May Help Solve the Farmers' Labor Problem

Tractors and labor saving devices for the farm will form a very important and timely part of the display of manufacturers at the Canadian National Exhibition this year. Unusual efforts have been put forth to make the farm machinery exhibits more extensive and representative than ever before and there is every reason to believe that the progressive farmer will find here the things that he most needs to solve his perplexing labor problems. Wonderful advances have been made mechanically along this line, and not the least important are the scores of machines and devices designed to lighten the work of the woman on the farm and to make her lot less burdensom. The farm wife will be delighted with the progress made in lines of endeavor of peculiar interest to her, while the city woman will also discover numerous simple contrivances that will make housework lighter and more enjoyable.
