Seasonable Designs

8362
Blouse Suit
Sizes 4 to 12

This boy's blouse suit may be made with or without yoke, long or short sleeves, nickers or straight trousers. McCall Pattern 8362, five sizes, 4-12 years, price 20c.

8868 Smock Dress
Sizes 14 to 20
Price, 25 cents
Transfer Design
No. 690
Price, 10 cents

This smock dress has a two-piece skirt, which measures about 1⅜ yards around the bottom. McCall Pattern 8868, which comes in four sizes, 14-20 years, price 25c. The smocking is taken from McCall transfer pattern No. 690 (blue or yellow), price 10c. Made of plaid gingham and white percale, the frock is most attractive.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond st., Toronto, Dept. W.

KEEPERLESS LIGHTHOUSE.

Near the Isle of Guernsey, Scene of Hugo's "Toilers of the Sea."

The first unattended rock lighthouse with a powerful fog signal is the recently completed Platte Fougere lighthouse, marking the entrance to Russell channel leading to St. Peters Port, Guernsey, a spot which figures in Victor Hugo's romance, "The Toilers of the Sea."

The lighthouse contains many ingenious electrical devices, controlled from the shore by a submarine cable nearly a mile and a half long. By its aid the foghorn and siren are regularly blown—they have been heard thirty miles away on the French coast—while the current it carries also controls the light in the lantern.

It is proposed to use this type of automatic lighthouse for illuminating Hudson Bay and Hudson Straits in connection with the opening of these waters and the carriage of wheat by the new railway to Fort Churchill. A proposal to establish similar lights on the more exposed and barren coasts of South America has also been considered.

The automobile horn was adopted in this country in 1900 to substitute whistles, bells, gongs, etc.

By adding 50 per cent. coal oil to the waste oil drained out of the engine, a very efficient mixture is obtained for the use on springs, which will keep them in the finest condition.

WEAK MOTHERS REGAIN HEALTH

Through the New Blood Dr. Williams' Pink Pills Actually Make.

No mother should allow nervous weakness to get the upper hand of her. If she does worry will mar her work in the home and torment her in body and mind. Day after day spent amid the same surroundings is enough to cause fretfulness and depression. But there are other causes, as every mother knows, that tend to make her nerves run down. A change would benefit her jaded system, and rest might improve her blood so as to give the nerves a better tone. But rest and change are often impossible, and it is then that all worn out women should take a short treatment with Dr. Williams' Pink Pills, which make new blood, rich with the elements on which the nerves thrive. In this way these pills restore regular health, increased energy, new ambition and steady nerve. There is a lesson for other women in the case of Mrs. Harry P. Snider, Wilton, Ont., who says:—"Five years ago my twin babies were born, and I was left very weak and very miserable, hardly fit to do anything. The doctor gave me medicine, but it did not help me. Then I tried another doctor, but with no better results. One day I went home to my mother, telling her how miserable I felt, and that the doctor's medicine had not done me any good. Mother asked me why I did not try Dr. Williams' Pink Pills, and as I was glad to try anything that might help me, I got three boxes when I went back home. By the time these were used there was no doubt they were helping me, and I got three more boxes. But I did not need them all, for by the time the fifth box was used, I was entirely cured, and never felt better in my life. Now when I hear people talk about feeling weak or miserable I always recommend Dr. Williams' Pink Pills, and tell what they did for me, and in similar cases I shall continue to recommend them."

At the first sign that the blood is out of order take Dr. Williams' Pink Pills, and note the speedy improvement they make in the appetite, health and spirits. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

MOONS OF PLANETARY SYSTEM.

The origin of moons is one of the mysteries of astronomy. If, as some star-gazers assert, our lunar orb was thrown off from the earth when the latter was a molten, fiery mass—the Pacific ocean being the hole left by its departure—we have a special right to feel a proprietary interest in it.

On the other hand, the two little moons that revolve about Mars like golden shuttles are strongly suspected to be asteroids (minor planets), captured out of space. The larger of them, Phobos, only sixty miles in diameter, is much smaller than many of the known asteroids.

We are rather poorly off for moons. Saturn has eight, the biggest of them, Titan, being nearly twice the size of our orb of night; and Jupiter possesses four, the largest of which, Ganymede, is greatest of all moons in our planetary system, having a diameter of 3,480 miles.

At least two or three of Jupiter's moons are still hot, as proved by the fact that they give out some light of their own. It is very interesting to watch, through a telescope, the shadows thrown upon that giant planet by its moons, observation of the eclipses of which furnished the first data for estimating the velocity of light.

Uranus has four little moons, which, oddly enough, rise in the north and set in the south. Neptune possesses only one, rather diminutive, which traverses the sky from southwest to northeast.

The most remarkable guess on record had to do with moons. Dean Swift, a century before the moons of Mars were discovered, made Gulliver say of the astronomers of Laputa: "They have found two satellites which revolve about Mars, whereof the innermost is distant from the planet exactly three diameters of the planet. The former revolves in the space of ten hours and the latter in twenty-one and a half hours."

As a matter of fact, the inner moon is 10,000 miles from Mars, whereas—the diameter of the planet being 4,000 miles—Gulliver's estimate would place it at a distance of 12,000 miles. For the outer moon he gives 20,000 miles as the distance, which is really 15,000 miles. The time of revolution for the inner moon is actually seven and a half hours and for the outer one thirty hours.

Peace.

This morning with the whistles ringing shrill,
Bells peeling loud with glee,
From out the darkness stole a whisper sweet,
Peace, peace to thee!
The nations from their Calvary have passed,
And lo! on earth the morning breaks at last.

Peace! Peace! How often have I heard thy voice
In solicitude's release;
The peace of woods, of fields, of hill, of vale;
Yet more than these;
For there amid the darkness, seems to me,
That we have caught the purport of thy plea.

The right to strive, though fail, to rise again,
And thus, with courage strong,
To hold for them a purer heritage
In days to come;
Friend of the weak, balm of the wearied heart;
Ah! this is worthy of a conqueror's part.

To know above the fields "where poppies blow,"
Their spirits glad and free;
That they have won e'en sweeter dwelling place
Than this could be;
That they have found the rainbow in the skies,
And gained the light reflected in our eyes.

To find a strengthened faith in powers of good—
Humanity's deep song;
To know that thus e'er reigns eternal love
Above the wrong.
And, though the darkness cloud earth's fairest things,
We still may find the healing of Thy wings.

To find within the morning all we've lost,
The suffering soul's surcease;
To find at dawn of day an ampler life;
Yea, this is peace.

RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat; red hot days and sweltering nights, is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on her guard to prevent these troubles, or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come suddenly will banish it. The Tablets are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Miracle.

Love met a worldling on the way,
And softly crept into his breast;
Straight self and greed refused to stay
Where love had dared to build a nest.

Into a grim and cheerless home
Love forced his way through barriers tall,
Fled wretchedness and chill and gloom—
The golden sunshine flooded all.
—Jean Blewett.

Some War Facts and Figures.

These are some of the amazing facts in Sir Douglas Haig's final despatch:—

General Headquarters received 9,000 telegrams in one day, and 3,400 letters by despatch-riders. One army headquarters had 10,000 telegrams in a day, and the daily telegrams on the lines of communication were 23,000.

There were 1,500 miles of telegraphs and telephones, and 3,688 miles of railways, on which 1,800 trains ran weekly.

In six weeks 5,000,000 rations were supplied, by our armies in France, to 800,000 civilians in the relieved areas.

The total daily ration strength of our armies was 2,700,000. An addition of one ounce to each man's ration represented an extra 75 tons.

Over 400,000 horses and mules and 46,700 motor vehicles were used, and 4,500 miles of road made or maintained.

In 1914 there was one machine gun to 500 infantrymen in the British army, at the armistice there was one machine gun to 20 infantrymen.

Over 700,000 tons of ammunition were fired by our artillery on the western front from last August to the armistice.

The number of individual landings at the ports managed by the British armies in France exceeded 10,000,000 up to the armistice, while in the last eleven months of the war the average weekly tonnage landed at those ports was 175,000 tons.

HOME BANK'S RECORD YEAR

The report submitted at the Annual Meeting of the Home Bank of Canada indicated that the Bank had enjoyed the most successful year in its history.

The progress made by the Home Bank during the past few years was referred to particularly by General Manager Mason, who pointed out that the liquid assets now amounted to over 57% of the total liabilities to the public, or actual cash assets were the strongest in the history of the Bank, representing approximately 22% of total liabilities to the public. Large gains were also made in deposits, the increase for the past twelve months having amounted to over three and a half millions, notwithstanding the fact that 9,508 of the depositors had subscribed over $4,900,000 to the last Dominion Victory Loan.

The increase in deposits during the war period had amounted to over ten million dollars, an increase of over 105 p.c., and reflects the increased patronage extended the bank by the public in both savings and general commercial lines. None of these figures include deposits of the Dominion Government.

The general statement of assets and liabilities everywhere reflects the progress made, the total assets of the bank now standing at $28,635,924, as compared with $23,675,773 at the end of the previous year. Total deposits now stand at $18,500,000, as compared with $14,600,000 at the end of the previous year.

The Profit and Loss Account is also of special interest to shareholders, as it reflects a gain in profits and has permitted of an appropriation to rest account of $100,000. The net profits for the year amounted to $238,753, equivalent to 10.63 p.c. of the paid up capital and reserve fund.

After the payment of dividends and various appropriations, including $100,000 to Rest Account, the amount carried forward was $158,348, as compared with $150,371 for the previous year.

FIRE THAT IS HARD TO PUT OUT.

Water is not of much use for putting out an oil fire. It may, indeed, be much worse than useless, for burning oil floats on it, and may thus be carried to considerable distances, spreading the fire far and wide.

Steam turned upon the flames through pipes is often highly effective. If its volume is sufficient a cloud will be formed that serves as a blanket, filling the tank about the oil and excluding air from it.

Much more satisfactory, however, is the newer method of bringing together two chemical solutions, and spreading over the surface of the burning oil the thick foam resulting from their combination, thereby excluding air and extinguishing the flames.

The steam method works very well with gas well fires, a number of portable field boilers being set up and steam thrown from them upon the burning gas column in the form of spray. If the gas stream can be interrupted for only a moment just above the point of discharge the fire will be put out.

For putting out small gasoline fires (especially on the floor) sawdust works surprisingly well. It floats for a while on the surface of the burning liquid, forming a blanket which excludes the air and smothers the flame. Dry sawdust seems to serve as well as moist.

Frothy mixture solutions of the kind above described, when put up in portable containers of convenient size, are useful in extinguishing small fires about garages.

Sometimes electricity generated by the friction of flowing gasoline against the bottom and sides of a can, or even by the flow of gasoline through a rubber hose, produces a spark which, discharged into an automobile tank that is being filled, ignites the fluid with serious or disastrous results. To guard against accidents of this kind is for obvious reasons most difficult.

LEMONS WHITEN AND BEAUTIFY THE SKIN.

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

Another Haig Story.

Earl Dartmouth, the Governor of the Zingari Cricket Club, has related a new story of Sir Douglas Haig. When Sir Douglas was invited to accept the freedom of the club, he was reminded by Earl Dartmouth of its three principles—"keep your promise, keep your temper, and keep your wicket up." The Field Marshal promptly replied: "Your principles are worthy of the nation that entered the war to keep its promise, that kept its temper through ill-fortune and through good, and please God, will keep its wicket up until its promise has been redeemed."

"Blurting out facts, in season and out of season, is not necessary to truth; to hold the tongue is also a morality."—Ibsen.

More than 40 per cent. of the motor cars in operation to-day are owned by farmers.

Minard's Liniment Cures Colds, Etc.

He Knew Why.

Mrs. Henpeck—She's very pretty, but she hardly says a word. I can't understand why so many men propose to her.

Mr. Henpeck—I can.

Resented the Implication.

He—Why is Adeline so angry with the photographer?

She—She found a label on the back of her picture saying, "The original of this photograph is carefully preserved."

Submarine Warfare.

"What did you say you call your wife for a nickname?"

"U-boat."

"Why?"

"Because whenever I come home late she blows me up without warning."

Visitor's New Problem.

Friend of the Family — Where's everybody, Bennet?

The Butler—Well, sir, the missus and the young ladies is up in the sky learning to fly and the master's in his submarine in the hornamental lake; it's very seldom you catches them on Terry Firmy these days.

In the Book of Genesis.

There had been a heavy downfall of rain, and the district manager of a Scottish railway was quickly on the warpath. He telegraphed along different sections of the line as follows: "Send full particulars on the flood."

Now there was a man on a particular section of the line where no flooding had taken place, and he decided that the message was a joke, so he wired back as follows: "Look in the Book of Genesis."

Taking a Rest.

An officer on board a warship was drilling his men. "I want every man to lie on his back, put his legs in the air and move them as if he were riding a bicycle," he explained. "Now commence."

After a short effort one of the men stopped.

"Why have you stopped, Murphy?" asked the officer.

"If ye plaze sir," was the answer, "Oi'm coasting."

I fell from a building and received what the doctor called a very bad sprained ankle, and told me I must not walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was out to work again. I think it the best Liniment made.
ARCHIE E. LAUNDRY.
Edmonton.

A Wreath Immortal.

The nations weave a garland gay
To deck the allied dead,
Who died that earth might feel no more
The tyrant's iron tread;
Old England's rose of velvet red,
The fleur-de-lis of France,
With Cuba's jasman, waxen-pale,
The blossom of romance;

The Irish shamrock filagreed
With drops of silver dew;
Brave Belgium's forget-me-nots
So softly, sweetly blue;
The sturdy thistle, purple-dark,
From Scottish glen and hill;
And from the shield of Portugal,
The yellow daffodil;

The wattle from Australia's bush,
Japan's chrysanthemum,
Canada's maple-leaf that decked
So gallantly her drum;
Italy's laurel, spring first
To crown a classic god;
And, plumed with glory like the sun,
The U. S. goldenrod.

All, all are rooted in the dust
Of heroes o'er the sea,
Who perished in the righteous cause
Of God and Liberty.
Immortal is the wreath entwined
On this Memorial Day;
The tribute of a grateful world,
It will not pass away.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You simply say to the drug store man, "Give me a quarter of an ounce of freezone." This will cost very little but is sufficient to remove every hard or soft corn from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn should relieve the soreness instantly, and soon the entire corn, root and all, dries up and can be lifted out with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that, while freezone is sticky, it dries in a moment, and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin.

Don't let father die of infection or lockjaw from whittling at his corns, but clip this out and make him try it.

NURSING.

WANTED—PROBATIONERS FOR the Montreal Women's Hospital. Two years' course. Monthly salary during period of training. Apply Lady Superintendent, 1002 St. Catherine Street West, Montreal.

POULTRY WANTED

WHAT HAVE YOU FOR SALE IN Live Poultry, Fancy Hens, Pigeons, Eggs, etc.? Write I. Weinrauch & Son, 10-18 St. Jean Baptiste Market, Montreal, Que.

FOR SALE.

NEWSPAPER, WEEKLY, IN BRUCE County. Splendid opportunity. Write Box T, Wilson Publishing Co., Limited, 73 Adelaide St. W., Toronto.

WELL EQUIPPED NEWSPAPER and job printing plant in Eastern Ontario. Insurance carried $1,500. Will go for $1,200 on quick sale. Box 62, Wilson Publishing Co., Ltd., Toronto.

CANCER, TUMORS, LUMPS, ETC., internal and external, cured without pain by our home treatment. Write us before too late. Dr. Bellman Medical Co., Limited, Collingwood, Ont.

TEACHER WANTED FOR S.S. No. 7, Huron Tp., Bruce Co.; Protestant; female; 2nd-class certificate; salary $600; duties to commence after holidays; board and lodging convenient. Apply to C. W. POLLOCK, Sec.-Treas., R.R. No. 1, Kincardine, Ont.

It Was His Old Complaint.

Two weary tramps met after a lengthy separation and sat down to compare experiences.

"Have yer been to the front?" asked one. "Ain't seen yer about lately."

"I've had influenzy."

"Influenzy? What's that?"

"Well, I don't know howo I can exactly explain it, but it takes all the fight out of yer. Yer feels sort of tired like. Don't seem to want to do anything only lie down and sleep."

"Why, I've had that disease for the last twenty years!" exclaimed the first speaker; "but this is the first time I've ever heard its name."

MONEY ORDERS.

Send a Dominion Express Money Order. Five Dollars costs three cents.

A grocery store on a large truck is one of the latest uses of the motor car. A complete line of meats, groceries, green vegetables, and everything typical of a grocery store is carried. The patrons pay their bill as they leave the car. The terror of the high-rent districts is thus eliminated.

Minard's Liniment Cures Distemper.

Thirty-six counties in Ontario intend expending nearly $5,000,000 on road construction and maintenance this year.

OTHER TABLETS NOT ASPIRIN AT ALL

ONLY TABLETS MARKED WITH "BAYER CROSS" ARE ASPERIN.

If You Don't See the "Bayer Cross" on the Tablets, You Are Not Getting Asperin—Only Acid Imitation!

BAYER

Genuine "Bayer Tablets of Asperin" are now made in Canada by a Canadian Company—No German interest whatever, all rights being purchased from the United States Government.

During the war, acid imitations were sold as Aspirin in pill boxes and various other containers. The "Bayer Cross" is your only way of knowing that you are getting genuine Asperin, proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis and for Pain generally.

Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Asperin is the trade mark, registered in Canada, of Bayer Manufacture of Monoacetic-acidester of Salicylic-acid.

CUTICURA HEALS PIMPLES

In terrible rash on face which made skin sore and inflamed. Irritated face by scratching and was disfigured. Could not sleep well and made feel unpleasant. Trouble lasted 3 months before used Cuticura and after using 2 cakes of Soap and 1 box of Ointment was completely healed.

From signed statement of Miss Gladys Neabel, R. R. 3, Brussels, Ont.

Cuticura Soap, Ointment and Talcum promote and maintain skin purity, skin comfort and skin health often when all else fails.

For free sample each of Cuticura Soap, Ointment and Talcum address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

Many an Off-Color Day is due to a disturbed digestion. Tea or coffee is often the mischief-maker.
