If the average man would keep a detailed expense account for a month showing every trifling expenditure, he would find that, without missing anything worth while, he could have made some very good deposits in the bank—safeguards for the future—material for business progress.

Make a real job of it.

PAINTING becomes necessary as your property increases in value, and as property was never so valuable as today there is a greater need than ever for that kind of paint which actually preserves the surface and thus saves the entire house.

This spring, to make a real job of it, use

B-H "ENGLISH" PAINT 70% Pure White Lead (Brandram's Genuine B.B.) 30% Pure White Zinc 100% Pure Paint

because it combines permanence, covering capacity and economy.

If B-H "English Paint" was dearer than it is, it would still be the most economical—the shorter life of other cheaper brands makes them more expensive in the end.

It contains the famous Brandram's Genuine B.B. finely-ground white lead—70%—to which is put 30% of pure zinc—a guaranteed formula that no other paint can boast. To this mixture is added fine turpentine and linseed oil from the B-H mills, which is of a quality in keeping with the other ingredients.

When you use B-H Paint you will notice its "body" and brilliance—you will compare the extreme covering capacity with other brands—the permanence you will be able to prove by other exteriors painted with B-H paint years ago.

This Store sells B-H Products—
Color cards free on request.
