NEWS AND INFORMATION FOR THE BUSY FARMER

(Furnished by the Ontario Department of Agriculture)

Spread Manure on Sod

In preparing land for wheat, J. H. Matthews & Sons of Delaware do not apply manure directly before sowing the wheat but the fertilizer is spread on sod the year before and a crop of hay cut. The field is then plowed and worked down for wheat. This practice is followed in the application of all manure, a mixture of 150 pounds per acre of 2-12-6 fertilizer is used for wheat.

New Green Houses for O.A.C.

Another big undertaking in connection with the Government's 1930 building program at the Ontario Agricultural College has been announced by Dr. G. I. Christie, president of the college. The latest project, which will be started at once, is the erection of new greenhouses at a cost of $75,000. They will permit the carrying on of research work on a scale never before possible at O.A.C.

Plowing Match Dates

Some dates of Branch Plowing Matches to be held under the auspices of the Ontario Plowmen's Association for this year are as follows:

Bruce Co., Culross twp., October 10.
Middlesex, Adelaide twp. Oct. 21-22.
Norfolk, Port Dover, October 22.
Ontario, North, October 10.
Russell, Russell, October 21.
Victoria, Bobcaygeon, October 21.
Wentworth N., Beverly twp., Oct. 22.

Sheep Parasites

There are two general types of parasites common to sheep, namely internal and external. Of the two types, the internal parasites are the most deadly as serious infections by this type are usually fatal. Stomach worms and tapeworms seem to be the most common of this variety while ticks and lice cause the most harm done by the external type. The wool clip is reduced and the general well-being of the flock lowered when ticks and lice are present. These kinds of parasites can be effectively controlled by dipping. Sheep which are well fed and kept under sanitary conditions are in a better position to withstand parasite infestation because of their higher resistance. If the pastures are rotated, this will also be a measure of prevention. Many losses in the lamb crop can also be prevented by drenching breeding ewes before they are turned out on pasture.

O. A. C. Scholarships

Between 50 and 60 scholarship winners who are among the freshmen class which enrolled recently for the fall term at the O. A. C., Guelph, are to have their fees remitted, according to instructions issued by Hon. Thomas L. Kennedy, Minister of Agriculture. The saving to the students will be $1,000 it is estimated. Among the scholarship students are 15 farm boys who won two years' tuition at the college—the gift of a large Toronto merchandizing firm. These particular scholarships carry with them a cash prize of $100 to be paid over the school term. The 15 boys in question were selected from the 500 young farmers who attended the Royal Winter Fair last fall and wrote essay examinations on what they saw and did while there.

Bacon Hog Fair

The Middlesex County Bacon Hog Fair will be held at Thorndale on Monday, October 6. This fair, which is to be held under the auspices of the Dominion Live Stock Branch and the Provincial Department of Agriculture is being arranged with a view to interesting the farmers of the district in the production of select bacon hogs. Hogs for the market classes will be graded as they are brought into the fair, giving the farmers an opportunity to see the actual grading and to gain the fullest information possible about grading and what the market requires. The judges will give reasons for the placing of all classes, giving the farmers an opportunity to study the type of hog that is in demand and ascertain the requirements from the standpoint of quality and thriftiness.

Favors Use of Tractors

A well-known farmer of Western Ontario who has had 11 years' experience in the operation of a prominent make of tractor claims that in ordinary field work a tractor of modern design will do as much work as three to six teams of horses. "As to cost," he says, "there is no feed or time lost when the tractor is not in use. This is a big item. I figure the average cost for plowing as follows: Fuel and oil, 55c. per acre; time of operation, 35c.; interest and overhaul, 20c.; depreciation, 25c. This makes a total of $1.35 per acre. The beauty of the tractor is that work can be rushed when the land is in proper condition for working thereby securing better tillage and of course, eventually cleaner and larger crops."

Winter Rye and Barley Tests

Five varieties of winter rye have been under test at O.A.C. in each of the last thirteen years. The highest yields of grain per acre were produced by the New Invincible and Rosen varieties. The New Invincible surpasses the common variety in yield of grain per acre by 7.4 bushels for the average of a 13-year period.

Two varieties of winter barley have been under test at the college for the past 23 years the Tennessee winter barley producing an average for the period of 44.3 bushels of grain per acre. Winter barley is much more subject to injury through winter killing than either winter wheat or winter rye.

Radio Broadcasts

The markets branch of the Ontario Department of Agriculture commenced early in September a series of daily radio broadcasts over station CFRB at 12.40 noon. These daily talks are specifically prepared to assist the housewife in buying Ontario quality products for her table. Each day one specific product is discussed in detail. During the first week talks were given on peaches, beef, eggs, tomatoes, apples and melons. The broadcasts point out to the consuming public the advisability and economy of buying graded Ontario products of quality and follows up with daily market quotations and suggestions as to the best time to buy. Listeners wishing further information on any specific products are asked to phone or write the Markets Branch, Parliament Buildings, Toronto.

Empire Fruit Show

Ontario apple growers are watching their orchards closely for the selection of apples and other fruits to be shown at the Empire Fruit Show in Leicester England, October 24 to November 1. Fruit growers from all parts of the Empire will compete for honors and the competition promises to be keener than ever for the championships, cups and medals. The various Provincial Governments, as well as the Dominion Fruit Branch, are exhibiting special displays while the individual entries from growers and organizations will show the British market the excellence of Canadian apples and other fruits. At last year's show in Birmingham over 90,000 people attended. One of the features is the free distribution of Canadian apples by the Empire Marketing Board. This year they will be distributing over 20,000 individual specimens.

It will pay you to advertise in The Chronicle.
