Both wells are said to maintain an even pressure of 145 pounds each. At a meeting of the Doran Development Company held here, it was decided to form a joint stock company to be capitalized at $100,000, and to allow the present shareholders shares to the value of two dollars for every dollar invested. As soon as the company is incorporated steps will be taken to pipe the gas to Meaford for heating and lighting purposes as it is confidently believed that there is enourh gas coming from the two wells to supply the town for years to come.

Anyone who handed a fifteen year old girl a leaded revolver and told her to wave it in a crowd would be regarded as viciously and criminally reckless of human life. Yet parents will permit a boy or girl to drive a motor car upon a public highway and think nothing of the fact that they are risking lives right and left and, incidentally, violating a law designed to afford pratection to users of the public streets.—Carleton Place Central Canadian.
