SHOWING AT CHICAGO

When the 40th International Live Stock Exposition and 21st International Grain and Hay Show open at Chicago on December 2nd there will be a large number of entries of cattle, horses, sheep, grain and seeds from Canada. Last year Canadian exhibitors at the two great International shows scored a total of 365 awards, made up of 17 Grand Championships, seven reserve championships, 61 first prizes, 279 other prizes and one trophy.

One of the most coveted awards won by Canada in 1938 was the world's wheat championship, which went to F. Lloyd Rigby of Wembley, Peace River district, Alberta, on his sample of Reward wheat.

WATER FOR THE COW

According to dairy authorities, water is the most important part of the dairy cow's ration since water represents at least seven-eighths of the material which goes into the milk pail. A shortage of water will cut down the milk supply more quickly than a shortage of any other part of the ration. Tests show that a cow will consume from three to four pounds of water to each pound of dry matter eaten. The average animal in the herd will drink around twelve gallons per day. A plentiful supply of water is of essential importance in cold weather.

GREEN FEED FOR HENS

It is advisable to have a part of the hen's rations made up of green feed. Its function is not so much the supplying of food nutrients as assisting in the digesting of other feeds and keeping the hen in good health. A heavy laying hen will succumb in a very short time unless she is kept in a laxative condition and poultry feeders find green feed a lot more practical than drugs. So far as possible the green feed should be grown on the range to which the birds have access. In the Fall and Winter green feed may be furnished in the form of root crops, cabbage and the like.

Price Frightens Penguin Buyers

Boston "Hub's" "penguin market" boomed last week, but later suffered a sharp drop when a price of $150 apiece was set on the birds.

The rush started when Admiral Richard E. Byrd told newsmen he didn't know what to do with his collection of 20 of the birds while he was in the Antarctic. A dozen requests for penguins came in promptly by wire, and the doorbell of Byrd's home rang frequently, but the demand diminished when inquirers were informed that penguins came high.

Crochet Champ

Frank Mortensen, of Midvale, Utah, a "mucker" in the Midvale smelter, is shown at his home pursuing his favorite hobby of crocheting and embroidering after working hours. Mortensen has just been crowned the new crochet and embroidery champion at Utah's state fair. His cross stitches and needle work made feminine entries in the sewing competition envious.

Bible Widely Read

The Scriptures now have been published in more than 1,000 languages, according to the Rev. Geo. G. Dilworth of Philadelphia, secretary of the American Bible Society.

"Total circulation has fallen because of the war in China and a combination of circumstances in Japan," he told the Presbyterian Synod of New Jersey. "But in spite of these handicaps in these two great mission fields, a grand total of more than seven and one-third million copies of Bibles, Testaments, Gospels and portions have been distributed throughout the world."

Canada's Navy In Action On Both Coasts

The above views show some of the various duties of the Royal Canadian Navy on both coasts. Left, top to bottom: One of the fast destroyers on patrol duty along the seaboard: A depth charge exploding astern of a speeding destroyer; Sailors manning a rapid-fire anti-aircraft gun on deck. Right, top to bottom: The after deck of a destroyer showing depth charges and mine-sweeping equipment: A torpedo leaving the tube toward the objective; Sailors manning one of the deck guns. Listeners of the Canadian Broadcasting Corporation's National Network will hear another of the feature broadcasts devoted to Canada's Fighting Services on Friday, December 1, 9.00-10.00 p.m. EST. "The Royal Canadian Navy" will be a sound-picture of the complete and comprehensive activities of the Navy at work in time of war.

What Science is Doing

NERVOUSNESS AND TOOTH DECAY

Nervousness precipitates decay in children's teeth, according to Dr. Percy R. Howe, Boston, who said long research had shown that a child's diet might be sufficient for good tooth structure and condition, but the diet advantage would be offset by a nervous spell.

—o—

CYCLONE CORES WARM

Shooting the eye of a cyclone with a radio sonde, a robot weather observer and radio transmitter carried aloft by balloons, has revealed that the cyclone has a warm core, and that it may travel on overhead atmosphere tracks in the stratosphere instead of being governed by surface weather conditions.

—o—

HALTS PUERPERAL FEVER

Philadelphia physicians after nearly three years of experimentation have announced development of a new vaccine against puerperal infections (childbirth fever) which proved 100 per cent. effective in 229 cases tested. Not one case of puerperal sepsis, cause of 50 per cent. of all obstetric deaths, developed during the experiments.

—o—

"ROCKING BED" CURE

Rocking beds, a new aid to medical treatment, are described in the proceedings of the Mayo Clinic.

The report says that in the first eighty-eight cases at the clinic the beds have given "rather striking and rapid relief of pain" in the legs and have brought sleep to many sleepless persons.

They were used mostly on persons with arteriosclerosis which had interfered with circulation of the blood, with complications that produced gangrene in some instances.

Flying Through The Troposphere

If aerial research continues at its present pace, huge freight and passenger planes will climb into the troposphere and fly under perfect conditions from one continent to another. Since 1934 conditions in this layer of the atmosphere have been studied and a number of experimental flights already made. Flying above 20,000 ft., planes will be sealed and carry their own air, for above this altitude the atmosphere is so rare that cigarettes go out through lack of oxygen.

But well above the clouds, the atmosphere is nearly always fine, and owing to the lighter quality of the air there is less drag or friction. Because of this, planes will travel at least 25 per cent. faster.

SCOUTING

A Thanksgiving Day model airplane flying contest of Brampton, Ont., Scouts brought out 11 models. The prize for the plane remaining longest in the air went to Scout William Riseberry and the second to Scout William Bean.

* * *

Two alert Sudbury Scouts out hunting with their father noticed a cord hanging from the limb of a tree. Investigating, they found a radio meteorgraph released from Baltimore. The instrument indicated the moistures, temperatures and the height to which the instrument had ascended.

* * *

Clinton, Ont., Rover Scouts on a fishing trip discovered a brush fire, notified the farmer and assisted him to extinguish the fire.

* * *

The Boy Scouts of St. Catharines have an attractive district headquarters, "Carmichael House" a large brick building adjoining St. Thomas church, named after Mr. H. J. Carmichael, President of the local Scout Association. A spacious room permits meetings of Cub Packs or Scout Troops unable to meet in their usual places, in an emergency, upstairs are cooking facilities, and storage for the tents and other equipment for the district camp site, "Wigwassin," near the Welland ship canal.

How Can I?

BY ANNE ASHLEY

Q. How can I press a suit more satisfactorily?

A. Fold a large piece of newspaper lengthwise, wet one side of it, and fold the dry side over the wet side. Place the wet side against the suit and iron on the dry side. This will also prevent a shiny suit.

Q. How can I make a good pin cushion?

A. Dry hair-combings make a nice filling for pin cushions. Dried coffee grounds are also satisfactory, as they do not gather moisture nor rust.

Q. How can I check hiccoughs?

A. An old remedy which often proves very effective is to put the blade of a table knife on the tongue for a few minutes.

Q. How can I return tatting to a good clear color when it has become very soiled?

A. The best plan is to wet the tatting and soap it well. Then lay it on some hand brush. This will clean it beautifully without harming it.

Q. How can I remove odors from bottles?

A. Fill half-full of cold water and add a tablespoonful of dry mustard. Shake vigorously, let stand half an hour, and rinse thoroughly with clear water.

Q. How can I determine if the turkey is ready to take from the oven?

A. One method is to pierce the leg. If the juice is white, or pale pink, the turkey is ready.

Modern Etiquette

BY ROBERTA LEE

1. Isn't it poor taste for the friends of a newly married couple to make them conspicuous in public by attaching placards to their car, and performing other such so-called jokes?

2. At a holiday dinner, such as Thanksgiving or Christmas, where the service might be called semi-formal, is it all right to offer the guests a second helping of turkey?

3. When a married woman is travelling alone, should she sign the hotel register Mrs. H. L. Hudson, or Mary Lou Hudson?

4. Should a guest stay beyond the time specified in the invitation, when the hostess says, "Can't you stay longer?"

5. What would be the best phrase to use when a man is introducing another man to his wfie?

6. It being the woman's privilege to offer her hand to a man, if the man should offer his hand, what should she do?

Answers:

1. Yes. This is not only very bad taste, but often vulgar. Marriage is too sacred to be made a public jest by self-appointed clowns. 2. Yes, by all means do so. 3. She should sign, Mrs. H. L. Hudson, and her home city, but not her street address. 4. No. A hostess is usually trying to be hospitable when she makes such a remark. A guest should not overstay the time specified. 5. "Martha, this is Mr. White (or Charles White)." 6. The well-bred woman will accept it, of course. It would be very rude, unfriendly, and exceedingly embarrassing if she did not.

FOR CHAPPED SKIN

Hands roughened and chapped—face stinging with wind or cold—Mentholatum is what you need. Get the quick relief this gentle balm instantly brings to the stinging red, swollen parts. Soothing, cooling, it begins at once to bring relief or money back. Buy it at your druggist in 30c jars or tubes.

MENTHOLATUM Gives COMFORT Daily

Name of Bay Barrie Is On

Kempenfelt Bay Named After British Rear-Admiral of 18th Century

The super-destroyer Kempenfelt, which has been taken over by the Canadian navy, has been re-christened Assiniboine. While it is no doubt the custom to change a vessel's name under these circumstances, and Assiniboine is a good native-Canadian name, Kempenfelt is also familiar to Canadians as that of the bay on which Barrie is located. Canada's new naval unit is no doubt called after the Assiniboine river which bears the name of the Assiniboine or Stoney Indian tribe. The word means "one who roasts by the use of stones," an old Indian custom.

Governor Simcoe Bestowed It

Kempenfelt bay and the super-destroyer Kempenfelt were both named after a British rear-admiral, Richard Kempenfelt, of Swedish descent, who lived in the eighteenth century and went down with the Royal George at the time when its bottom fell out, an event pictured by Cowper in a well-known poem. It was Governor Simcoe who bestowed the name on the Ontario bay.

Have You Heard ?

An Irish priest one Sunday, referring to the miracle of the loaves and fishes, said in error that five people had been fed with five thousand loaves and two small fishes. After the service some of the congregation discussed the statement, one of them named Murphy declaring that, if it were a miracle, he himself could do the same thing. The next Sunday the priest, having heard of this, reintroduced the subject. "I should have told you last Sunday," he said, "that five thousand people had been fed with five loaves and two small fishes." Then, looking down at Mr. Murphy, he added: "You could not do that, Mr. Murphy, could you?" "Ah, sure, yer riv'rence, I could aisily enough," replied Murphy, "if I gave 'em what were left over from last Sunday!"

"How is your insomnia? Is it getting any better?"

"I'm worse than ever. I can't even sleep when it's time to get up."

—o—

Both the fond mother and the patient photographer had failed to make the restless little boy sit still long enough to have his picture taken. Finally the photographer suggested that the mother should leave the studio for a few minutes. During her absence he was successful in taking a good picture. "What did the nice photographer say to make mother's little darling sit still while I was out of the room?" she asked the child on the way home. "He said: 'You sit still, you little rascal, or I'll knock your head off'," replied the child.

—o—

A maid who recently joined the church was asked how she knew she was converted.

She replied: "Because now I clean under the rugs."

—o—

His bagpipe playing was the chief thing that mattered to him in life. One night, while he was strutting about the room, skirling for all he was worth, his wife attempted a mild protest.

"Jock," she said, "that's an awful noise you're making."

So Jock sat down and took off his boots.

Anti-Sub Boats Being Made Here

Torpedo Craft of Enormous Speed and Range Are To Put Out by Canadian Factories

Motor torpedo boats of enormous speed and range will shortly be under construction in Canada for the British Navy, Hugh Scott-Paine, famed motorboat driver and designer of the craft, said last week.

The British designer could not say how many of the fleet 70-foot craft will be built in Canada. The vessel, which he hopes will rout out the submarine menace, draws only three feet of water and cannot be mined or torpedoed.

The crew, seven men and an officer, can live aboard at sea in any weather and the boat has a cruising range of more than 2,000 miles at a patrolling speed of nine knots. Running at 22 knots, its cruising radius is more than 1,000 miles.

Its top speed is well over 40 knots, Scott-Paine said, and it is armed with four 18-inch torpedoes.

Scott-Paine said large numbers of the vessels, already in operation in the Royal Navy, are being built in England for the French Government. The Dutch Government also has adopted the craft and has ordered more than $1,000,000 worth.

VELVETEEN FOR COLLEGE WEAR

Velveteen in a black and red check one-piece dress is ideal for town or college and is worn here by Lorraine Day. The bodice simulates a vest and has criss-cross buttoning; the skirt is circular and very full. Miss Day wears a black felt coachman's hat with embroidered band in red, yellow and black.

Unwise To Bathe Daily In Winter

Skin Specialist Declares That Too-Constant Bathing in Cold Weather Brings Skin Itch

Modern science has given little support to little Johnny's age-old protests against a daily bath, especially in winter.

"There's such a thing as trying to be too clean," Dr. Paul A. O'Leary, of Rochester, Minn., declared last week.

"'Winter itch' is a common skin ailment, especially in middle-aged people," Dr. O'Leary said. "It comes from too-constant bathing in cold weather.

"During the winter the oil glands of the skin are inactive. Soap and water plus the dry heat of the house drys out the skin, causing a condition that resembles chapping. Then the sufferers proceed to treat it with ointments that increase the irritation.

"This condition occurs particularly in older people because their sweat blands atrophy or become permanently inactive.

"Shower baths are not quite as bad as tub baths in causing 'winter itch' because the immersion in water is not so great. The best treatment is to have the patient bathe once a week and be content with sponge baths in between."

Tear in Trousers Halves His Fine

Court attendants smiled at the explanation of John Herman, Hamilton, Ont., charged with riding two on a bicycle, and Magistrate James McKay ruled it was "clearly a case of necessity."

"I had torn the seat of my trousers," Herman said. "My girl friend war with me and I didn't want to leave her and I couldn't walk."

He was fined 50 cents instead of the usual $1.

Germany has 340 people to the square mile, or fewer than Great Britain, Netherlands or Belgium.
