance of blessing one abroad.

Notice

Dr. R. F. English, Osteopathic Physician, of Owen Sound, will be in Flesherton on Tuesday and Eriday afternoon of each week. Commencing Friday, June For appointment phone 9 ring 3.
