In a young ladies' school near Frome, England, the pupils are allowed to play at cricket. They have a special dress for the purpose, and the best cricketers are said to be almost invariably the best scholars.

A detective agency in New York has unearthed a stupendous swindle originated there, under the title of the Brooklyn Steamship and Emigration Company; the $1,000 bonds of which constitute the fraud. These bonds are in circulation in all parts of the country, many having gone to California and the Southern and Middle States. Many persons in Virginia have been extensively swindled by land speculators through the using of these bonds.

An old man named Benjamin Teachout, who is 60 years old, has been sentenced to be hung on the 13th of November next by the Wyoming county (New York) Court for the murder of his wife. He is a well-to-do farmer, and a member of the Baptist church, but his wife being a confirmed invalid he considered her a burden and made away with her by a course of gradual poisoning.

Bishop Duggan, the Catholic Bishop of Illinois, who has recently returned from Europe to the care of his diocese, has created a considerable commotion in Chicago by suspending sundry ecclesiastics who had made complaints to the Pope of his neglecting his duties. Among others, Father Roles, of the Church of the Holy Name, has thus been dismissed from the charge of his parish, much to the displeasure of his parishioners. The latter had a meeting in the basement of the church on Sunday evening last, nominally to present a testimonial to their retiring pastor, but really to make such a demonstration as would induce the Bishop to reconsider his action. So far as we can learn, the Bishop has kept strictly within the limits of the authority vested in him, and, while not imputing to Father Roles any conduct unbecoming a respectable clergyman, firmly insists upon both his power and his duty to act as he has done. The parish has raised the sum of $3,000 for Father Roles, and that seems to be about all it can do for him at present. Dr Dunne, the Vicar-General of the diocese, is another victim of the Bishop's displeasure, but no steps seem to have been taken in his behalf. The whole dispute has been referred to Rome for settlement.—*N. Y. Sun.*

The rice-birds in the South are reported as having left their usual food and are now devouring the caterpillars that have so seriously injured the cotton.

The Hudson River Railroad Company is erecting in New York a freight station to be 438 feet long and 405 feet wide. It will thus cover a lot containing 176,514 square feet. It is to be three stories high. It will be ornamented outside with statues of Commodore Vanderbilt and others.

Hamilton has already raised about $1,100, and London nearly $500, towards the Red River Settlement relief fund. A Hamilton merchant, Mr Sanford, whose firm has a branch at Red River, is going up to St. Pauls to meet his agent, and will superintend the investment of the Hamilton contribution.

McGILL UNIVERSITY.—It is stated that a lady of this city has offered an exhibition of $100 annually to the McGill University, to be competed for by students of the second year. The want of these exhibitions has long been felt in connection with our university, and it is to be hoped that this generous example will be followed by others.—*Montreal Witness.*

A New Hampshire paper says: "The greatest age ever attained in this State by any person whose age was positively known, was that reached by Mr Lovewell, of Dunstable, who died at 120. William Perkins, of New Market, reached 116; and Robert Macklin, of Wakefield, 115. Mr Perkins died in 1732, and Mr Macklin in 1787. The age of Flora Stewart, who died in Londonderry recently, is not positively known, but was at least 108."

The Kennedy electric clock was exhibited yesterday, at 481 Broadway, to a number of journalists and scientific men. It is an astonishing machine. So simple a clock never was invented before. Its mechanism consists solely of a pendulum, holding two magnets, and one wheel moving the hands on the dial face. Springs, weights, and winding up are are dispensed with altogether. The pendulum is kept in movement by two wires connected with the earth. One is furnished with a piece of zinc where it reaches the ground, the other passes through a piece of carbon. One of these wires supplies a current of positive, the other of negative electricity. Each is connected with a coil opposite to the magnets fixed on the pendulum on each side. The electricity of these magnets is of the same character as that supplied from the earth and concentrated in the coil on its side of the pendulum. Accordingly, when it swings up to that coil it is repelled and made to swing back toward the other side, where it is similarly repelled. An ingenious little arrangement cuts off the electricity from each coil as soon as it has performed its office of repulsion, and lets it on again as soon as the repulsive force is once more needed. The movement of the pendulum is regulated by screws, according to the intensity of the electric currents from the earth. The same pair of wires may be employed to move a number of clocks at great distances apart, making them keep time with absolute equality. For railroad purposes this will be of immense utility. The clock can also be kept going by a stationary battery, if from any circumstance it should become difficult to connect the wires with the earth. Altogether, it seems to us that Mr. Kennedy's invention is one of extraordinary value. The cheapness with which his clocks can be made, and the long time that they will last, will not be among the least of their recommendations for common use. *New York Sun.*

To the Electors of the County of Frontenac—

GENTLEMEN: In accordance with the desire of many of the Electors, I intend to offer myself as a Candidate at the approaching Election. I shall address you at length in the *Argus.*

JOHN STEWART.
Sept. 24.

To the Electors of the County of Frontenac—

GENTLEMEN: The death of your late member, Sir Henry Smith, having rendered vacant the representation of the County of Frontenac in the Legislative Assembly of Ontario, I am induced to think that the offer of my services might be acceptable to the Electors. Long identified with the County interests, and having as an old member of the County Council, and as Warden, become thoroughly conversant with your local affairs, I am, I think, in a position to be of service to you in the Legislature. Many of you too have had knowledge of me in my business transactions, and you can thus in both respects form an opinion of my fitness for the honour which I seek at your hands.

Agriculture will have in me a warm and active friend, and I shall always be ready to lend my aid to all measures having its advancement in view.

The promotion of the settlement of the country I shall endeavour to further by seeking to have the Back Roads completed, by endeavouring to secure the passage of a generous Homestead Law, and the adoption of a more liberal policy with respect to Free Grants of Public Lands.

Education has been greatly fostered in Canada for many years past by grants of public money. I believe that most good can be done with such grants by adopting the channels which the various denominations of Christians among us have selected for the expenditure of their own means, and I will advocate the continuance of the grants to the several Colleges in Ontario which they have hitherto received.

The present Government of Ontario has met the just expectations of the people in the economical administration of public affairs, and is entitled to my cordial support.

I shall endeavour to see you as far as time will permit, between now and the Election, and will be ready to explain my views on all public questions.

EFFECT OF ADVERTISING.—It is amusing at times to observe the stores of the merchants who don't advertise; to see the anxious proprietors looking into the streets and see the people go by, wondering why they don't come in, while the stores of their neighbours who do advertise are thronged with customers. Some people will learn by observation, others will not.—*Daily Palladium.*
