JEWELLER, FLESHERTON

Notice to Creditors

In the matter of the estate of James Magee, late of the Township of Artemesia in the County of Grey, Farmer, deceased.

Notice is hereby given, pursuant to "The Trustee Act," (R. S. O. 1914, Chapter 121) that all creditors and others having claims against the estate of the said James Magee, who died on or about the Twenty-fifth day of Feb., A.D. 1918, are required on or before the eighteenth day of May, 1918, to send by post prepaid or deliver to Alex. Cameron, Eugenia, Ont., or to Fred. Pedlar, Eugenia, Ont., the Executors of the last Will and Testament of the said James Magee, deceased, their Christian and Surnames, addresses and descriptions, the full particulars of their claims, a statement of their accts. and the nature of the securities, if any, held by them.

And take notice that after such last mentioned date the said Executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice, and that the said Executors will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been given by them at the time of such distribution.

Dated the eighteenth day of April, 1918

—WRIGHT, TELFORD & BARLOW
Solicitors for the said Executors.

Don't Wait and——Wish
Work Now and——Have!

When drastic regulations for the rationing of food come into effect (and such an Order in Council may be made very early next Fall) you will wish then, that you had a crop of nice vegetables ready to take off your garden or nearby piece of vacant land that you could have cultivated if you had *really wanted to.*

Well, all we say is—

Don't Wait and—Wish

If you have not yet decided to plant a vegetable garden make up your mind to do so now. You will not regret it. There is still lots of time. Potatoes and beans may be planted up to June 1st and these are the best substitutes for wheat and meat.

For good, practical advice upon how to lay out and cultivate a Vegetable Garden, write for a free copy of the booklet entitled: "A Vegetable Garden for Every Home." This has been prepared by the Ontario Department of Agriculture for the guidance of citizens who will respond to this call for increased production.

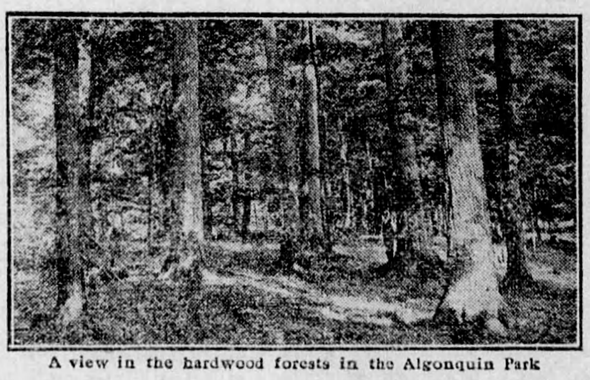
FUEL SUPPLY FREE

To Municipalities of the Province of Ontario



A view in the hardwood forests in the Algonquin Park

OWING to the seriousness of the fuel situation at the present time, the Government of Ontario would urge upon all the farmers or others who may have wood lots, to assist at this time by making provision for their fuel supply from such lots.

The Government would also draw the attention of the various Municipalities throughout the Province to the necessity of taking some Municipal action to secure fuel supply. To this end the Government has decided to issue to any Municipality in Ontario a permit to cut fire wood in Algonquin Park or from other Crown Lands free of charge. For particulars as to localities, conditions of cutting, etc., apply to

G. H. FERGUSON,
Minister of Lands, Forests and Mines,
Parliament Buildings, Toronto.

THE BOYS & GIRLS

Who have been work- so strenuously on the farms producing food food for those at home and Overseas should be given the opportunity of improving their Education during the slack winter months at the

NORTHERN Business College

The fees are no higher than when farm produce sold at half the price of today. The young people will be benefited throughout life from the training in Business obtained in a few winter months of our Special Business Course. Winter term begins, Wed. Jan. 2 Circulars free.

TORONTO - ONTARIO

Where women's interests are supreme—

Under the heading, "For and About Women," the interests and activities of the modern woman are taken care of daily in

The Mail and Empire.

There the feminine reader sees the diversified concerns of her sex reflected in brief, informative articles of timely interest. Children and War Savings, Domestic Service Reform, An Interesting New Wardrobe, Central Kitchens, and An Independent Family, are a few of the topics discussed in recent issues. Part of the same page is "On Dit," in which current social events are chronicled. Any woman who wishes to keep informed on what is going on in her own particular sphere may do so by reading daily "For and About Women" and "On Dit." On Saturdays "Woman's Kingdom" is an additional feature especially interesting to women readers.

$4.00 per annum by mail—$5.00 delivered.

Order through dealer, local paper or direct.

First class livery in city of 18,000. It is the oldest established and best located in the city. There are 18 horses with very best equipment, doing a thriving business. Last month was over $725. But one competitor. Will sell for cash or consider an exchange on a farm. Apply to

WILLOUGHBY FARM AGENCY,
Guelph and Georgetown, Ont.

For Service

One pure bred Shorthorn Bull on lot 36, con. 9, Artemesia. Terms $1.50 for grades. Must be paid within 9 months from date of service.

1 Jan. 19. —R. O. TURNER.

CROPS ARE INCREASED

Quicklime for Heavy Soils, Ground Limestone for Light Soils.

SEPTIC TANK FOR THE FARM

Potatoes Should Be Treated This Year to Control Scab, as the Success of This Crop Is of the Utmost Importance In the Greater Production Campaign.

(Contributed by Ontario Department of Agriculture, Toronto.)

THE soils in many parts of the province are so depleted of their lime that they are becoming sour or acid. This is an important fact as few, if any, of our farm crops can make their best growth on a soil carrying an insufficient supply of lime. This is especially true of leguminous plants and it is probable that the frequent "killing out" of clover during the first winter is due to lack of sufficient lime.

Lime acts in several ways. It neutralizes the acids formed in the soil through the decay of organic matter; it overcomes the tenacity of clay soils, binds sands together and thus improves the physical condition of both types of soil. Lime is not only an essential constituent of the food of plants, but it also tends to liberate plant food, especially potash, from the insoluble forms in the soil, bringing them into an available state. The micro-organisms that live on the roots of the nitrogen-gathering plants cannot work in an acid soil, nor can some other forms of organisms whose function it is to gather nitrogen.

It requires about two tons of ground limestone rock to be equal to one ton of quick lime, and the prices charged for them are in about the same proportion. Furthermore two tons of the former to one ton of the latter are about the right quantities to apply.

The ground limestone rock is safe on any land in almost any quantity, and may be applied at any time of the year. On heavy clay soils quick lime, slaked before applying, may give quicker results; but it should not be applied to light sandy soils. Few materials or fertilizers can have so many good things said about them as lime and none of them cost so little money. Try out a little yourself this year.—Prof. R. Harcourt, Ontario Agricultural College.

To Prevent Potato Scab.

For seed select smooth, sound potatoes, as free as possible from scab, and disinfect by soaking them before they are cut for two hours in a solution made by adding half a pint of commercial formalin to 15 gallons of water. A couple of barrels with plugs in the sides near the bottom can be used to advantage in treating the seed. The potatoes can be placed directly in the solution or first put in crates or coarse sacks and then immersed.

After treatment spread the potatoes out on a clean floor or on the grass to dry. Wash all crates, bags, etc., which are used in handling the potatoes with the formalin solution. The same formalin solution can be used to treat successive lots of potatoes. Fifteen gallons is sufficient to treat from 20 to 25 bushels if ordinary precautions are taken not to waste too much of the fluid as each lot of tubers is dipped. If the potatoes are not all treated the same day it is advisable to make up fresh formalin for each day's work.

Corrosive sublimate (mercuric chloride) can also be used to treat potatoes to prevent scab. Soak the uncut tubers for three hours in a solution of 2 ounces of corrosive sublimate to 25 gallons of water. Corrosive sublimate is a deadly poison, and potatoes treated with it are rendered unfit for food for man or beast.

Formalin is a clear liquid disinfectant. It is a 40 p.c. solution of formaldehyde gas and water. It can be purchased from almost any druggist. It is sold under the names of formalin and formaldehyde. It is important that the purchaser, whatever name he buys it under, secured a guaranteed solution of 40 p.c. formaldehyde.

If possible plant the treated seed potatoes on clean soil, that is soil that has not produced a crop of scabby potatoes. Practice a rotation of crops. If scab is very bad it is not advisable to plant potatoes on the same land oftener than once in five years. Heavy applications of barnyard manure should not be made to the potato crop, but if necessary given at some other point in the rotation. Plant potatoes after clover sod if possible. Avoid alkali fertilizers such as lime and wood ashes.—Prof. J. E. Howitt, Ontario Agricultural College.

Septic Tank for Sewage Disposal.

This system consists ordinarily of a two-chamber concrete, water-proof tank equipped with an inlet, overflow and vent pipe, and an automatic siphon for emptying the tank of the liquid sewage from time to time, and a system of tile, called the "absorption bed," consisting of several parallel rows of 3 or 4 in. land tile laid with open joints, almost level, and shallow, and branching off from a main line of sewer pipe which connects it to the tank. For the ordinary-sized home each tank should be about 3 ft. square and 3 ft. deep, and 150 to 200 feet of land tile would be required for the absorption bed. The vitrified sewer tile is best for the main and the number of them will depend upon the distance of the absorption bed from the tank.

If this system be properly installed it will dispose of sewage in a very satisfactory manner and without endangering the water supply. Complete plans in blue-print form for installing it may be secured for the writing from the Department of Physics, Ontario Agricultural College, Guelph, Ont.—R. R. Graham, B.S.A., Ontario Agricultural College, Guelph, Ontario.
