## BOYD, HICKLING & CO.,

FLESHERTON, ONT.

# EASTER Millinery Opening

*Wednesday and Thursday*

*March 30 and 31. . . .*

We have pleasure in announcing our Spring Millinery Opening as above and cordially invite the presence of the ladies of the vicinity.
Our head Milliner,—

## *Miss Watson*

Comes to us very highly recommended, having had considerable town and city experience. She and her assistants are busy preparing a large display of the latest Millinery creations which will be on view on the opening days.

## Our Dress Making Department

As already announced opened for business this week under the superintendence of MISS HOWARD and is already busy with orders. Ladies' desiring work done in the future will do well to see Miss Howard and arrange for it, as we fully anticipate a very busy season.

## A Big Bargain in Men's Felt Hats at 75c.

65 Men's Felt Hats, including Stiff Hats in black fawn and brown; soft hats in black, brown, grey and pearl shades. All sizes from 6⅝ to 7¼. These are chiefly odd hats from some of our best selling lines of last season and sold in the regular way all the way from $1.00 to $2.25.

**We clear them out Now at 75c.**
**See them in the Window ! !**

## A Big Range of Ladies' and Men's Raincoats For Spring Showers.

### An Extra Special in Men's suits

Before our spring clothing arrives we want to clear out a pile of Men's Suits, consisting of lines of which only one suit is left. These were some of our best sellers, and if you need one every day suit now, or are likely to do during the next six months, it will pay you well to buy one of these.

All sizes from 36—42 are represented and the patterns are good—neat dark patterns in checks and stripes, some single and some double breasted, well made, finished and trimmed. Some $6.50 suits are in the lot, none sold less than $5.00 regularly.

**All Selling Now for $3.95**

---

### They are Mad

Shelburne people are wild with anger at the way the C. P. R. has treated them. Free Press says: "Man's inhumanity to man makes coutless thousands mourn," and the policy of the C. P. Railway, if it does not cause mourning, causes curses both loud and deep to be showered upon the management of that corporation. For two weeks the Owen Sound branch of the railway was snowbound and the engines were supplied with water free of charge by the village of Shelburne. Now Shelburne is suffering from a fuel famine and there are several cars of coal between here and Toronto consigned to this burg. They have been on the road, not merely for weeks but for months and it was expected that in return for the kindness of the town at least one car would be rushed through. The blocade was broken and on Sunday a train of ten car loads of freight reached Shelburne. With eager expectancy the citizens enquired for coal but were informed that not an ounce was on board. Then as if to drive the disappointment home further information was given that three cars were loaded with Massey-Harris harvesting machinery !!! Forsooth !!!

The magnificent system of waterworks, which will soon be established in the County House of Refuge in Markdale, will be another step added toward the completion of this beneficient institution. A strong, clear and steady stream of water has been struck on the farm, which the engineer in charge of the work, Mr. Neil McGalphan, of the Toronto Windmill Co., says is sufficient to supply a town of 2,0000 inhabitants with a complete system of waterworks. The value of this never failing spring cannot be easily overestimated, and this excellent flow of water is also invaluable, the like of which is seldom struck. The well is situated about 76 rods from the tank, almost directly behind the house of refuge, and and the tank is ten rods north of the building. So strong is the flow that two six inch square pumps were kept working two days endeavoring to empty the well in order to facilitate operations in sinking the crib, but men are now engaged in sinking the crib in the well without removing the water, which is a most difficult task. The windmill at the well, the frame-work of which is now erected, has a 16-foot wheel, and was manufactured by the windmill, Engine and Pump Company of Toronto. From the spring the water will be discharged through a two inch pipe to the tank, on the top of which is situated a tower 65 feet high, and the height from the ground to the top of the tower will be 90 feet. The tank has a capacity of 35,000 gallons,. The steel substructure under the tank is built of 8 inch by ½ inch angles on corners, 4 inch angles for girts, and the main sill on top is 34 inch "I" beams, 80 pounds to the foot. The main joice will be composed of 8x16 southern pine. It is expected that it will be the middle of April before the system will be in operation.—Markdale Standard.

A meeting of the directors of the Huron and Ontario Electric Railway Co., was called to meet at the President's office in Walkerton on Friday afternoon of last week to meet Mr. McDonald of Guelph, who was to be present to discuss the possible transfer of the charter of the Electric Railway Co. to the parties who purpose building a steam road from Hanover to Teeswater as referred to in a previous issue of the Post. Mr. McDonald of Guelph, and Mr. Cameron of Meaford, sec'y. of the Electric Railway Co., was unable to get through from Guelph in consequence of the snow blockade, and were thus prevented from attending the meeting. A full meeting of the directors of the Electric Railway Co., is to be called for about April 1st. It would appear that somebody is in earnest in connection with the matter, and we are in hopes that Hanover will secure a competing railway line which will prove a great boon to our manufacturing interests, besides being of great advantage to the town at large. If the road is to be constructed, and if, as is supposed, that the C. P. R. is at the bottom of the enterprise, we would like very much to see the road constructed eastward to Flesherton or some other point on the Owen Sound branch of the Canadian Pacific.—Hanover Post.

The Shelburne Economist says:—A real live porcupine was captured in town on Monday. It made its appearance near the town hall, and was captured in a barrel by Rev. P. W. Anderson. Afterwards it was released and chased down to the town park. Tuesday night it was making itself at home in the trees in the rear of Mr. E. Berwick's residence, and Mr. George Berwick settled the matter by giving it a dose of lead.
