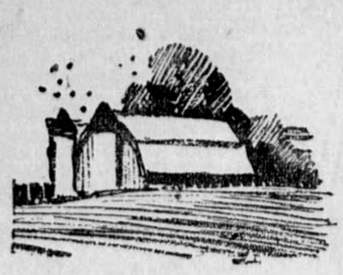
We Meet Farmers Half Way



R. P. BELLAMY
Manager
FEVERSHAM

FARMERS who are making most progress are those who have realized the profit that can be made by use of Bank capital in enlarging their herds or increasing their field production. The Bank of Toronto makes a business of extending to Canadian farmers the power to finance larger crops, and larger holdings of live stock.

Our Managers will meet you half way on any sound proposal that has to do with development and production.

Capital $5,000,000. Reserves $6,793,983.

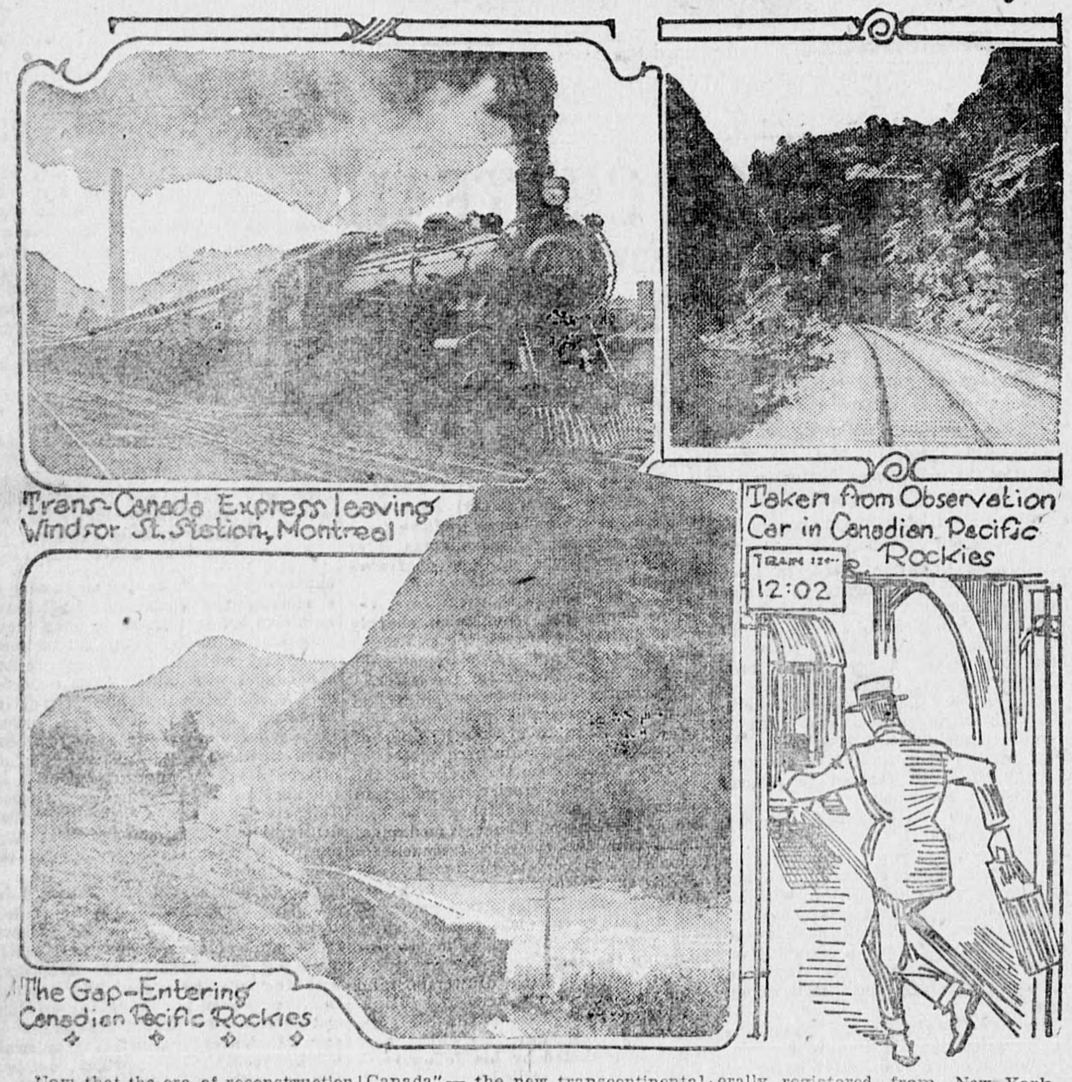
Fastest Transcontinental Train in the World for the Business Man in a Hurry



Now that the era of reconstruction is here, the business man, who has been taxed to the limit, bought bonds to his capacity and given until it hurts is to be considered again. He is to be permitted to get from place to place quickly, his freight is to be handled promptly and he is to be given every assistance to revitalize the business of America. The railways are the veins and arteries upon which a healthy business body must depend, therefore normally much of his help must come from them.

The Canadian Pacific, a privately run road is the first of the railroads to help the business man.

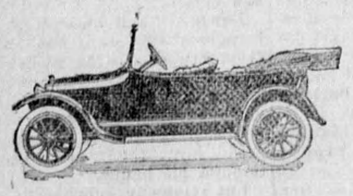
On June 1st, the first "Trans-Canada"— the new transcontinental express of the C. P. R.—pulled out of the Windsor St. Station in Montreal filled to capacity on its three thousand mile run to Vancouver.

This is the fastest transcontinental train in the world, making the trip from Montreal to Vancouver in less than four days, to be exact, 93 hours and 30 minutes, and from Vancouver to Montreal in 92 hours 15 minutes, the run being made without change of cars.

A whole business day is thus saved for the Business-Man-in-a-Hurry.

An interesting point in connection with this train is the fact that more than half of the passengers are generally registered from New York, Philadelphia, Boston and other American cities, a considerable number being booked for Banff, Lake Louise and points west.

One thinks of a transcontinental train as a single unit, but in reality it is made up of a number of complete units. A daily service, the trip being four days, requires four trains running each way simultaneously. The equipment of the new de luxe train has an estimated value of $6,000,000, using for the daily run eastbound and westbound, 59 sleeping cars, 5 compartment cars, 15 diners and 24 locomotives.



CHEVROLET

Made in Canada

You'll be surprised how little it costs to operate this Chevrolet "Four-Ninety" Touring Car. Twenty-five miles on a gallon of gasoline is not an unusual record. Tires last an unusually long time. Repairs are few and far between. Care-free, regular performance is the Chevrolet rule. Yet with all its economy and low price, Chevrolet "Four-Ninety" Touring Car is a handsome, roomy, comfortable car—a car you can be proud to own.

The more a man knows about automobiles, the more experience he himself has had with them, the more critical he is apt to be of their essential features. To satisfy this class of motorists is the chief motive of Chevrolet construction and equipment. It is to this element therefore that the convenience of operation, accessibility and equipment, the dependability and economy of the Chevrolet makes its greatest appeal.

FLESHERTON, - - ONTARIO

During the electric storm last week the dwelling of Mr. Winfield Stewart of Egremont was struck by lightning. As the house is well rodded no damage was done. This is the third time the building has been struck contravening the old saying that lightning never strikes in the same place twice.

A prominent citizen who is always ready to try anything once, paraded home from a gent's furnishing establishment the other afternoon attired in an overall suit of blue drill. Half an hour later he paraded back clothed as per usual and ccompanied by his wife. In this instance the rebellion was brief.—Harriston Review.

The Durham Furniture Co. have bought a new F. W. D. truck of three tons capacity, with trailer, which will be used in the yards here and also at the Rock Mills plant, for hauling logs and lumber. As its name indicates, it is a Four Wheel Drive, and is a powerful machine. The cost, we understand, was in the neighborhood of $9,000.00.—Chronicle.

George Smith, of Wingham, thoroughly believes in advertising. Several weeks ago he advertised in the Webster Advertiser for a wife, and a young lady named White of Eldorado, Ill., answered. After a reasonable exchange of letters the young lady arrived in Wingham, was recognized by a white rose she wore, and the two taxied off to a parson's who tied the nuptial knot.

Mr. Jacob Grein, one of Normanby's most prosperous farmers, told us at a recent interview, says the Ayton Advance, that he had reaped, threshed and hulled, from his 1919 sweet clover crop, two hundred and eighty five bushels. The bulk is nearly all sold for which he received $25 per bushel, and will net him the sum of $7,125 besides the seed he used to seed down 90 acres this year. He also raised a crop of Alfalfa clover last year for which he received $640 and his own seed for this year. He strongly believes in sweet clover, not as a speculation alone, but claims it to be one of the best and cheapest fertilizers for the land.

Card of Thanks

Mr. S. Hemphill and family desire to extend their sincere thanks to their many friends and neighbors for their sympathy and assistance during the illness and death of their beloved wife and mothsr.

Summer Session commences July 2nd at the

NORTHERN Business College

Owen Sound, Ont.

Train yourself for a good position. We wish we could supply one fifth the demand for office help.

New Perfection Oil Cook Stove

Speedy—Touch a match to the burner and it is ready for use instantly, just as speedy as a gas stove.

Steady—Set the flame where you want it. You can always see it through the mica door and it stays where you set it.

Clean—Does not blacken pots and pans. The long blue chimney turns every drop of oil into cooking heat. None of it escapes in smoke or soot or disagreeable odor.

Hot—For every cooking purpose there is always an abundance of steady, clean, intense cooking heat directly against the utensil.

Oven—Glass door, will not steam or break. Three point lock device saves heat. Scientific heat circulation, all steam and moisture carried away. No soggy food.

Call and let us show them to you. Made in 2, 3 and 4 burners.

The Rise of Maxwell is Due to its Metals

FINE soil makes fine wheat; fine feathers make a fine bird; and fine metals have made the Maxwell. They have given it:

1—A life of 100,000 miles.

2—Thriftiness.

For its metals are light in weight. Therein comes thriftiness.

But these metals are of extra strength. Therein comes long life.

Metallurgists—those who have made the study of metals a science—will tell you that such metals are costly, but they guarantee quality in a car and their generous employment in a Maxwell is by far the best evidence anyone may need to determine its quality.

They are almost alone responsible for the rapid rise of Maxwell, for the fact that nearly 400,000 now have been built, for that ever-growing friendliness to Maxwell the world over.

We want you to ride in the Maxwell. To take a turn at the wheel. To learn how easily it drives. To know how good a car it actually is. Call and see this latest Maxwell.
