BRITANNIA LIFE ASSURANCE COMPANY,
No. 1, Princess Street Bank, LONDON.

Capital, One Million.

Empowered by Special Act of Parliament, 4th Vic. chap. 9.

The great success of this institution in Europe, and the numerous Policies, issued by the different Agencies in Canada, evidently show that the advantages of Life Assurance are daily becoming more and more appreciated by those who feel the necessity of making some provision for their families, or securing the amount of debts due by or to them in case of premature death.

The rates of the Britannia are the lowest which can be offered consistently, with security to the Assured, and the Subscriber begs respectfully to invite the attention of the public to the numerous Tables of Rates, specimens of which may be seen at his office in Kingston.

The income of the Company, independently of the large Subscribed Capital, is between Eighty and Ninety Thousand Pounds, Sterling, per Annum, and of this the greatest part is continually accumulating for the payment of losses.

A party effecting an Assurance with this Company, may do so for a fixed sum, payable at his or her death, without participating in the profits, and thereby secure an immediate Bonus by not paying more than is absolutely required to provide for the risk—but if participation in Profits is preferred by any party, there are "Mutual Tables" adopted by the Company, which offer an Annual Division of the Profits, and which being supported by the other Branch of the Institution, hold out a very safe inducement to the person wishing to Assure.

All claims payable within three months after proof of death.

No proof of Birth is required at the time a claim is made; the Age or the Assured being in every case, admitted in the Policy, cannot, under any circumstances, be afterwards called in question.

Policies effected by Parties on their own lives are not rendered void in case of death by Duelling or the hands of Justice. In the event of suicide, if the Policy be assigned, to a bona fide Creditor, the sum assured will be paid without deduction: if the Policy be not assigned the full amount of Premiums received thereon will be returned to the family of the Assured.

The necessary forms, and every requisite information, as to the mode of effecting Assurances, may be obtained either by letter or personal application to

THE AMERICAN HOUSE, BOSTON.

It is not very wonderful to get improved accomodations in living for an advanced price, but some of our friends from the country, who used in years gone by to stop at Brigham's, in Hanover street, will find on the spot now, comforts and splendors of which they little dreamed then, at the same price, if we are not mistaken. At any rate, they will get twenty-five per cent. below the fashionable prices of the crack hotels, all that the art and architecture of our day can realize. We were quite surprised on a visit to it yesterday, at the extent and perfection of the American House. It is hardly seconded to any hotel in the country for size, and may challenge comparison with the very first in the excellence of its arrangements for eating, sleeping, reading, breathing, and keeping comfortable. It enjoys water, air, light and steam, to a degree which we would hardly think possible in so crowded a location in the heart of the city. Mr Rice, the proprietor, is a practical hotel-keeper of long experience, and thoroughly bred to his business

In the enlargement of his house he seems to have indulged the most liberal views, and to have neglected nothing that could contribute to the comfort and safety of his guests. His house occupies 112 feet on Hanover street, with wings reaching back from 250 to 260 feet towards Sudbury street, and including five areas for light and ventilation, with wash rooms, bath rooms, fountains, reading rooms laundry, &c. &c. His two dining rooms, 80 and 90 feet in length, will seat 500 guests, and meals are served up in them at six or seven different hours in the day, to accomodate all tastes and habits. The floors are so interlined as to secure great silence, and protection from the spread of fire, while five principal and many minor stair cases give ample egress in such a case, from all parts of the building. As one threads the mazes of corridors, almost equalling the labyrinth of Crete, and peeps into the richly furnished parlors; the laundries, and that grand laboratory the kitchen, he seems approaching the time when the splendid conceptions of our Fourierite friends will be realized.—[Boston Paper.
