Solve Big Problem.

The railway unions of this town have solved the high cost of living. Some time ago a special committee was appointed to purchase food and fuel supplies as required by their members. The committee has handled within the past week two cartloads of potatoes, two cars of wood, forty head of cattle, two tons of honey, eight carloads of coal and fifty carloads of hardwood. In a few days it expects a carload of groceries and two of apples. The committee is composed of twenty-five members, representing different crafts, and has saved 30 per cent. on its purchases to date.—The Brantford Courier.

Just A Few Words, Mr. Farmer

You have been thinking of buying a MELOTTE Separator for the past two or three years,—or perhaps you did think about it once but was pursuaded into taking some other make guaranteed "just as good and not half the price." Every month the "MELOTTE" is replacing scores of these "Just As Good" machines which find their last resting place on the junk pile.

If you have never used a Cream Separator, don't be a "back number" any longer.

If you are using some hard turning, troublesome, top-heavy bowl separator which is causing as much waste of valuable butter-fat as the old setting pan or gravity system,—Throw It Out And Install In Its Place A Money Maker—the "MELOTTE".

We have a "MELOTTE" here for you, and would be glad to have your name added to the long list of satisfied "MELOTTE" Users. Just let us know that you are thinking of a Separator and we will be glad to talk the matter over with you.

Keep hens this year

EGG and poultry prices, the like of which have seldom or never been experienced, certainly make it worth anyone's while to start keeping hens. By doing so you have fresh eggs at the most trifling cost. At the same time you have the splendid satisfaction of knowing that you are doing something towards helping Britain, Canada and the Allies achieve victory this year.

Increased production of food helps not only to lower the high cost of living, but it helps to increase the urgently needed surplus of Canada's food for export. It saves money otherwise spent for eggs and poultry at high prices, and saves the labor of others whose effort is needed for more vital war work.

The Ontario Department of Agriculture will give every possible assistance by affording information about poultry keeping. Write for free bulletin which tells how to keep hens (address below).

"A vegetable garden for every home"

Nothing should be overlooked in this vital year of the war. The Department earnestly invites everyone to help increase production by growing vegetables. Even the smallest plot of ground, when properly cultivated, produces a surprising amount of vegetables. Experience is not essential.

On request the Department of Agriculture will send valuable literature, free of charge, giving complete directions for preparing soil, planting, cultivation, etc. A plan of a vegetable garden, indicating suitable crop to grow, best varieties and their arrangement in the garden, will be sent free to any address.
